

## Table of Content

A New Energy Management in Dynamic Distribution Reconfiguration with Battery Storage Systems Considering Demand Response Program .....	1
Detection of Transformer Defects in Smart Environment Using Frequency Response Analysis and Artificial Neural Network Based on Data-Driven Systems.....	7
Phase-Shift Fixed-Frequency LCLC Resonant Converter: Analysis of Operational Modes and Mitigation of Parallel Capacitance of Output Diodes.....	13
Measurement-Based Equivalent Model of Distribution Networks Considering Static and Dynamic Loads .....	19
Optimal location of voltage sags monitors by determining the vulnerable area of network buses.....	24
A Predictive Real-Time Short-Term Battery Scheduling Method for Peak Load Shaving in Residential Distributed Energy Storage Systems.....	30
A Delicate Viewpoint in Optimal PMU and Conventional Measurement Placement through MINLP Approach.....	34
Modeling and Nonlinear Controller Design for a DFIG-Based Wind Generation System.....	41
Nonlinear Robust Voltage Regulation and Balanced Demand Response of an Islanded DC Microgrid ...	47
Proposing a new protocol for using device-to-device communications in narrowband IoT-based systems .....	53
Detection and Mitigation of Coordinated False Data Injection Attacks in Frequency Control of Power Grids .....	58
Two-level scenario-based stochastic optimization with the aim of AC/DC smart grids resilience enhancement .....	63
Cooperative utilization of electrical and thermal storage systems for uninterruptible supply of a greenhouse Microgrid .....	69
Dynamic Modeling and Parameter Estimation of a Hydroelectric Distributed Generation Unit by Utilizing a Novel Load Angle Meter .....	75

The left vs right side comparison of the power-voltage characteristics for contributing the photovoltaic units to participate in frequency regulation of the distribution networks .....	81
Economic Load Curve Flattening by EVs Charge and Discharge Scheduling in the Smart Grid Considering Machine Learning-based Forecasted Load .....	86
Probabilistic Optimization of Active and Reactive Power in Smart Grid Considering Vehicle-to-Grid and the Uncertainty of Electricity Price.....	91
Small Hydropower Unit Modeling and Identification for Dynamical Studies Considering Governor System .....	96
Quantum Neural Networks (QNN) Application in Weather Prediction of Smart Grids.....	101
Detection of False Data Injection Attacks Using Cross Wavelet Transform and Machine Learning.....	106
Virtual power plant performance strategy in the DA and RT market under uncertainties .....	111
A Double-Switch Coupled-Inductor Based High Step-Up DC-DC Converter Feasible for Renewable Energies .....	116
Demand Response Application for Residential Prosumers Using Stochastic Optimization.....	121
A Three-Winding Coupled Inductor-Based Voltage Multiplier Cell Integrated DC-DC Converter with Continues Input Current.....	126
Optimal location and size of RESs and FCS in the presence of uncertainties .....	132
Techno-economic analysis of a grid-connected hybrid PV power plant integrated with a crypto currency mining system .....	139
IoT-Shield: A Novel DDoS Detection Approach for IoT-Based Devices .....	145
Optimal Battery Energy Storage Placement in PV-connected Network Considering Uncertainty .....	152
Estimation of Supercapacitor State-of-Power in Vehicular Applications.....	157
Modeling and Fuzzy Predictive Voltage Control of VSC-Based Microgrids.....	162
Asset Management in Smart Grids: A Review .....	169

Simulation and Experimental Validation of An Improved High Step-Up Boost Converter Suitable for Smart Micro-Grids.....	175
Energy Supply in Remote Areas of the Northwest of Iran through Renewable Energy Sources and Using Hydrogen and Water as a Dual Storage System .....	181
A Sensitivity Based Strategy for Wide-Area Voltage Control by Q-Learning.....	187
A 21-Level Boost Inverter with Limited Inrush-Current of Capacitors Suitable for AC Microgrids.....	192
Cyber Attack Detection in PMU Networks Exploiting the Combination of Machine Learning and State Estimation-Based Methods .....	197
Intelligent GPS Spoofing Attack Detection in Power Grids.....	203
Optimal Protection Coordination of Dual-Setting Directional Overcurrent Relays Based on Three-point Coordination Strategy .....	209
Modeling Data Intrusion Attacks on Energy Storage for Vulnerability Assessment of Smart Microgrid Operation .....	215
A Novel Transactive Energy Test System for Coupled Electricity and Gas Markets with Hybrid Loads	220
The Role of Demand Response to Improve Reliability in The Long-Term Incorporating High Penetration of Solar Photovoltaic.....	226
Optimal Allocation of Renewable Energy Resources in the Smart Distribution Network with Considering Impacts of Load variation .....	231
A generalized type-2 fuzzy approach for demand response and uncertainty problems in MGs.....	237
The Role of Conservation Voltage Reduction in Congestion Management of Smart Distribution Networks .....	242
Two-stage photovoltaic system Diagnosis using meteorological information and charting IV Via IoT..	247
Structure and scheduling strategy of a multiple energy system .....	252
A PV Based Multilevel Inverter with Ultra-Capacitor Bank for Microgrid Applications.....	258
Cost comparison of various battery technologies for hybrid energy storage system application in an islanded Microgrid .....	263

SHE-PWM technique in a Cascaded H-Bridge Multilevel Inverter fed by High-Frequency Isolated DC-DC Converter for fuel cell application .....	269
Considering Optimum Tilt Angle Tuning and Reconfiguration of Photovoltaic system (PV) in Maximizing Total Benefits.....	274
Mapping Road to Achieve Smart Grid Applying SGED Model.....	279
Intelligent Microgrid Energy Management System Based on Deep Learning Approach.....	285
Improvement of Frequency Control of Multi-Microgrids in Distribution Networks.....	292
Improving Maximum Power Point Tracking of PV Systems Using a Data-driven PI Control .....	299
Cyber security considerations of 4G mobile networks as a communication service in smart grid.....	305
An Updated Review on Distribution Management Systems within a Smart Grid Structure .....	311
Decentralized Peer-to-Peer Energy Trading for Prosumers Considering Demand Response Program....	316
A Quadratic high gain non-isolated DC-DC converter suitable for renewable applications .....	321
Voltage Sag Monitoring with Limited Measurements Based on Sparse Optimization .....	327
Optimization of Isolated Microgrid in the Presence of Renewable Energy Sources and Demand Response Programs .....	334
Optimum management of energy exchanges in the microgrid electricity market based on blockchain technology.....	339
Large-Consumer Energy Procurement Optimization Using a Hybrid IGDT-Stochastic Approach .....	345
Performance Analysis of Different Optimization Algorithms on Overcurrent Relay Coordination Problem in Distribution Systems.....	350
Hybrid Robust-CVaR optimization of Hybrid AC-DC Microgrid .....	356
Resiliency Assessment in the presence of Multi-Hazard Disasters for Integrated Energy Systems.....	361
Dynamic modeling of Joint Expansion Planning of mesh-designed Distribution Network and storage devices and Capacitors.....	365

An Estimation Based Detection Method for Deception Cyber Attack in AC Microgrids .....	370
Modified Grey Wolf Optimization Method for Voltage and Frequency Control of an Islanded Microgrid .....	375
Optimal Protection Scheme of Micro-Grids Considering N-1 Contingency by A New Hybrid GA-PSO-LP Optimization Algorithm.....	380
Optimal Smart Home Scheduling with Considering Hybrid Resource Management.....	385
Stochastic Correlation Modelling of Renewable Energy Sources for Provision of Ancillary Services using Multi-dimensional Copula Functions.....	391
Distribution network risk assessment in the presence of RES and ESS .....	397
Deep Learning-based Self-scheduling of Virtual Energy Hub Considering Phase Change Material-based Thermal Energy Storage .....	402
