IOT

The 7th International Conference on the
Internet of Things
Linz, Austria, October 22-25, 2017

Important Dates

Paper Submissions:
June 6, 2017

Notifications by:
July 17, 2017

Early Registrations ends:
September 6, 2017

The Internet of Things (IoT) we talk about today is referring to the tight entanglements of real world physical objects and processes, with their digital data representation and computations in data-communication networks - the "cyber". Every industrial or business process can be empowered, and therefore, various industries redesign their business models and processes along the IoT paradigm. To maximize the industrial, economic, social and even cultural benefit of the technology, issues of process and data interoperability, autonomous (machine) learning and decision making, the embedding of cognitive abilities into things, modalities of collective intelligence, securing data and systems, developing open platforms, standardization across technology layers, have to be addressed.

We are looking forward to seeing you in Linz in October 2017!

Conference Chairs

Alois Ferscha
Johannes Kepler University Linz, Austria

Joe Paradiso
MIT Media Lab, USA

Technical Program Chairs

Simon Mayer
Siemens Corporation, USA

Stefan Schneegass
University of Duisburg-Essen, Germany

Program Committee

Mihai Bâce ETH Zurich, CH
Michael Beigl Karlsruhe Institute of Technology, DE
Rahul Bhattacharyya Massachusetts Institute of Technology, USA
Michael Blackstock University of British Columbia, CA
Olivier Boissier ENS Mines Saint-Etienne, FR
Iva Bojic Massachusetts Institute of Technology, USA
Federico Casalegno Massachusetts Institute of Technology, USA
Andrei Ciortea MINES Saint-Étienne, FR
Markus Funk Siemens Corporation, USA
Vaggelis Giannikas University of Cambridge, UK
Jens Grossklags Technical University of Munich, DE
Dominique Guinard EVRYTHNG, UK
Tâm Huynh T-Systems International GmbH, DE
Dan Jiang Philips Research, USA
Stamatis Karnouskos SAP Research, DE
Wolfgang Kastner TU Vienna, AT
Roman Kolcun Imperial College London, UK
Gerd Kortuem TU Delft, NL
Matthias Kovatsch ETH Zurich, CH and Siemens, DE
Mareike Kritzler Siemens Corporation, USA

Sumeet Kumar Massachusetts Institute of Technology, USA
Kai Kunze Keio University, JP
Olivier Liechti HES-SO, CH
Marino Linaje University of Extremadura, ES
Kristof Van Laerhoven University of Siegen, DE
Friedemann Mattern ETH Zurich, CH
Lionel Médini University Lyon 1, LIRIS, FR
Florian Michahelles Siemens Corporation, USA
Michael Mrissa University of Pau and Pays de l'Adour, FR
Jacques Pasquier University of Fribourg, CH
Alexander Pflaum Fraunhofer SCS, DE
Dave Raggett W3C, UK
Till Riedel Karlsruhe Institute of Technology, DE
Gianluca Rizzo HES-SO, CH
Kay Roemer Graz University of Technology, AT
George Shaker University of Waterloo, CA
Ruben Verborgh Ghent University, BE
Joachim Walewski Siemens, DE
Armin Wasicek UC Berkeley, USA
Maarten Weyn University of Antwerp, BE
Felix Wortmann University of St. Gallen, CH
