

HAIZHAO YANG

Department of Mathematics
Department of Computer Science (Affiliated)
University of Maryland, College Park, MD, USA

Phone: +1 (984) 218-7016
Email: hzyang@umd.edu
Homepage: <http://haizhaoyang.github.io>

CURRENT POSITION

Associate Professor	2023 - now
Assistant Professor	2022 - 2023
Department of Mathematics	
Department of Computer Science (affiliated)	
The University of Maryland Institute for Advanced Computer Studies (UMIACS)	
Center for Machine Learning	
University of Maryland College Park, US	

PREVIOUS POSITION

Assistant Professor (tenure approved in 2022)	2019 - 2022
Department of Mathematics	
Purdue University, US	

Assistant Professor	2017 - 2019
Department of Mathematics	
Affiliate, Institute of Data Science	2019
National University of Singapore, Singapore	

Visiting Assistant Professor, Duke University, US	2015 - 2017
---	-------------

EDUCATION

Ph.D. in Mathematics , Stanford University, US	2015
M.S. in Mathematics , University of Texas at Austin, US	2012
B.S. in Mathematics , Shanghai Jiao Tong University, China	2010

HONORS

DARPA Young Faculty Award	2024
Maryland Research Excellence	2023
ONR Young Investigator Award	2022
Teaching for Tomorrow Award, Purdue University	2021
NSF CAREER Award	2020
AMS-Simons Travel Award	2015-2017
SIAM Early Career Travel Award	2015
SIAM Student Travel Award	2013-15

PUBLICATIONS

⁺ equal contribution; * corresponding author; [†] student or postdoc mentored.

Preprints

TEACHING EXPERIENCE

- University of Maryland College Park Spring 2024
Instructor in **AMSC 808X Machine Learning for Scientific Computing (graduate level)**: This course provides a basic introduction to deep learning and reinforcement learning, their theoretical foundation, and their applications in scientific computing.
- University of Maryland College Park Fall 2023
Instructor in **MATH 410 Advanced Calculus I**: A goal of the course is to establish the ability for rigorous analysis of what is taught in basic calculus courses. Students are expected to create proofs of results they have not previously seen.
- University of Maryland College Park Spring 2023
Instructor in **MATH 401 Applications of Linear Algebra**: This is a second course in linear algebra with a focus on applications. Various applications of linear algebra: matrix factorization, solving linear systems, least squares, principle component analysis, graphs, finite Markov chains, spectral clustering, Linear Programming.
- Purdue University Spring 2022
Instructor in **MA 36600 Introduction to Ordinary Differential Equations**: This is a method course for juniors in any branch of engineering and science. An introduction to ordinary differential equations with emphasis on problem solving and applications. The one-hour computer lab will give students an opportunity for hands-on experience with both the theory and applications of the subject.
- Purdue University Fall 2021
Instructor in **Mathematical Theory and Applications of Deep Reinforcement Learning (graduate level)**: This course provides a basic introduction to deep reinforcement learning, applications of deep reinforcement learning in mathematical science and scientific computing, and theoretical analysis of deep reinforcement learning.
- Purdue University Spring 2021
Instructor in **MA 265 Introduction to linear algebra (undergraduate level)**: Systems of linear equations, matrix algebra, vector spaces, determinants, eigenvalues and eigenvectors, diagonalization of matrices, applications.

- Purdue University Fall 2020
 Instructor in **Mathematical Theory and Applications of Deep Learning (graduate level)**:
 Part I: machine learning basics; deep feedforward networks; convolutional networks; advanced network design; Part II: approximation theory of deep neural networks; stochastic optimization methods; regularization for deep learning; generalization error of deep neural networks; Part III: sparse and structured computation; sequence modeling: recurrent and recursive nets; deep reinforcement learning; deep generative models; distributed and decentralized learning.
- Purdue University Spring 2020
 Instructor in **MA 30300**: This is a method course for juniors in any branch of engineering and science. Basic techniques for solving systems of linear ordinary differential equations. Series solutions for second-order equations, including Bessel functions, Laplace transform, Fourier series, numerical methods, separation of variables for partial differential equations, and Sturm-Liouville theory.
- National University of Singapore Term II 2017-2019
 Instructor in **Mathematical Theory and Applications of Deep Learning (graduate level)**:
 Part I: machine learning basics; deep feedforward networks; convolutional networks; advanced network design; Part II: approximation theory of deep neural networks; stochastic optimization methods; regularization for deep learning; generalization error of deep neural networks; Part III: sparse and structured computation; sequence modeling: recurrent and recursive nets; deep reinforcement learning; deep generative models; distributed and decentralized learning.
- National University of Singapore Term II 2018-2019
 Instructor in **Modeling and Numerical Simulation (graduate level)**: This module is designed for graduate students in mathematics. It focuses on modeling problems in real life and other disciplines into mathematical problems and simulating their solutions by scientific computing methods. Major topics covered include modeling and numerical simulations in selected areas of physical and engineering sciences, biology, finance, imaging, and optimization.
- National University of Singapore Term I 2018-2019
 Instructor in **Convex Optimization (undergraduate level)**: modeling examples and basic concepts of optimization; convex functions and properties; gradients and subgradients; gradient methods; sub-gradient methods; Newton-type algorithms and the Barzilai-Borwein method; constrained optimization; accelerated proximal gradient methods; stochastic block coordinate descent methods; convex conjugacy and duality; splitting algorithms and implementations; CVX Matlab software for convex programming.
- National University of Singapore Term I 2017-2018
 Instructor in **Matrix Computation (undergraduate level)**: QR factorization, singular value decomposition, condition numbers, stability, perturbation analysis, least-squares problems, eigenvalue problems.
- Duke University Spring 2017
 Instructor in **Math 532: Basic analysis II (undergraduate level)**: Fourier and wavelet analysis, differential and integral calculus in R^n , low-dimensional manifolds, inverse, and implicit function theorems.
- Duke University Fall 2016
 Instructor in **Math 561: Scientific computing I (graduate level)**: direct and iterative solvers for dense and sparse linear systems, QR factorization, eigendecomposition, sparse matrix factorizations, basic parallel computation.
- Duke University Autumn 2015 and Spring 2016
 Instructor in **Math 353 Ordinary differential equations and partial differential equations**.

CONTRIBUTED PACKAGES

Familiar with high-performance computing with C/C++, Fortran, Matlab, and Python in distributed and parallel computing environments.

- **ButterflyLab** 2014-now
 - Optimal complexity for evaluating multidimensional Fourier integral operators, special function transforms, and Green’s functions in 1D to 3D integral equations for high-frequency wave propagation.
 - Optimal complexity preconditioners for high-frequency wave equations.
 - The latest version of ButterflyLab for solving large-scale dense linear systems is organized and coded by Haizhao Yang and is available at <https://github.com/ButterflyLab/ButterflyLab>.

- **ButterflyPACK** 2018-now
 - A mathematical software for rapidly solving large-scale dense linear systems that exhibit off-diagonal rank-deficiency. These systems arise frequently from boundary element methods or factorization phases in finite-difference/finite-element methods.
 - Relies on low-rank or butterfly formats under Hierarchical matrix, HODLR, or other hierarchically nested frameworks to compress, factor, and solve the linear system in quasi-linear time.
 - The butterfly format, originally inspired by the butterfly data flow in fast Fourier Transform, is a linear algebra tool well-suited for compressing matrices arising from high-frequency wave equations or highly oscillatory integral operators.
 - The distributed and parallel version is available at <https://github.com/liuyangzhuan/ButterflyPACK> by Yang Liu. The sequential MATLAB version is referred to ButterflyLab right above by Haizhao Yang.

- **ELSI** 2015-now
 - ELSI provides and enhances scalable, open-source software library solutions for electronic structure calculations in materials science, condensed matter physics, chemistry, molecular biochemistry, and many other fields. ELSI focuses on methods that solve or circumvent the Kohn-Sham eigenvalue problem in density-functional theory. The ELSI infrastructure should also be useful for other challenging eigenvalue problems.
 - One of the key design pillars of ELSI is portability and support for various computing environments, from laptop-type computers all the way to the most efficient massively parallel supercomputers and new architectures (GPU and many core processors).
 - Available at <https://wordpress.elsi-interchange.org/>.

- **ZoloEig** 2016-now
 - Interior eigenvalue solver based on fast direct solver and the best high order rational function approximation to step functions.
 - Can be implemented in spectrum slicing libraries for full diagonalization.
 - Can also be used to compute leading eigenpairs.
 - Available at <http://www.math.nus.edu.sg/~matyh/codes/ZoloEig.tar.gz>.

- **PSP** 2015-now
 - The PSP is an extensible distributed-memory parallel library offering a basic set of linear algebra primitives.
 - It achieves scalability and load balance via its 2D block cyclic distribution.

- Routines for sparse data types includes (sparse) matrix (sparse) vector multiplication, (sparse) matrix (sparse) matrix multiplication, etc.
- Supports several sparse formats, e.g. COO, CSC, and CSR.
- Similar user habits with Scalapack.
- Available at <https://github.com/HaizhaoYang/PSP>.

• **DeCom** 2014-2016

- 1D to 3D Synchrosqueezed wave packet transforms for analyzing instantaneous/local properties of non-linear oscillatory signals in a superposition.
- 2D synchrosqueezed curvelet transforms for analyzing local properties of banded textures in a superposition.
- Application examples in atomic materials science, wave propagation in geophysics, biological and medical signals, and canvas painting art investigation.
- Available at <https://github.com/HaizhaoYang/DeCom>.

• **SynCrystal** 2015-now

- A MATLAB toolbox for atomic crystal analysis based on synchrosqueezed transforms and variational optimization.
- Automatic tool for classifying crystal lattices, identifying grain boundaries, isolated defects, estimating grain orientation and elastic deformation.
- Fast analysis for 2D and 3D atomic scale crystal data.
- Available <https://github.com/SynCrystal/SynCrystal>.

RECOGNITION FOR MENTORING

The EASIAM (East Asia section of SIAM) Student Paper Prize for Shijun Zhang, first prize. 2020

STUDENTS AND POSTDOCS

Postdocs

Current:

1. Ling Liang at University of Maryland College Park, 2023-now
2. Michelle Michelle at Purdue University, 2022-now
3. Ayan Maiti at Purdue University, 2022-now

Previous:

1. Ke Chen, August 2022 to July 2024. First position afterward: Assistant Professor in the Department of Mathematics at the University of Delaware
2. Yiqi Gu, August 2019 to May 2021. First position afterward: Postdoc fellow in the Department of Mathematics at Hong Kong University
3. Ricardo A. Delgadillo, August 2019 to April 2020. First position afterward: Research fellow in the Department of Environmental and Civil Engineering, National University of Singapore
4. Simon Etter, August 2019 to July 2021. First position afterward: Research scientist at synchronous.ai
5. Sean Hon, March 2019 to May 2020. First position afterward: Assistant professor in the Department of Mathematics at Hong Kong Baptist University

PhD Students

Current:

1. Di Wu, 2024-now
2. Zezheng Song, 2022-now
3. Junaid Aftab, 2023-now.
4. Chugang Yi, 2022-now.
5. Gareth C Hardwick, 2022-now.

Previous:

1. Qiyuan Pang (2023)
Ph.D. in the Department of Mathematics, Purdue University.
Thesis title: Fast Algorithms for Matrix Computation and Applications
Position afterward: Microsoft
2. Yong Zheng Ong (2023)
Ph.D. in the Department of Mathematics, National University of Singapore.
Thesis title: Adaptive Neural Network for Discretization Invariant Operator Learning.
Position afterward: Instructor, School of Information Systems, Singapore Management University
3. Senwei Liang (2022)
Ph.D. in the Department of Mathematics, Purdue University.
Thesis title: Learning and Solving Partial Differential Equations with Deep Learning
Position afterward: Postdoc at Lawrence Berkeley National Laboratory
4. Ze Chen (2020)
Ph.D. in the Department of Mathematics, National University of Singapore.
Thesis title: Fast Matrix Vector Multiplication via Interpolative Decomposition Butterfly Factorization.
Position after graduation: Research Scientist, Shopee, Singapore.
5. Shijun Zhang (2020)
Ph.D. in the Department of Mathematics, National University of Singapore.
Co-supervised with Zuowei Shen
Thesis title: Deep Neural Network Approximation via Function Compositions.
Position afterward: Postdoc at National University of Singapore and Phillip Griffiths Assistant Research Professor at Duke University

Thesis defense committee member:

1. Nathaniel James Hoffman (2026)
Ph.D. in Mechanical Engineering at the University of Maryland, College Park
2. Marco Irving Bornstein (2024)
Ph.D. in applied mathematics in the AMSC program, University of Maryland College Park.
3. Yuxiang Peng (2024)
Ph.D. in the Department of Computer Science, University of Maryland College Park.
4. Tahseen Rabbani (2024)
Ph.D. in the Department of Computer Science, University of Maryland College Park.
5. Jiaqi Leng (2024)
Ph.D. in applied mathematics in the AMSC program, University of Maryland College Park.

6. Yuancheng Xu (2024)
Ph.D. in applied mathematics in the AMSC program, University of Maryland College Park.
7. Efstratios Tsoukanis (2024)
Ph.D. in applied mathematics in the AMSC program, University of Maryland College Park.
8. Lizuo Liu (2023)
Ph.D. in the Department of Mathematics, Southern Methodist University.
Thesis title: Neural Network Learning for PDEs with Oscillatory Solutions and Causal Operators
9. Lucas Bouck (2023)
Ph.D. in applied mathematics in the AMSC program, University of Maryland College Park.
Thesis title: Liquid Crystal Variational Problems: Modeling, Numerical Analysis, and Computation
10. Shixin Zheng (2021)
Ph.D. in the Department of Mathematics, Purdue University.
11. Xiaodong Huang (2022)
Ph.D. in the Department of Mathematics, Purdue University.
Thesis title: Structure Preserving and Fast Spectral Methods for Kinetic Equations
12. Yubo Wang (2022)
Ph.D. in the Department of Mathematics, Purdue University.
Thesis title: Efficient Numerical Methods for Kinetic Equations with High Dimensions and Uncertainties
13. Chenyang Cao (2020)
Ph.D. in the Department of Mathematics, Purdue University.
14. Dr. Tongyao Pang (2019)
Ph.D. in the Department of Mathematics, National University of Singapore.
Thesis title: Image and Signal Restoration by Prior Knowledge.
15. Dr. Guodong Xu (2018)
Ph.D. in the Department of Mathematics, National University of Singapore.
Thesis title: Sparsity based regularization for signal recovery and clustering.
16. Dr. Guan Yu (2018)
Ph.D. in the Department of Mathematics, National University of Singapore.
Thesis title: Convergence Analysis on SVD-Based Algorithms for Tensor Low-Rank Approximations.

Master Students

Current:

1. Nikhil Roy, 2024-now
M.Sc. in the Department of Computer Science, University of Maryland College Park

Previous:

1. Lin Chen (2019)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: Adversarial Encoder-Decoder for Compressed Sensing.
Position after graduation: Ph.D. in Management at INSEAD.
2. Yunrui Liu (2019)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: Semi-supervised Learning in Imbalanced Dataset.
Position after graduation: Machine learning scientist in Facebook, UK

3. Linpo Guo (2019)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: Width and Depth Based Graph Neural Network for Semi-Supervised Classification.
Position after graduation: Data scientists in Shopee, Singapore
4. Fan Yang (2018)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: Single Channel Audio Classification and Source Separation Using Convolutional Neural Networks.
5. Yurui Chen (2018)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: Time-Frequency Analysis in Fetal ECG Extraction.
Position after graduation: Ph.D. in mathematics at National University of Singapore.
6. Tao Zhang (2018)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: 3D Atomic Crystal Analysis via Fast Synchrosqueezed Transform.
Position after graduation: Data Scientist in Vivo then Ph.D. in mathematics at the University of Florida.
7. Han Wang (2018)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: Interpolation and Approximation of Computationally Expensive Posterior Density.
Position after graduation: M.Sc. in statistics at University of Pennsylvania.

Thesis defense committee member:

1. Renbo Zhao (2018)
M.Sc. in the Department of Mathematics, National University of Singapore.
Thesis title: Stochastic and Randomized Algorithms for Large-Scale Optimization in Machine Learning.
Position after graduation: Ph.D. in operation research at MIT.

Undergraduate Students

Current:

1. Fouad Ayoub 2023 - now
B.S. in the Department of Computer Science at University of Maryland College Park
2. Joseph Vincent 2023 - now
B.S. in the Department of Computer Science at University of Maryland College Park
3. Alejandro Escoto 2023 - now
B.S. in the Department of Computer Science at University of Maryland College Park
4. Rikhil Konala 2023 - now
B.S. in the Department of Computer Science at University of Maryland College Park
5. Krish Patel 2023 - now
B.S. in the Department of Computer Science at University of Maryland College Park
6. Rohan Bhatnagar 2024 - now
B.S. in the Department of Computer Science at University of Maryland College Park
7. Tara Adusumilli 2024 - now
B.S. in the Department of Computer Science at University of Maryland College Park
8. Rishabh Chheda 2024 - now
B.S. in the Department of Computer Science at University of Maryland College Park
9. FNU Maheka 2024 - now
B.S. in the Department of Computer Science at University of Maryland College Park

Previous:

1. Peter Hwang (2024)
B.S. in the Department of Computer Science at University of Maryland College Park
Position after graduation: Industrial job
2. John Timothy Quinn (2022)
B.S. at University of Colorado Boulder
Position after graduation: M.S. in Applied Mathematics at the University of Colorado Boulder
3. Gengzhi Yang (2022)
B.S. at Fudan University
Position after graduation: Ph.D. in the AMSC program at the University of Maryland College Park
4. Zhongyi Jiang (2022)
B.S. at University of Delaware
Position after graduation: Ph.D. admission with financial support in the AMSC program at the University of Maryland College Park
5. Jiaheng Chen (2021)
B.S. in the Zhiyuan College of Mathematics, Shanghai Jiao Tong University
Position after graduation: Ph.D. in the Department of Statistics at University of Chicago
6. Wenhan Gao (2021)
B.S. in the Department of Applied Mathematics and Statistics at The State University of New York at Stony Brook
Position after graduation: Ph.D. in the Department of Mathematics, The State University of New York at Stony Brook, US
7. Jasen Lai (2021)
B.S. in Mathematics and Computer & Information Sciences at the Ohio State University
Position after graduation: Ph.D. in the Department of Statistics at Purdue University
8. Shiqin Dai (2020)
B.S. in the Department of Mathematics and Computer Science, Purdue University
Position after graduation: M.Sc. in ECE, Duke University.
9. Liyao Lyu (2020 spring and summer)
B.S. in the Department of Mathematics, Soochow University.
Position after graduation: Ph.D. in the Department of Computational Mathematics, Science and Engineering, Michigan State University.
10. Nail Sachin Palkar (2019 summer)
B.S. in the Department of Mathematics and Computer Science, University of North Carolina, Chapel Hill.
UROPS project: Fourier Analysis in Deep Learning.
11. Ong Yong Zheng (2019)
B.S. in the Department of Mathematics, National University of Singapore.
Thesis title: Generative Adversarial Networks for Source Separation.
Position after graduation: Ph.D. in mathematics with Shopee Fellowship at National University of Singapore.
12. Yong Teck Xuan Ivan (2019)
B.S. in the Department of Mathematics, National University of Singapore.
Thesis title: Semi-Supervised Learning for Imbalanced Classification Problems.
13. Lee Zhi Qiang Leonard (2019)
B.S. in the Department of Mathematics, National University of Singapore.
Thesis title: Approximation Theory for Deep Learning.
Position after graduation: Ph.D. in School of Computing with Shopee Fellowship at National University of Singapore.

14. Seow Yaxin Claudia (2019)
B.S. in the Department of Mathematics, National University of Singapore.
Thesis title: Decentralised Deep Learning Optimisation.
Position after graduation: co-founder of NodeFlair.
15. Xueying Guo (2019)
B.S. in the Department of Mathematics, National University of Singapore.
Thesis title: Deep Reinforcement Learning for Solving Linear Equations.
16. Mo Zhou (2018)
B.S. in the Department of Mathematics, Tsinghua University.
Thesis title: Advanced Mode Decomposition Algorithms in Signal Processing.
Position after graduation: Ph.D. in mathematics at Duke University, US.
17. Shengtong Zhang (2018)
B.S. in the Department of Mathematics, Tsinghua University.
Thesis title: Approximation Theory of Deep Learning.
Position after graduation: Ph.D. in industrial engineering & management sciences at Northwestern University, US.
18. Qiyuan Pang (2018)
B.S. in the Department of Mathematics, Sun Yat-Sen University.
Thesis title: Fast Algorithms for Non-Uniform Fourier Transformation.
Position after graduation: Ph.D. in mathematics at Purdue University, US.
19. Haoxuan Wang (2018)
B.S. in the Department of Mathematics, Zhejiang University
Thesis title: Fast Algorithms for Deep Learning.
Position after graduation: Ph.D. in mathematics at National University of Singapore.

ACADEMIC SERVICE

University and Departmental Services

- Member, AMSC Graduate Committee, Department of Mathematics, University of Maryland College Park, 2024-2026
- Co-organizer, Numerical Analysis Seminar, Department of Mathematics, University of Maryland College Park, 2022-2024
- Member, Graduate Admission Committee, the Applied Mathematics & Statistics, and Scientific Computation (AMSC) graduate program, University of Maryland College Park, 2022-2024
- Co-organizer, PSU-Purdue-UMD Joint Seminar on Mathematical Data Science, Department of Mathematics, University of Maryland College Park, 2022-2024
- Member, PDE/Applied Math Field Committee, Department of Mathematics, University of Maryland College Park, 2022-2024
- Member, Numerical Analysis Field Committee, Department of Mathematics, University of Maryland College Park, 2022-2024
- Member, Analysis Field Committee, Department of Mathematics, University of Maryland College Park, 2022-2024
- Member, Computer Committee, Department of Mathematics, Purdue University, 2019-2022
- Member, Search Committee for Data Science, Department of Mathematics, Purdue University, 2019-2021

- Organizer, Mathematical Data Science Seminar, Department of Mathematics, Purdue University, 2019-2022

Editorial Duties

- Guest Editor, *Frontiers in Applied Mathematics and Statistics*, a special issue on Machine Learning for Mathematical Modeling and Computation, 2021
- Guest Editor, *Computational and Mathematical Biophysics*, a special issue on Optimization and Machine Learning Algorithms for Biological Data Analysis, 2020

Research Grant Refereeing

- 7 US Department of Energy (DOE), Advanced Scientific Computing Research (ASCR), 2023
- 6 US National Science Foundation (NSF), DMS Computational Mathematics CAREER Award, 2023
- 5 US National Science Foundation (NSF), Division of Information and Intelligent Systems CAREER Award, 2023
- 4 US National Science Foundation (NSF), DMS Computational Mathematics, 2022, 2023
- 3 Engineering and Physical Sciences Research Council (EPSRC), 2021
- 2 Centre Européen de Calcul Atomique et Moléculaire (CECAM), 2021
- 1 French National Research Agency (ANR), 2019

Summer School Organized

- 1 Co-organizer, Brin Mathematics Research Center, “Summer School on Scientific Machine Learning & Benchmarking”, University of Maryland College Park, 8/4/25-8/8/25

Conference/Workshop Organized

- 4 Co-organizer, Brin Mathematics Research Center, “Scientific Machine Learning: Theory and Algorithms”, University of Maryland College Park, 2/21/24-2/23/24
- 3 Co-organizer, NSF-CBMS Conference: Deep Learning and Numerical PDEs, Morgan State University, June 19-23, 2023
- 2 Co-organizer, IMA PI conference, “Workshop on Deep Learning Theory and Applications”, Purdue University, August 2021
- 1 Organizer, Workshop on “High-Dimensional Learning and Computation in Physics”, National University of Singapore, Singapore, June 2019

Minisymposium/Symposium Organized

- 23 Co-chair. Minisymposium on “Advances in Generative Models, Differential Equations, and Inverse Problems”, SIAM Conference on Imaging Science, May 28-31, 2024 in Atlanta, Georgia.
- 22 Co-chair. Minisymposium on “Recent Advances on Machine Learning Methods for Forward and Inverse Problems”, AMS Spring Eastern Sectional Meeting, Howard University, Washington DC, April 6-7, 2024

- 21 Co-chair. Minisymposium on “Numerical Methods and Deep Learning for PDEs”, AMS Spring Southeastern Sectional Meeting at Florida State University in Tallahassee, Florida, March 23-24, 2024
- 20 Co-chair. Minisymposium on “Recent Developments in Numerical Methods for PDEs and Applications”, Joint Mathematics Meetings, San Francisco, CA, January 3-6, 2024
- 19 Co-chair. Minisymposium on “Recent Development of Theory and Algorithms of Scientific Machine Learning”, The International Council for Industrial and Applied Mathematics (ICIAM), Japan, August 2023
- 18 Co-chair. Minisymposium on “Recent Development of Theory and Algorithms of Scientific Machine Learning”, SIAM Southeastern Atlantic Section Annual Meeting (SIAM-SEAS23), Blacksburg, Virginia, March 25-26, 2023
- 17 Co-chair. Minisymposium on “Recent Advances in Scientific Deep Learning”, SIAM Conference on Mathematics of Data Science, September 26-30, 2022, San Diego, USA
- 16 Co-chair. Minisymposium on “Data-Driven Models and Machine Learning Strategies for Complex Dynamical Systems”, SIAM Annual Meeting, July 11-15, 2022, Pittsburgh, Pennsylvania, USA
- 15 Co-chair. Minisymposium on “Mathematical Foundation of Data Science in Scientific Computing”, AMS Sectional Meeting at Purdue University, West Lafayette, IN on March 26-27, 2022
- 14 Co-chair. Minisymposium on “Mathematics of Machine Learning Methods for PDEs”, SIAM Conference on Analysis of Partial Differential Equations, March 14 - 18, 2022. Technische Universität Berlin, Germany
- 13 Co-chair. Minisymposium on “Mathematical foundation of deep learning with the applications to PDE”, 4th Annual Meeting of the SIAM Texas-Louisiana Section, November 5-7, 2021
- 12 Co-chair. Minisymposium on “Machine learning for interatomic potentials”, SIAM Conference on Mathematical Aspects of Materials Science, May 18-22, 2020, Bilbao, Spain
- 11 Co-chair. Minisymposium on “Mathematical Understanding and Applications of Learning with Networks”, SIAM Conference on Mathematics of Data Science, Cincinnati, Ohio, May 7-9, 2020 (canceled due to COVID-19)
- 10 Co-chair. Minisymposium on “Theory and Algorithms for Data Science”, 2020 AMS Spring Sectional Meeting at Purdue University, West Lafayette, IN, April 4-5, 2020 (canceled due to COVID-19)
- 9 Co-chair. Minisymposium on “Machine Learning for Solving PDEs and Inverse Problems”, 2nd Annual Meeting of the SIAM Texas-Louisiana Section, November 2019
- 8 Co-chair. Minisymposium on “Mathematical Theory and Applications of Deep Learning”, The International Council for Industrial and Applied Mathematics (ICIAM), Spain, July 2019
- 7 Co-chair. Minisymposium on “Fast and Accurate Integral Methods for Highly Oscillatory Phenomena”, SIAM Conference on Computational Science and Engineering, 2019
- 6 Co-chair. Minisymposium on “Low-Dimensional Structures in Imaging Science”, SIAM Conference on Imaging Science, 2018
- 5 Co-chair. Minisymposium on “Large-Scale Eigenvalue Problems and Applications”, SIAM Conference on Applied Linear Algebra, 2018
- 4 Co-chair. Minisymposium on “Numerical Linear Algebra in Data Science”, SIAM Annual Meeting, 2017
- 3 Co-chair. Minisymposium on “Hierarchical Structure and Randomness in Linear Algebra”, SIAM Annual Meeting, 2016
- 2 Chair. Minisymposium on “Multidimensional Mode Decomposition and Applications”, SIAM Conference on Imaging Science, 2016.
- 1 Co-chair. Minisymposium on “Structured Matrices and Applications”, SIAM Conference on Applied Linear Algebra, 2015.
