## Promising Practices in Supporting Success for Indigenous Students

Indigenous peoples are diverse, within and across nations. They have experienced colonisation processes that have undermined Indigenous young people's identity, language and culture. At the same time, Indigenous children have not had access to the same quality of education that other children in their country have had access to. These forces in combination have undermined the educational opportunities and outcomes of successive generations of Indigenous children and young people, at times in remote and rural areas. Canadian provinces and territories that participated in this study (British Columbia, Alberta, Saskatchewan (Australia), are actively seeking to better meet the needs of Indigenous students and their families. The report seeks to identify effective programmes and practices that support improved learning outcomes for Indigenous students and to build an empirical evidence base on Indigenous students in education. The study investigates four areas in Indigenous education: well-being, participation, engagement and achievement in education. These outcomes are inter-connected and mutually reinforcing, and each is essential for the success of every student.

## Illustrated Glossary for Transport Statistics 4th Edition

### International Transport Forum

The Glossary for Transport Statistics was published for the first time in 1994 with the purpose of assisting member countries during the collection of data on transport using the Common Questionnaire developed by the United Nations Economic Commission for Europe, the International Transport Forum and Eurostat. The Glossary is the result of continuing valuable co-operation between these three organisations that – through the action of the Intersecretariat Working Group (IWG.Trans) – have put a sustained effort into meeting the need to harmonise transport statistics at the international level. By following the guidance contained within these definitions, a considerable contribution will be given to the improvement in both the quality and comparability of the data. The present fourth edition of the Glossary is an illustrated version, it includes 7 transport themes (rail, road, inland waterway, pipelines, maritime, aviation and intermodal transport) and comprises 735 definitions. It represents a point of reference for all those involved in transport statistics.

## Education Indicators in Focus

Education Indicators in Focus is a recurring series of briefs that highlight specific indicators in OECD's Education at a Glance that are of particular interest to policy makers and practitioners. They provide a detailed look into current issues in pre-primary, primary and secondary education, higher education, and adult outcomes from a global perspective, and contain an engaging mix of text, tables and charts that describe the international context of the most pressing questions in education policy and practice.
