

Kaspersky Corporate Kit

kaspersky

Updated: August 2024

Our mission is simple — building a safer world.

We do that by becoming the global leader in cybersecurity. By securing technology we ensure that it stays free of cyberthreats — providing nothing but positive possibilities for everyone.

**Bring on endless possibilities.
Bring on a safer tomorrow.**

Eugene Kaspersky, CEO

Our key values that drive our work

Be there for you

We'll always be there for you, for our customers, partners, prospects & colleagues. We **never lose sight of the people** we build our solutions for.

Be committed experts

Through our **recognized technology expertise**, we are committed to providing **trust, safety and confidence**. We never give up on our mission to make the digital world a safer place. And on this duty we always play fair.

Be cleverly inventive

Focused and ready to act – we share cutting-edge information with customers, partners, colleagues and prospects to keep them ahead of the curve.

Be powered by challenges

We constantly challenge ourselves and the status quo to **do what others can't**. We deliver outstanding solutions to overcome obstacles of all kinds, and **this is proven** across our more than 25-year history.

Global Transparency Initiative

- Key transparency principles
- Global Transparency Initiative pillars
- Independent assessments and certifications
- Bug Bounty Program

Our key transparency principles

Data sent to Kaspersky is crucial for protecting users, it is robustly secured and is not attributed to a specific individual.

We detect and neutralize threats, regardless of their origin or purpose.

We work with international organizations to fight cybercrime.

We are committed to the trustworthy development of our technologies and solutions.

We cooperate with the IT security industry in joint cybercrime investigations.

Global Transparency Initiative pillars

Launched in 2017, Kaspersky's Global Transparency Initiative is aimed at engaging the broader information security community and other stakeholders in validating and verifying the trustworthiness of our products, internal processes, and business operations.

It includes a number of actionable and concrete measures:

Cyberthreat-related data infrastructure relocation to Switzerland.

Creation of a global network of Transparency Centers in some regions, where Kaspersky's trusted partners and government stakeholders can review the company's code, software updates and threat detection rules.

Third-party security assessments of Kaspersky's engineering and data management practices verify the security of the company's solutions.

Global Transparency Initiative pillars

It includes a number of actionable and concrete measures:

Vulnerability management program, under which security researchers can report vulnerabilities or bugs found in our systems for a designated reward.

Transparency reports, in which we publicly share information about the number of requests for user data and technical expertise.

Cyber Capacity Building Program – dedicated training to share security evaluation knowledge with the broader community.

Kaspersky Global Transparency Initiative

Cyberthreat-related user data storage and processing

Malicious and suspicious files received from users of Kaspersky products in Europe, North and Latin America, the Middle East, and also countries in Asia-Pacific region are processed and stored in Switzerland.

Transparency Centers

A facility for customers, partners and government stakeholders to review the company's code, software updates and threat detection rules, along with other activities.

Independent reviews

Regular third-party assessment of internal processes to confirm the security of Kaspersky's processes and systems, including:

- Regular SOC 2 audits
- ISO 27001 certifications for the company's data systems

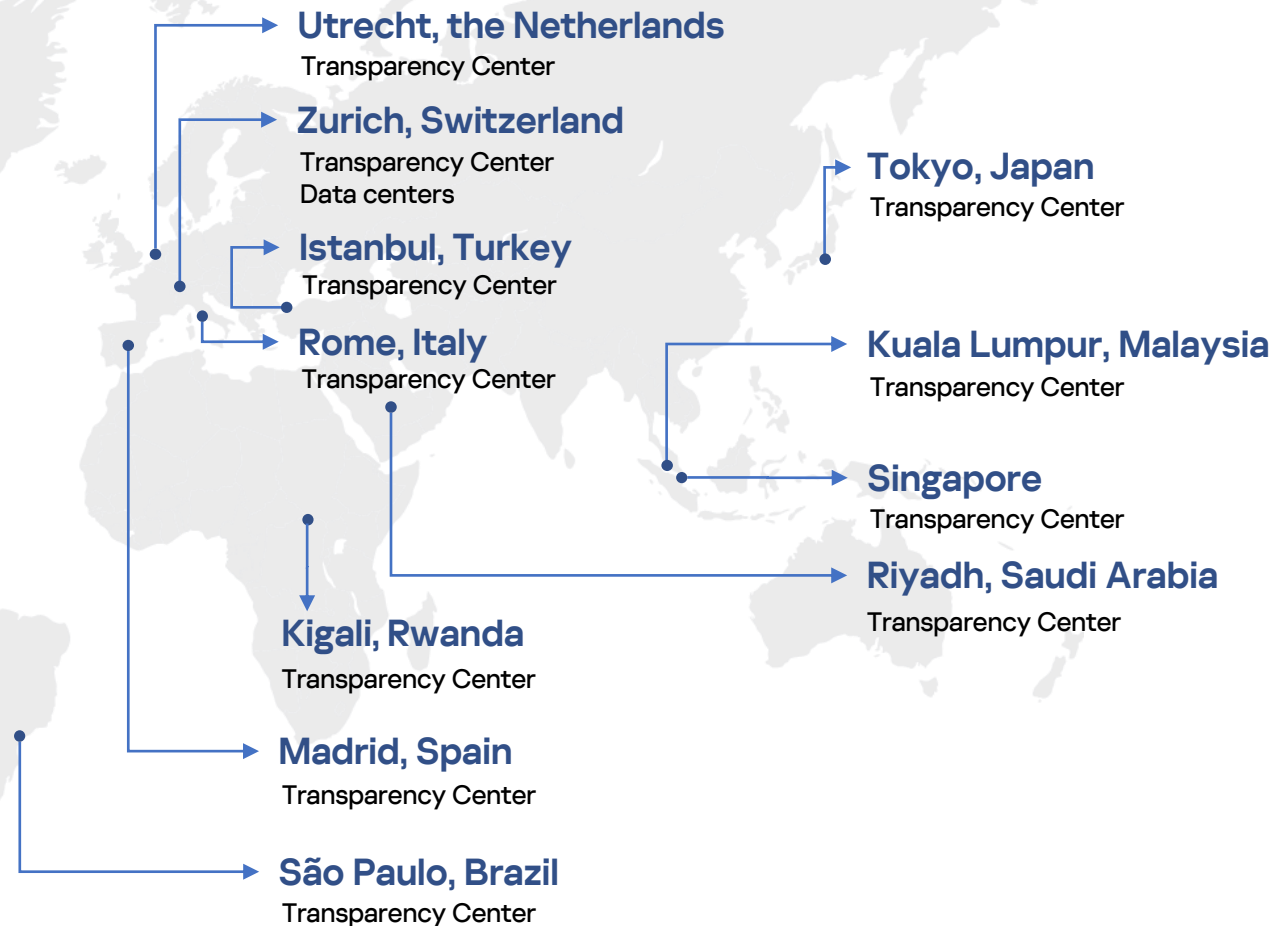

Bug bounty program

Increased bug bounties up to \$100k for the most critical vulnerabilities aim to engage security researchers to supplement the company's own work in ensuring the security of its solutions.

Transparency reports

Regular updates on how Kaspersky responds to requests from government and law enforcement agencies as well as to personal data-related requests from its own users.

Kaspersky Transparency Centers

Review options:

Blue Piste (both remote & physical)

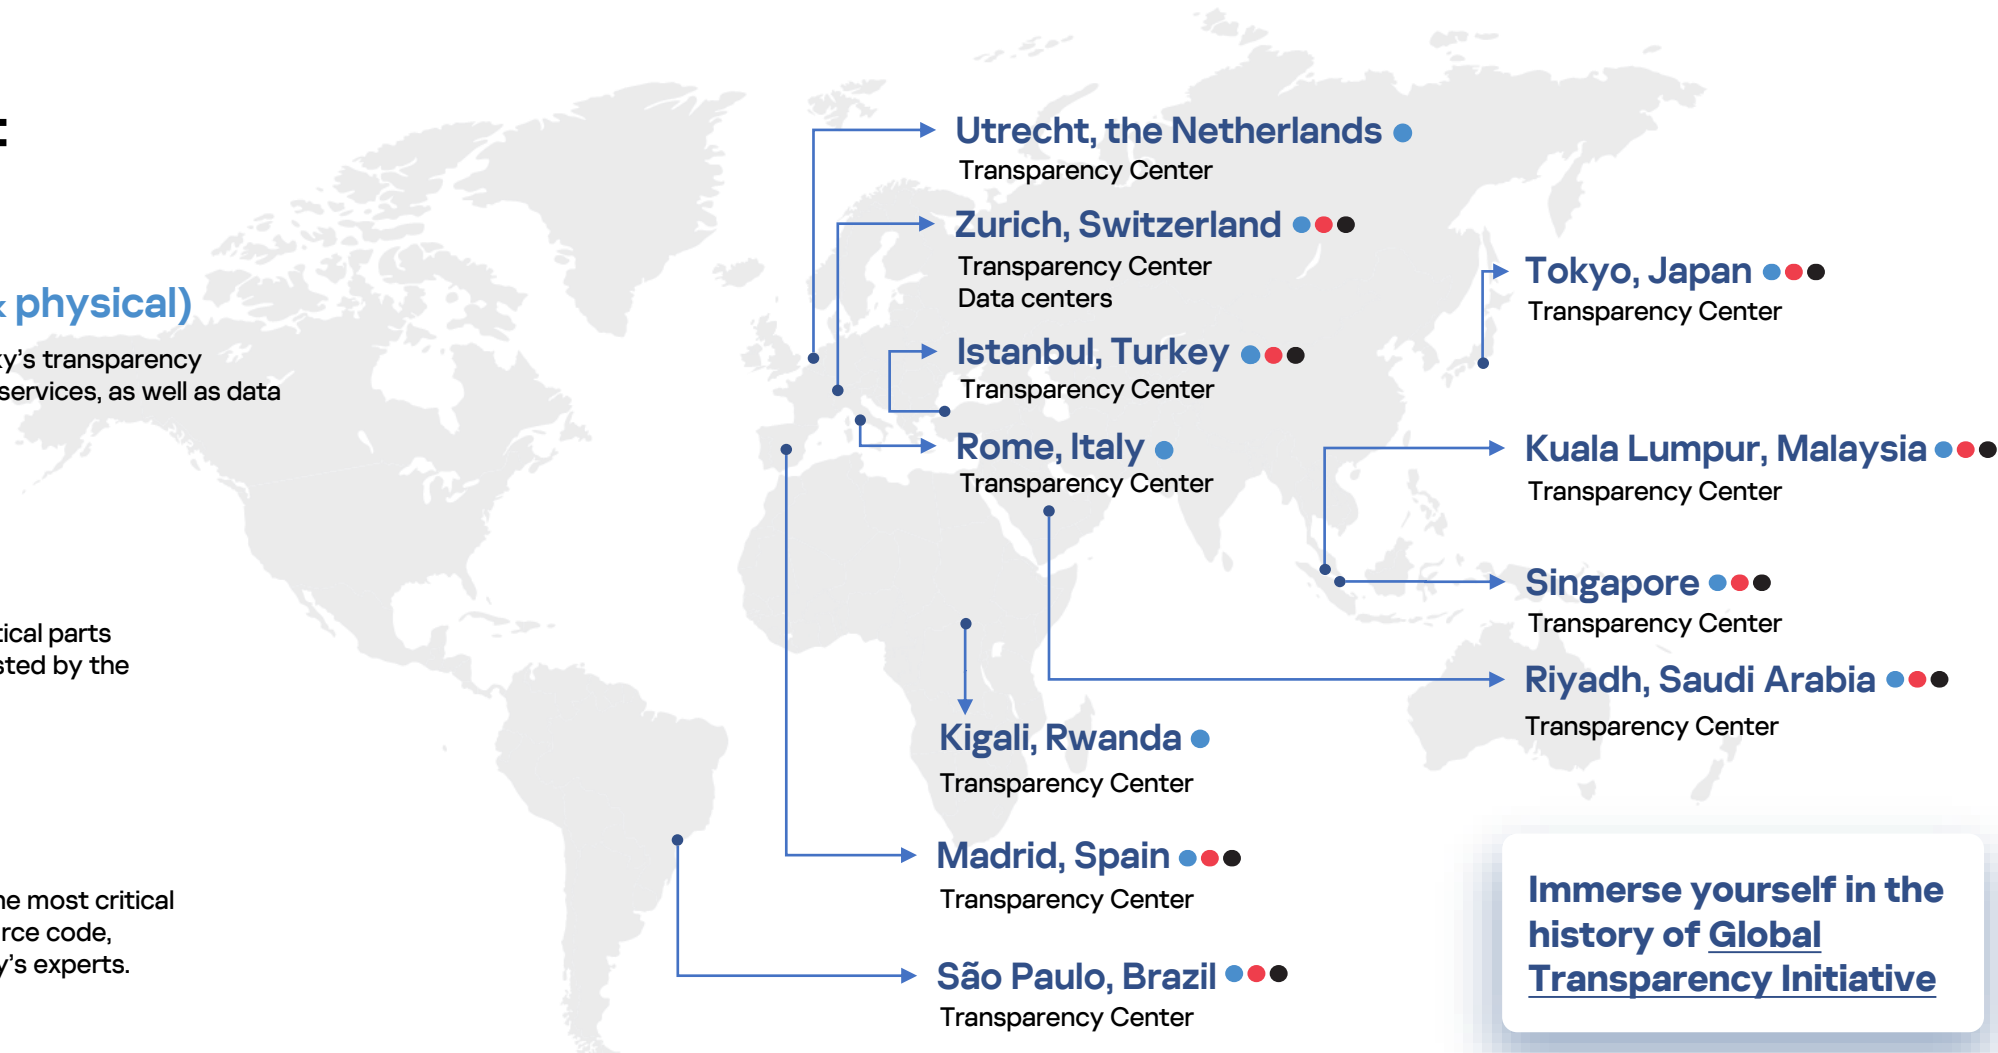

An overview of Kaspersky's transparency practices, products and services, as well as data management practices.

Red Piste

A review of the most critical parts of the source code, assisted by the company's experts.

Black Piste

The deepest review of the most critical parts of Kaspersky's source code, assisted by the company's experts.

Immerse yourself in the history of Global Transparency Initiative

Kaspersky Global Transparency Initiative: our results in numbers

in Switzerland: globally known as a neutral country, it contains strict data protection regulation.

Here we process and store cyberthreat-related user data from Europe, North and Latin America, the Middle East, and several countries in Asia-Pacific region.

in Brazil, Italy, Japan, Malaysia, the Netherlands, Singapore, Rwanda, Spain, Switzerland, Saudi Arabia, and Turkey.

confirming the trustworthiness of Kaspersky's engineering practices::

- SOC 2 audit
- ISO 27001 certification

Since 2018, Kaspersky has invested over \$8.4 million in the program, which includes \$5.6 million for equipment for the data centers in Zurich.

by public and private stakeholders

with total payments equal to \$81,750

Independent assessments and certifications

SOC

The Service Organization Controls (SOC) Reporting Framework, a globally recognized report for cybersecurity risk management controls, was developed by the American Institute of Certified Public Accountants (AICPA).

Kaspersky successfully passed a comprehensive SOC 2 Type 2 audit in 2023.

[Learn more](#)

ISO/IEC 27001

The most widely used information security standard prepared and published by the International Organization for Standardization (ISO), the world's largest developer of voluntary international standards. Kaspersky's information security management system has been certified against ISO/IEC 27001:2013 international standard.

[Learn more](#)

Bug Bounty Program

Kaspersky is committed to the principles of [ethical vulnerability disclosure approach](#). To ensure the integrity of our products, Kaspersky has been running its public bug bounty program since 2016, and since 2022, it operates on the [Yogosha platform](#). The company also supports the Disclose.io framework, which provides a “Safe Harbor” for vulnerability researchers concerned about the negative legal consequences of their discoveries.

Rewards

\$100,000

for the discovery and coordinated disclosure of severe vulnerabilities (high-quality reports with PoC).

\$5,000 – \$20,000

for the discovery of vulnerabilities allowing different and less severe types of remote code execution.

\$1,000 – \$5,000

for the discovery of bugs allowing local privilege escalation, or leading to sensitive data disclosure.

Advanced persistent threat landscape in 2023

Kaspersky's Global Research and Analysis Team (GReAT) is well-known for the discovery and analysis of the most advanced cyberthreats. According to their data, in 2023 the top targets for advanced persistent threats (APT) were governments, and the most significant threat actor was Lazarus.

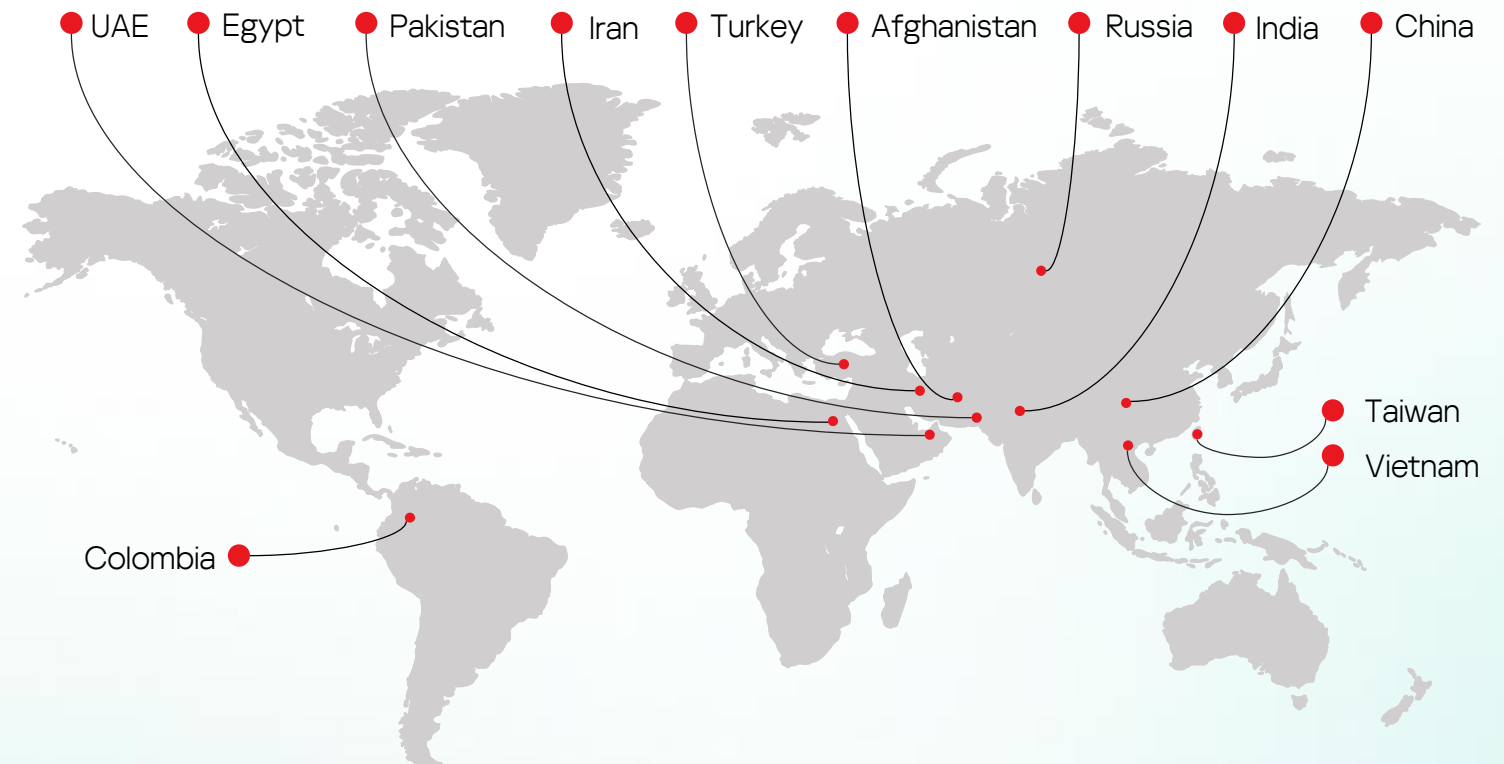

Top 10 targets

Classification	Data wiping campaign	Cyber-espionage malware	Cyber-espionage malware	Cyber-espionage platform	Cyber-espionage platform	Cyber-espionage platform	Cyber-espionage platform	APT campaign
Description	A wiper pretending to be ransomware, using modified EternalBlue and EternalRomance exploits. Some observations point to a link between ExpPetr and BlackEnergy APT	An advanced threat actor that hit organizers, suppliers and partners of the Winter Olympic Games in Pyeongchang, South Korea, with a destructive network worm. The deceptive behavior of this actor is an excessive use of various false flags	As a result of a sophisticated supply chain attack on the popular computer vendor's software update system, the malware disguised as a software update was distributed to about 1 million Windows computers and signed using a legitimate certificate	A technically sophisticated APT framework designed for extensive cyberespionage. Features around 80 malicious modules and includes functionality never before seen in an advanced persistent threat, such as the ability to steal information from printer queues and to grab previously seen files from a USB device the next time it reconnects	A multi-stage, modular framework aimed at espionage and data gathering. It is leveraging a UEFI bootkit based on Hacking Team's leaked source code for persistence. Capable of communicating and fetching payloads over multiple, covert channels.	A stealthy, sophisticated multi-stage malware framework incorporating Windows kernel mode rootkit. It's deployed via the ProxyLogon only days following the vulnerability disclosure.	A highly sophisticated, complex UEFI firmware rootkit we attributed to APT41, which allows the attackers to persistently execute a malware stager on the operating system via a malicious driver.	The targets are infected using zero-click exploits via the iMessage platform, and the malware runs with root privileges, gaining complete control over the device and user data. The targets are infected using zero-click exploits via the iMessage platform, and the malware runs with root privileges, gaining complete control over the device and user data.
Targets	Spread around the world, primarily targeting businesses in Ukraine, Russia and Western Europe. >50% of organizations attacked were industrial companies	Organizations related to Winter Olympic Games 2018; biological and chemical threat prevention organizations in the EU, financial institutions in Russia	Banking and financial industry, software, media, energy and utilities, insurance, industrial and construction, manufacturing, and other industries	Special instructions in malware code were aimed at targeting only 600 systems, identified by specific MAC addresses	Diplomatic entities with possible affiliation to DPRK	Government organizations and Telecommunication companies	Holding companies and industrial suppliers	iOS devices

Enabling a privacy-minded world

Privacy has become a valuable commodity as more and more users understand its importance and the need to change their habits to protect their digital presence. Being not just a cybersecurity firm, but a privacy company, Kaspersky invests in features that enable users to protect their data and digital privacy through educational assets and hands-on tools.

Kaspersky Cyber Immunity

Kaspersky's approach and methodology for developing secure-by-design cyber-physical systems

- The architectural approach creates an environment where a vulnerability or bad code is no longer a big deal
- Methodology, technologies and tools for creating Cyber Immune solutions
- **KasperskyOS** – an optimal platform for building Cyber Immune cyber-physical systems

The overwhelming majority of attacks on a Cyber Immune system are the types that cannot impact its critical function

Kaspersky Cyber Immunity areas of application

KasperskyOS-based Cyber Immune solutions have an “innate” protection against the consequences of the intrusion of malicious code and hacker attacks.

They perform functions even in an aggressive environment without additional security features.

IoT & Industrial IoT

Smart cities

Thin client infrastructure

Transportation

Professional mobile devices

KasperskyOS is an effective platform to create Cyber Immune products

Microkernel operating system for cyber-physical systems with high cybersecurity demands

- Grants a platform for creating secure-by-design solutions
- Creates an environment that does not allow apps to execute undeclared functions and prevents the exploitation of vulnerabilities
- Provides full transparency, flexible configuration of security policies and control over interactions across the whole system

KasperskyOS-based product portfolio

Tests/Reviews

93

First Places

94%

Top 3

As cybersecurity becomes vital to every individual and entity, trust in providers is essential. We protect home users and corporate clients worldwide, and market recognition is very important for us. In 2023, Kaspersky products participated in 100 independent tests and reviews. Our products were awarded 93 firsts and received 94 top-three finishes.

*100 independent tests and reviews were completed by Kaspersky products in 2023 along other participating vendor products. More than 90 vendors took part in the test in 2023, but only 10 participated in 35% or more of the tests, and were represented in the chart. Additionally, we considered valuable to have another 5 vendors' results represented in the chart.

Recognitions

Kaspersky products are regularly assessed by global research firms, and our cyber protection expertise is proven by the number of recognitions by key industrial analysts and peer review companies.

Among those are IDC, Canals, ISG, Quadrant Knowledge Solutions, Info-Tech, and many others.

In 2023, Kaspersky was [noted](#) as the vendor “who shaped the year” in IDC's Worldwide Modern Endpoint Security Market Shares report.*

Kaspersky was named a Major Player in the 2024 IDC MarketScape: Modern Endpoint Security vendor assessments for Enterprises, Midsize Businesses, and Small Businesses.

ESG

Our company's mission is to build a safe and sustainable digital world so that people can use technological solutions to improve not only their daily lives but also life on the planet as a whole.

We fulfill this mission by increasing the resilience of the digital space against threats through the creation of Cyber Immunity while paying special attention to social projects and environmental awareness.

Read our latest Sustainability (ESG) report covering results for the second half of 2022 and 2023 as well as key objectives for 2024 [here](#).

ESG strategic development

Kaspersky's sustainable development is grounded in five key areas

1

Ethics and transparency

- Source code and process transparency
- Data protection and the right to privacy
- Management transparency and business resilience

2

Safer cyberworld

- Critical infrastructure protection
- Assistance in the investigation of cybercrimes on a global level
- Protection of users against cyberthreats

3

Safer planet

- Reducing the environmental impact of our infrastructure, business activities and products

4

People empowerment

- Employee care
- Women in STEM
- Inclusivity and availability of technologies
- Talent development in IT

5

Future tech

- Cyber Immunity for new technologies

Learn more about our main accomplishments [here](#).

Education

Despite the rapid development of technology, the human factor still plays a significant role in building a safer digital world. This is why Kaspersky aims to educate people of all ages and professions all around the world about cybersecurity, and create a life-long learning journey for passionate cybersecurity experts.

connectivity delivers key benefits

- More advanced IPGs connect and communicate with smartphones or tablets over Bluetooth, with apps for clinicians and patients – easier to use and enable better treatment
- Firmware can be updated over the air, with new features or bug patches
- Growing tension between usability, safety and security. For example, implants need to have a software backdoor and override capability in case of a medical emergency. This makes them safer, but more insecure
