Message from the Chairs

Welcome to the proceedings of the 2014 Chinese Conference on Pattern Recognition (CCPR 2012) held in Changsha. CCPR 2014 was the sixth in the series, following CCPR 2007 (Beijing), CCPR 2008 (Beijing), CCPR 2009 (Nanjing), CCPR 2010 (Chongqing), and CCPR 2012 (Beijing). From 2012, CCPR is held every other year, to be alternated with the Asian Conference on Pattern Recognition (ACPR), which started in 2011.

In recent years, pattern recognition has increasingly become an enabling technology for many important and often mission-critical applications such as intelligent machines, data mining, business intelligence, Internet content search, public security monitoring, etc. The emergence of big data has triggered enormous demands on pattern recognition technology. The aim of the CCPR conference is to provide a forum for scientific exchange and presentation for pattern recognition researchers in China. CCPR started in 2007 but it can be dated back to the former editions in 1980s. In China, pattern recognition research commenced in the beginning of the 1970s. The China Association for Automation organized seven editions of the National Conference on Pattern Recognition and Machine Intelligence in the 1980s.

As in the previous CCPR events, CCPR 2014 received regular submissions and it invited internationally renowned researchers to give keynote speeches. The proceedings of CCPR 2014 are published by Springer in the Communications in Computer and Information Science (CCIS) series. We received 216 full submissions. Each submission was reviewed by three reviewers selected from the Program Committee and other qualified researchers. Based on the reviewers' reports, 112 papers were accepted for presentation at the conference, covering diverse fields, with 14 in pattern recognition fundamentals, 14 in feature extraction and classification, 21 in computer vision, 20 in image processing and analysis, seven in video processing and analysis, ten in biometric and action recognition, seven in biomedical image analysis, nine in document and speech analysis, and ten in pattern recognition applications.

We are grateful to the keynote speakers, Prof. Bo Zhang of Tsinghua University, Prof. Jón Atli Benediktsson of University of Iceland, Prof. Chris H.Q. Ding of the University of Texas at Arlington, and Prof. Zhi-Hua Zhou of Nanjing University. Thanks are due to the authors of all submitted papers, the Program Committee members and the reviewers, and the staff of the Organizing

VI Message from the Chairs

Committee. Without their contributions, this conference would not have been a success. We are also grateful to Springer for publishing the proceedings, and especially to Ms. Celine (Lanlan) Chang of Springer Asia for her efforts in coordinating the publication.

Table of Contents – Part II

Section IV: Image Processing and Analysis	
Transferring Segmentation from Image to Image via Contextual Sparse Representation	1
Fast Augmented Lagrangian Method for Image Smoothing with Hyper-Laplacian Gradient Prior	12
Study on Distribution Coefficient in Regulation Services with Energy Storage System	22
All-Focused Light Field Image Rendering	32
Hyperspectral Image Unmixing Based on Sparse and Minimum Volume Constrained Nonnegative Matrix Factorization	44
An Adaptive Harris Corner Detection Algorithm for Image Mosaic Haixia Pan, Yanxiang Zhang, Chunlong Li, and Huafeng Wang	53
A Study of Ancient Ceramics Verification Based on Vision Methods Yunqi Tang, Jianwei Ding, and Wei Guo	63
A Two-Stage Blind Image Color Correction Using Color Cast Estimation	72
Encoding Optimization Using Nearest Neighbor Descriptor	81
Multi-modal Image Fusion with KNN Matting	89
A Two-Step Adaptive Descreening Method for Scanned Halftone Image	97

Compressive Sensing Multi-focus Image Fusion Fang Cheng, Bin Yang, and Zhiwei Huang	107
Pan-Sharpening Based on Improvement of Panchromatic Image to Minimize Spectral Distortion	117
Combining SIFT and Individual Entropy Correlation Coefficient for Image Registration	128
Spectral Fidelity Analysis of Compressed Sensing Reconstruction Hyperspectral Remote Sensing Image Based on Wavelet Transformation	138
A Fast Algorithm for Image Defogging	149
A New Image Structural Similarity Metric Based on K-L Transform Cheng Jiang, Fen Xiao, and Xiaobo He	159
A New Restoration Algorithm for Single Image Defogging Fan Guo, Hui Peng, and Jin Tang	169
An Improved Laparoscopic Image Registration Algorithm Based on Sift	179
Application of Image Processing Techniques in Infrared Detection of Faulty Insulators	189
Section V: Video Processing and Analysis	
Finding the Accurate Natural Contour of Non-rigid Objects in Video Gaoxuan Ying, Sheng Liu, and Yiting Jin	199
An Improved Multipitch Tracking Algorithm with Empirical Mode Decomposition	209
Robust Appearance Learning for Object Tracking in Challenging	218
Scenes	41 0

Table of Contents – Part II	XV
Vehicle Recognition for Surveillance Video Using Sparse Coding Shirong Zeng, Xin Niu, and Yong Dou	228
Video Smoke Detection Based on the Optical Properties Yingjing Wu and Ying Hu	235
Discovery of the Topical Object in Commercial Video: A Sparse Coding Method	245
Study the Moving Objects Extraction and Tracking Used the Moving Blobs Method in Fisheye Image	255
Section VI: Biometric and Action Recognition	
A Non-negative Low Rank and Sparse Model for Action Recognition Biyun Sheng, Wankou Yang, Baochang Zhang, and Changyin Sun	266
Extreme Learning Machine Based Hand Posture Recognition in Color-Depth Image	276
Real-Time Human Detection Based on Optimized Integrated Channel Features	286
Facial Feature Extraction Based on Robust PCA and Histogram \dots $Xiao\ Luan\ and\ Weisheng\ Li$	296
Multimodal Finger Feature Fusion and Recognition Based on Delaunay Triangular Granulation	303
Robust Face Recognition via Facial Disguise Learning	311
A Static Hand Gesture Recognition Algorithm Based on Krawtchouk Moments	321
Face Recognition in the Wild by Mining Frequent Feature Itemset Yuzhuo Wang, Hong Cheng, Yali Zheng, and Lu Yang	331
Single-Sample Face Recognition via Fusion Variant Dictionary Ying Tai, Jian Yang, Jianjun Qian, and Yu Chen	341

pervised Kernel Construction for Unsupervised PCA on Face ecognition
Yang Zhao, Wen-Sheng Chen, Binbin Pan, and Bo Chen
ection VII: Biomedical Image Analysis
dedical Image Clustering Based on Improved Particle Swarm ptimization and Expectation Maximization Algorithm
redical Image Fusion by Combining Nonsubsampled Contourlet ransform and Sparse Representation
utomated Segmentation and Tracking of SAM Cells
utomatic Estimation of Muscle Thickness in Ultrasound Images Based a Revoting Hough Transform (RVHT)
fluence of Scan Duration on the Reliability of Resting-State fMRI egional Homogeneity
Global Eigenvalue-Driven Balanced Deconvolution Approach for etwork Direct-Coupling Analysis
equence-Based Prediction of Protein-Protein Binding Residues in lpha-Helical Membrane Proteins
ection VIII: Document and Speech Analysis
obust Voice Activity Detection Using the Combination of Short-Term and Long-Term Spectral Patterns
peech Emotion Recognition Based on Coiflet Wavelet Packet Cepstral peefficients
ext Detection in Natural Scene Images Leveraging Context formation

Adaptive Local Receptive Field Convolutional Neural Networks for Handwritten Chinese Character Recognition	
Li Chen, Chunpeng Wu, Wei Fan, Jun Sun, and Naoi Satoshi	
Character Segmentation for Classical Mongolian Words in Historical Documents	
Xiangdong Su, Guanglai Gao, Weihua Wang, Feilong Bao, and Hongxi Wei	
MCDF Based On-Line Handwritten Character Recognition for Total Uyghur Character Forms	
Natural Scene Text Image Compression Using JPEG2000	
ROI Coding	
Off-Line Uyghur Handwritten Signature Verification Based on Combined Features	
Off-Line Signature Verification Based on Local Structural Pattern Distribution Features	
Section IX: Pattern Recognition Applications	
Coordination of Electric Vehicles Charging to Maximize Economic	
Benefits	
Traffic Sign Recognition Using Perturbation Method Linlin Huang and Fei Yin	
A Novel Two-Stage Multi-objective Ant Colony Optimization Approach for Epistasis Learning	
Hydraulic Excavators Recognition Based on Inverse "V" Feature of Mechanical Arm	
Real-Time Traffic Sign Detection via Color Probability Model and Integral Channel Features	

XVIII Table of Contents – Part II

Study of Charging Station Short-Term Load Forecast Based on Wavelet Neural Networks for Electric Buses	555
The Layout Optimization of Charging Stations for Electric Vehicles Based on the Chaos Particle Swarm Algorithm	565
An Improved Feature Weighted Fuzzy Clustering Algorithm with Its Application in Short-Term Prediction of Wind Power	575
Charging Load Forecasting for Electric Vehicles Based on Fuzzy Inference Jingwei Yang, Diansheng Luo, Shuang Yang, and Shiyu Hu	585
Security Event Classification Method for Fiber-optic Perimeter Security System Based on Optimized Incremental Support Vector Machine Lu Liu, Wei Sun, Yan Zhou, Yuan Li, Jun Zheng, and Botao Ren	595
Author Index	605

Table of Contents – Part I

Section I: Fundamentals of Pattern Recognition	
A Nonlinear Classifier Based on Factorization Machines Model	1
Training Deep Belief Network with Sparse Hidden Units Zhen Hu, Wenzheng Hu, and Changshui Zhang	11
The Research of Matching Area Selection Criterion for Gravity Gradient Aided Navigation	21
A Manifold Learning Fusion Algorithm Based on Distance and Angle Preservation	31
Application of Modified Teaching-Learning Algorithm in Coordination Optimization of TCSC and SVC	44
Multi-task Sparse Gaussian Processes with Improved Multi-task Sparsity Regularization	54
Short-Term Load Forecasting of LSSVM Based on Improved PSO Algorithm	63
Blob Detection with the Determinant of the Hessian	72
A Study on Layer Connection Strategies in Stacked Convolutional Deep Belief Networks	81
Fault Diagnosis for Distribution Networks Based on Fuzzy Information Fusion	91
Kernel-Distance Target Alignment	101

XX

Table of Contents – Part I	XXI
An Improved Multi-label Classification Ensemble Learning Algorithm	243
An Improved Sparse Representation De-noising for Keeping Structural Features	253
A SVM Method Trained by Improved Particle Swarm Optimization for Image Classification	263
Sparsity Based Feature Extraction for Kernel Minimum Squared Error	273
Section III: Computer Vision	
Saliency Detection Based on Spread Pattern and Manifold Ranking Yan Huang, Keren Fu, Lixiu Yao, Qiang Wu, and Jie Yang	283
A Structural Constraint Based Dual Camera Model	293
Hough Voting with Distinctive Mid-Level Parts for Object Detection Xiaoqin Kuang, Nong Sang, Feifei Chen, Runmin Wang, and Changxin Gao	305
A Segmentation Based Change Detection Method for High Resolution Remote Sensing Image	314
Eye Localization Based on Multi-Channel Correlation Filter Bank Rui Yang, Shiming Ge, Kaixuan Xie, and Shuixian Chen	325
Person Re-identification by Cascade-Iterative Ranking	335
Stereo Camera Based Real-Time Local Path-Planning for Mobile Robots	345
A Tracking Method with Structural Local Mean and Local Standard Deviation Appearance Model	355
Hough-RANSAC: A Fast and Robust Method for Rejecting Mismatches	363
Hongxia Gao, Jianhe Xie, Yueming Hu, and Ze Yang	909

Partial Static Objects Based Scan Registration on the Campus	371
Quasi-Orthorectified Panorama Generation Based on Affine Model from Terrain UAV Images	381
Shape Recognition by Combining Contour and Skeleton into a Mid-Level Representation	391
Visual Texture Perception with Feature Learning Models and Deep Architectures	401
Objects Detection Method by Learning Lifted Wavelet Filters Aireti Abulikemu, Aliya Yushan, Turghunjan Abdukirim Turki, and Abdurusul Osman	411
A Fast Straight-Line Growing Algorithm for Sheet-Counting with Stacked-Paper Images	418
Automatic Labanotation Generation Based on Human Motion Capture Data	426
Self-organizing Map-Based Object Tracking with Saliency Map and K-Means Segmentation	436
Superpixel-Based Global Optimization Method for Stereo Disparity Estimation	445
Two-Stage Saliency Detection Based on Continuous CRF and Sparse Coding	455
Continuous Energy Minimization Based Multi-target Tracking Zhe Shi, Songhao Zhu, Wei Sun, and Baoyun Wang	464
Author Index	475
