Cap Presence & Color Verification

iSight Cap Inspector & Cap Inspector+

iSight Cap Inspector utilizes 1-4 cameras to inspect filled containers for proper cap color, placement and position as well as safety seal integrity. Any container not properly sealed is rejected from the line. If a certain number of bad products are detected, the system will shut down the line until the problem is resolved - saving you time and money.

- Installed by **certified factory personnel.**
- Reliable and validated iSight vision suite ensures **no user programming required**.
- kmV support is the best in the marketplace. Every 20/20 system includes remote support and secure, cloud-based backup to maximize your uptime.
- 24/7 Service Packages available.
- kmV has been engineering **vision inspection solutions since 2003**.
