Try the new Similarity Report!

Preview the redesigned Similarity report with the flexibility to switch between the new and classic experiences. Our new report offers powerful new features and enhancements, including:

- **More insightful integrity checks**
  New intuitive color-coded match categories make the report easier to interpret and pinpoint problematic areas.

- **Faster determination of next steps**
  Enhanced insights help educators quickly discern between intent and teachable moments, allowing for more meaningful feedback.

- **User-friendly interface**
  Enjoy a more streamlined, user-friendly experience with a modern design that includes improved accessibility features.
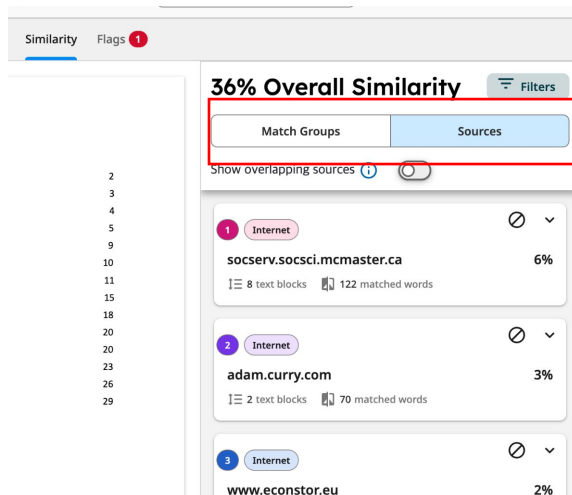

Maybe Later   Try the New Report

There are 2 types of views in the new report:
'Match groups' and 'Sources'

'Match groups' show matches by groups depending on the existence of double quotation marks or citation.
'Sources' show matched sources in the order of high percentage.

You can choose between the two.

Demographic change affects the labour force. The rapid population growth witnessed from the mid-1940s through to the mid-1960s was reflected in rapid labour force growth with a lag of some two decades to allow for the children of the baby boom to reach working age.

The labour force is affected by immigration. Most immigrants to Northern Ireland are of working age so therefore higher levels of immigration can increase the size of the labour force immediately, unlike higher levels of fertility. In the last 10 years immigration has come to be the predominant source of labour force growth through the deluge of Eastern Europeans that came to Northern Ireland and joined the labour force working in a range of sectors from construction and manufacturing to the accommodation and food industry.

If immigration was to keep falling like it has since 2010, labour force growth would soon cease and may in fact turn negative in the next decade as the baby boomers hit retirement.

Labour force participation rate changes are important also. From the early 1950s to the end of the 1980s a major contributor to labour force growth was the strong and sustained increases in female participation rates. However this growth has become stagnant since the 1990s and female participation.

A relevant quote from the lecture was, "The geographical distribution will also change—young populations in regions like Africa and South Asia will increase sharply, while Europe, China, and Japan will age and shrink. In the coming decades, we expect India to surpass China, and Nigeria to surpass the

for health care, those provinces with relatively high ratios may anticipate greater pressures in areas of public budgetary expenditure related to the older population.10 We turn now to the effects of demographic change on the labour force. The rapid population growth from the mid-1940s through the mid-1960s was reflected in rapid labour force growth, with a lag of some two decades to allow for the children of the baby boom to reach working age. There was a similar lag following the baby bust, the children of which first reached working age in the latter part of the 1980s, and that played an important role in the slowing down of labour forc

Additional features: Exclude parts directly from the result

You can exclude parts directly from the result
1) by clicking 'Exclude the text' in your paper or
2) by clicking 'Exclude Match' in each source.

This is useful especially when you have your paper published in a journal and you get a high similarity score because your paper is matched against yours.

*This is not permanently deleting it from Turnitin's databases but only temporarily for this particular result.

Additional features: Undo the exclusion

You can exclude parts directly from the result
1) by clicking 'Exclude the text' in your paper or
2) by clicking 'Exclude Match' in each source.

This is useful especially when you have your paper published in a journal and you get a high similarity score because your paper is matched against yours.

*This is not permanently deleting it from Turnitin's databases but only temporarily for this particular result.
