

Multimedia Appendix 7. The distribution of responses to user preferences in a digital contact tracing tool, similar to Figure 8, but separated into responses from users who gave the overall application a SUS score above (green, above) and below (red, bottom) the usability threshold of 68. Scores of 1 reflect a feature most important to that user, and scores of 5 reflect a feature least important to that user. Markers represent individual responses (jitter has been artificially added to enhance visualization; only discrete integer values were able to be selected).
