

JOURNALS

Under PUBLICATIONS, select JOURNALS

Update: Thanks to our subscribers, all 2024 articles in our five Subscribe to Open journals will be published open access.

We publish scientific and research literature of the highest quality at the lowest sustainable prices, covering mathematics and other selected fields. Our outstanding editorial boards and highly selective peer-review workflows guarantee the impact of the articles we publish.

The best presentation

Top-level research deserves top-level production: we provide the highest quality of mathematically literate copyediting in the industry. Please read a few testimonials from our satisfied authors.

We can notify you

We can let you know when we publish a new article that fits your interests. Click [here](#) to sign up for our PubliCast™ service.

Algebra & Number Theory [S20](#)

msp.org/ant >

ANT's broad definition of algebra and number theory allows it to print high-quality research covering a wide range of subtopics, including algebraic and arithmetic geometry. *ANT* publishes high-quality articles of interest to a broad readership, at a level surpassing all but the top four or five mathematics journals.

Subscribe to Open: Beginning with 2023, *ANT* is adopting the [Subscribe to Open](#) model: each year, if enough subscribers continue to support the journal, that year's articles will be published open access — free to read by everyone and with no author charges. The [Subscribe to Open](#) model is further explained [here](#). We're excited to have found an equitable open-access model that makes sense for mathematics.

Update: Thanks to our subscribers, all 2024 articles in *ANT* will be published open access.

Algebraic & Geometric Topology [S20](#)

msp.org/agt >

AGT publishes papers in all areas of algebraic and geometric topology. Founded in 2001, *AGT* is now a prominent journal in its field, its high standards and rigorous editorial process attracting an ever-increasing number of excellent submissions. *AGT* has an impact factor regularly placing in the top third of all journals.

OPEN ACCESS

Selected volume and issue

CONTENTS

- On the ordinary Hecke orbit conjecture* **847–898**
Pol van Hoften
- Locally analytic vector bundles on the Fargues–Fontaine curve* **899–946**
Gal Porat
- Multiplicity structure of the arc space of a fat point* **947–967**
Rida Ait El Manssour and Gleb Pogudin
- Theta correspondence and simple factors in global Arthur parameters* **969–991**
Chenyang Wu
- Equidistribution theorems for holomorphic Siegel cusp forms of general degree: the level aspect* **993–1038**
Henry H. Kim, Satoshi Wakatsuki and Takuya Yamauchi
