

NEURAL INFORMATION PROCESSING SYSTEMS

MONTREAL, CA
DEC 3 - 9, 2018

CONFERENCE AT A GLANCE

MONDAY DECEMBER 3RD

8:30 - 10:30 AM	Tutorials Session 1
10:30 - 11:00 AM	Coffee break
11:00 - 1:00 PM	Tutorials Session 2
1:00 - 2:30 PM	Lunch on your own
2:30 - 4:30 PM	Tutorials Session 3
4:30 - 5:00 PM	Coffee break
5:00 - 5:30 PM	Opening Remarks
5:30 - 6:20 AM	Invited talk, Laura Gomez: <i>The Necessity of Diversity and Inclusivity in Tech</i>
6:30 - 8:30 PM	Opening Reception

TUESDAY DECEMBER 4TH

8:30 - 9:20 AM	Invited talk, Edward W Felten: <i>Machine Learning Meets Public Policy: What to Expect and How to Cope</i>
9:20 - 9:40 AM	Test Of Time Award: Leon Bottou, Olivier Bousquet <i>The Tradeoffs of Large-Scale Learning (2007)</i>
9:40 - 10:05 AM	Coffee break
10:05 - 10:45 PM	Parallel Tracks
10:45 - 12:45 PM	Posters A and Demonstrations
12:45 - 2:15 PM	Lunch on your own
1:15 - 2:15 PM	Town Hall Meeting, Room 517 CD
2:15 - 3:05 PM	Invited talk, Michael Levin: <i>What Bodies Think About: Bioelectric Computation Outside the Nervous System, Primitive Cognition and Synthetic Morphology</i>
3:05 - 3:30 PM	Coffee break
3:30 - 5:00 PM	Parallel Tracks
5:00 - 7:30 PM	Posters B and Demonstrations

WEDNESDAY DECEMBER 5TH

8:30 - 9:20 AM	Invited talk, Joelle Pineau: <i>Reproducible, Reusable, and Robust Reinforcement Learning</i>
9:20 - 9:45 AM	Coffee break
9:45 - 10:45 PM	Parallel Tracks
10:45 - 12:45 PM	Posters A and Demonstrations
12:45 - 2:15 PM	Lunch on your own
2:15 - 3:05 PM	Invited talk, Ayanna Howard: <i>Investigations into the Human-AI Trust Phenomenon</i>
3:05 - 3:30 PM	Coffee break
3:30 - 5:00 PM	Parallel Tracks
5:00 - 7:30 PM	Posters B and Demonstrations

THURSDAY DECEMBER 6TH

8:30 - 9:20 AM	Invited talk, David Spiegelhalter: <i>Making Algorithms Trustworthy: What Can Statistical Science Contribute to Transparency, Explanation and Validation?</i>
9:20 - 9:45 AM	Coffee break
9:45 - 10:45 AM	Parallel Tracks
10:45 - 12:45 PM	Posters A
12:45 - 2:15 PM	Lunch on your own
2:15 - 3:05 PM	Invited talk, Kunle Olukotun: <i>Designing Computer Systems for Software 2.0</i>
3:05 - 3:30 PM	Coffee break
3:30 - 5:00 PM	Parallel Tracks
5:00 - 7:30 PM	Posters B

FRIDAY & SATURDAY DECEMBER 7TH & 8TH

Each workshop has its own schedule, check the website	
8:00 - 6:30 PM	Workshops
10:30 - 11:00 AM	Coffee break
12:00 - 2:00 PM	Lunch on your own
3:00 - 3:30 PM	Coffee Break
6:30 - 10:30 PM	Saturday night reception and dancing

ORGANIZING COMMITTEE

General Chairs

Samy Bengio, Google Brain

Program Chair

Hanna Wallach, Microsoft Research

Program Co-Chairs

Hugo Larochelle, Google Brain

Kristen Grauman, UT Austin, Facebook AI

Nicolò Cesa-Bianchi, U. of Milan

Tutorials Chairs

Jenn Wortman Vaughan, Microsoft Research

Samuel Kaski, Aalto U. and U. of Helsinki

Workshop Chairs

Joaquin Quiñonero Candela, Facebook

Suchi Saria, Johns Hopkins U.

Demo and Competition Chairs

Ralf Herbrich, Amazon

Sergio Escalera, U. of Barcelona

Press Chairs

Neil Lawrence, U. of Sheffield / Amazon Cambridge

Katherine Gorman, Talking Machines / Collective Next

Party Chair

Douglas Eck, Google Brain

Publications Chair and Electronic Proceedings Chair

Roman Garnett, Washington U. in St. Louis

Diversity and Inclusion Chairs

Hal Daumé III, U. of Maryland, Microsoft

Katherine A. Heller, Duke U.

Workflow Engineer

Jeshuran Thangaraj, The Salk Institute

Volunteer Workflow Team

Trapit Bansal, UMass

Mathieu Germain, Montreal Institute for Learning Algorithms

Chinmay Singh, Microsoft Research

FOUNDATION OFFICERS & BOARD MEMBERS

PRESIDENT

Terrence Sejnowski, The Salk Institute

TREASURER

Marian Bartlett, Apple

SECRETARY

Michael Mozer, UC Boulder

EXECUTIVE DIRECTOR

Mary Ellen Perry, The Salk Institute

LEGAL ADVISOR

David Kirkpatrick

IT DIRECTOR

Lee Campbell, The Salk Institute

EXECUTIVE BOARD

Corinna Cortes, Google Research

Isabelle Guyon, U. Paris-Saclay & ChaLearn

Neil D. Lawrence, U. of Sheffield

Daniel D. Lee, U. of Pennsylvania

Ulrike von Luxburg, U. of Tübingen

Masashi Sugiyama, RIKEN, U. of Tokyo

Max Welling, U. of Amsterdam

ADVISORY BOARD

Peter Bartlett, Queensland U., UC Berkeley

Sue Becker, McMaster U. Ontario, Canada

Yoshua Bengio, U. of Montreal, Canada

Léon Bottou, Microsoft Research

Chris J.C. Burges, Microsoft Research

Jack Cowan, U. of Chicago

Thomas G. Dietterich, Oregon State U.

Zoubin Ghahramani, U. of Cambridge

Stephen Hanson, Rutgers U.

Michael I. Jordan, UC Berkeley

Michael Kearns, U. of Pennsylvania

Scott Kirkpatrick, Hebrew U. Jerusalem

Daphne Koller, Stanford U.

John Lafferty, Yale U.

Todd K. Leen

Richard Lippmann, MIT

Bartlett Mel, U. of Southern California

John Moody, JEM

John C. Platt, Google

Fernando Pereira, Google Research

Gerald Tesaro, IBM Watson Labs

Sebastian Thrun, Stanford U.

Dave Touretzky, Carnegie Mellon U.

Lawrence Saul, UC San Diego

Bernhard Schölkopf, MPI, Tübingen/Stuttgart

Dale Schuurmans, U. of Alberta, Canada

John Shawe-Taylor, U. College London

Sara A. Solla, Northwestern U.

Yair Weiss, Hebrew U. of Jerusalem

Chris Williams, U. of Edinburgh

Rich Zemel, U. of Toronto

SUPPORT TEAM

The organization and management of NeurIPS would not be possible without the help of many volunteers, students, researchers and administrators who donate their valuable time and energy to assist the conference in various ways. The support staffs' tireless efforts make the conference run smoothly and efficiently every year. NeurIPS would particularly like to acknowledge the exceptional work of:

Brad Brockmeyer

Terrance Gaines

Andrea Brown

Peggy Briggs

Jen Perry

Ramona Marchand

Chris Brown

Susan Westphal

GENERAL INFORMATION

REGISTRATION DESK

Sunday, December 2nd: 7:00 am – 8:00 pm
 Monday – Friday: 7:00 am – 7:00 pm
 Saturday, December 8th : 7:00 am - 12:00 pm

OPENING RECEPTION

Monday, December 3rd starting at 6:30 pm
 Room 220AB

CLOSING RECEPTION LOCATION

Saturday, December 8th at 6:30 pm
 Room 220 ABCD, 210, 230

POSTER SESSIONS

Tuesday - Thursday
 Poster A Session: 10:45 pm – 12:45 pm
 Poster B Session: 5:00 pm – 7:30 pm

Take down your poster at 8:00 pm or they will be discarded.

WIFI

SSID: NeurIPS2018
 Password: conference

MOBILE APP

- Step 1: Download and install the Whova app from App Store (for iPhones) or Google Play (for Android phones).
- Step 2: Sign up in the app using the email address you registered with. You're all set!

Now you will be able to:

- View the event agenda and plan your schedule.
- If you set up your own profile, you can send in-app messages and exchange contact information
- Receive update notifications from organizers.
- Access agenda, maps, and directions.

After downloading, sign up on Whova with the email address that you used to RSVP for our event, or sign up using your social media accounts. If you are asked to enter an invitation code to join the event, please use the following invitation code: **neurips**

CHARGING TABLES

Located throughout the venue

517ab WiML Program (Monday)
 517cd Town Hall Panel Discussion (Tuesday - 1:15pm)
 520 Black in AI Workshop (Friday, 1pm-6pm)
 520 LatinX in AI Workshop (Saturday, 8am-7pm)
 Intercontinental Hotel - Queer in AI (Saturday, 8am-12pm)

FUTURE CONFERENCES

Vancouver, Canada
 2019 & 2020

MONDAY SCHEDULE

TIME & DESCRIPTION

LOCATION

8:30 am - 10:30 am - Tutorials Session 1

Scalable Bayesian Inference

David Dunson

Room 517 CD

Adversarial Robustness: Theory and Practice

J. Zico Kolter · Aleksander Madry

Room 220 CD

Visualization for Machine Learning

Fernanda Viégas · Martin Wattenberg

Room 220 E

10:30 - 11:00 am - Coffee Break

11:00 am -- 1:00 pm - Tutorials Session 2

Common Pitfalls for Studying the Human Side of Machine Learning

Deirdre Mulligan · Nitin Kohli · Joshua A. Kroll

Room 220 E

Negative Dependence, Stable Polynomials, and All That

Suvrit Sra · Stefanie Jegelka

Rooms 517 CD

Unsupervised Deep Learning

Alex Graves · Marc'Aurelio Ranzato

Room 220 CD

1:00 - 2:30 pm - Lunch On Your Own

2:30 pm - 4:30 pm - Tutorials Session 3

Automatic Machine Learning

Frank Hutter · Joaquin Vanschoren

Room 220 CD

Counterfactual Inference

Room 517 CD

Susan Athey

Statistical Learning Theory: a Hitchhiker's Guide

John Shawe-Taylor · Omar Rivasplata

Room 220 E

5:00 pm - 5:30 pm Opening Remarks

Room 220 CD

5:30 pm - 6:20 pm - Invited Talk:

Laura Gomez

The Necessity of Diversity and Inclusivity In Tech

Room 220 CDE

6:30 pm - 8:30 pm: Opening Reception

Room 220 AB

Scalable Bayesian Inference

David Dunson (Duke University)

Location: Room 517 CD

This tutorial will provide a practical overview of state-of-the-art approaches for analyzing massive data sets using Bayesian statistical methods. The first focus area will be on algorithms for very large sample size data (large n), and the second focus area will be on approaches for very high-dimensional data (large p). A particular emphasis will be on maintaining a valid characterization of uncertainty, ruling out many popular methods, such as (most) variational approximations and approaches for maximum a posteriori estimation. I will briefly review classical large sample approximations to posterior distributions (e.g., Laplace's method, Bayesian central limit theorem), and will then transition to discussing conceptually and practical simple approaches for scaling up commonly used Markov chain Monte Carlo (MCMC) algorithms. The focus is on making posterior computation much faster to implement for huge datasets while maintaining accuracy guarantees. Some useful classes of algorithms having increasing theoretical and practical support include embarrassingly parallel (EP) MCMC, approximate MCMC, stochastic approximation, hybrid optimization and sampling, and modularization. Applications to computational advertising, genomics, neurosciences and other areas will provide a concrete motivation. Code and notes will be made available, and research problems of ongoing interest highlighted.

Visualization for Machine Learning

Fernanda Viégas (Google)
Martin Wattenberg (Google)

Location: Room 220 E

Visualization is a powerful way to understand and interpret machine learning--as well as a promising area for ML researchers to investigate. This tutorial will provide an introduction to the landscape of ML visualizations, organized by types of users and their goals. We'll discuss how each stage of the ML research and development pipeline lends itself to different visualization techniques: analyzing training data, understanding the internals of a model, and testing performance. In addition, we'll explore how visualization can play an important role in ML education and outreach to non-technical stakeholders.

The tutorial will also include a brief introduction to key techniques from the fields of graphic design and human-computer interaction that are relevant in designing data displays. These ideas are helpful whether refining existing visualizations, or inventing entirely new visual techniques.

Adversarial Robustness: Theory and Practice

J. Zico Kolter (CMU, Bosch Center for AI)

Aleksander Madry (MIT)

Location: Room 220 CD

The recent push to adopt machine learning solutions in real-world settings gives rise to a major challenge: can we develop ML solutions that, instead of merely working "most of the time", are truly reliable and robust? This tutorial will survey some of the key challenges in this context and then focus on the topic of adversarial robustness: the widespread vulnerability of state-of-the-art deep learning models to adversarial misclassification (aka adversarial examples). We will discuss the practical as well as theoretical aspects of this phenomenon, with an emphasis on recent verification-based approaches to establishing formal robustness guarantees. Our treatment will go beyond viewing adversarial robustness solely as a security question. In particular, we will touch on the role it plays as a regularizer and its relation to generalization.

Common Pitfalls for Studying the Human Side of Machine Learning

Deirdre Mulligan (UC Berkeley)
Nitin Kohli (UC Berkeley)
Joshua A. Kroll (Princeton)

Location: Room 220 E

As machine learning becomes increasingly important in everyday life, researchers have examined its relationship to people and society to answer calls for more responsible uses of data-driven technologies. Much work has focused on fairness, accountability, and transparency as well as on explanation and interpretability. However, these terms have resisted definition by computer scientists: while many definitions of each have been put forward, several capturing natural intuitions, these definitions do not capture everything that is meant by associated concept, causing friction with other disciplines and the public. Worse, sometimes different properties conflict explicitly or cannot be satisfied simultaneously. Drawing on our research on the meanings of these terms and the concepts they refer to across different disciplines (e.g., computer science, statistics, public policy, law, social sciences, philosophy, humanities, and others), we present common misconceptions machine learning researchers and practitioners hold when thinking about these topics. For example, it is often axiomatic that producing machine learning explanations automatically makes the outputs of a model more understandable, but this is hardly if ever the case. Similarly, defining fairness as a statistical property of the distribution of model outputs ignores the many procedural requirements supporting fairness in policymaking and the operation of the law. We describe how to integrate the rich meanings of these concepts into machine learning research and practice, enabling attendees to engage with disparate communities of research and practice and to recognize when terms are being overloaded, thereby avoiding speaking to people from other disciplines at cross purposes.

Unsupervised Deep Learning

Alex Graves (DeepMind)
Marc'Aurelio Ranzato (Facebook)

Location: Room 220 CD

Unsupervised learning looks set to play an ever more important role for deep neural networks, both as a way of harnessing vast quantities of unlabelled data, and as a means of learning representations that can rapidly generalise to new tasks and situations. The central challenge is how to determine what the objective function should be, when by definition we do not have an explicit target in mind. One approach, which this tutorial will cover in detail, is simply to 'predict everything' in the data, typically with a probabilistic model, which can be seen through the lens of the Minimum Description Length principle as an effort to compress the data as compactly as possible. However, we will also survey a range of other techniques, including un-normalized energy-based models, self-supervised algorithms and purely generative models such as GANs. Time allowing, we will extend our discussion to the reinforcement learning setting, where the natural analogue of unsupervised learning is intrinsic motivation, and notions such as curiosity, empowerment and compression progress are invoked as drivers of learning.

Negative Dependence, Stable Polynomials, and All That

Suvrit Sra (MIT)
Stefanie Jegelka (MIT)

Location: Rooms 517 CD

This tutorial provides an introduction to a rapidly evolving topic: the theory of negative dependence and its numerous ramifications in machine learning. Indeed, negatively dependent probability measures provide a powerful tool for modeling non-i.i.d. data, and thus can impact all aspects of learning, including supervised, unsupervised, interpretable, interactive, and large-scale setups. The most well-known examples of negatively dependent distributions are perhaps the Determinantal Point Processes (DPPs), which have already found numerous ML applications. But DPPs are just the tip of the iceberg; the class of negatively dependent measures is much broader, and given the vast web of mathematical connections it enjoys, it holds great promise as a tool for machine learning. This tutorial exposes the ML audience to this rich mathematical toolbox, while outlining key theoretical ideas and motivating fundamental applications. Tasks that profit from negative dependence include anomaly detection, information maximization, experimental design, validation of black-box systems, architecture learning, fast MCMC sampling, dataset summarization, interpretable learning.

Monday Tutorials Session 1

2:30 - 4:30 PM

Counterfactual Inference

Susan Athey (Stanford University)

Location: Room 517 CD

This tutorial will review the literature that brings together recent developments in machine learning with methods for counterfactual inference. It will focus on problems where the goal is to estimate the magnitude of causal effects, as well as to quantify the researcher's uncertainty about these magnitudes. The tutorial will consider two strands of the literature. The first strand attempts to estimate causal effects of a single intervention, like a drug or a price change. The goal can be to estimate the average (counterfactual) effect of applying the treatment to everyone; or the conditional average treatment effect, which is the effect of applying the treatment to an individual conditional on covariates. We will also consider the problem of estimating an optimal treatment assignment policy (mapping features to assignments) under constraints on the nature of the policy, such as budget constraints. We look at applications to assigning unemployed workers to re-employment services. We finish by considering the case with multiple alternative treatments, as well as the link between this literature and the literature on contextual bandits. The second strand of the literature attempts to infer individual's preferences from their behavior (inverse reinforcement learning in machine learning parlance, or structural estimation in econometrics parlance), and then predict an individual's behavior in new environments. We look at applications to consumer choice behavior, and analyze counterfactuals around price changes. We discuss how models such as these can be tuned when the goal is counterfactual estimation rather than predicting outcomes.

Statistical Learning Theory: a Hitchhiker's Guide

John Shawe-Taylor (UCL)
Omar Rivasplata (UCL, DeepMind)

Location: Room 220 E

The tutorial will showcase what statistical learning theory aims to assess about and hence deliver for learning systems. We will highlight how algorithms can piggy back on its results to improve the performances of learning algorithms as well as to understand their limitations. The tutorial is aimed at those wishing to gain an understanding of the value and role of statistical learning theory in order to hitch a ride on its results.

Automatic Machine Learning

Frank Hutter (U. of Freiburg)
Joaquin Vanschoren
(Eindhoven University)

Location: Room 220 CD

The success of machine learning crucially relies on human machine learning experts, who construct appropriate features and workflows, and select appropriate machine learning paradigms, algorithms, neural architectures, and their hyperparameters. Automatic machine learning (AutoML) is an emerging research area that targets the progressive automation of machine learning, which uses machine learning and optimization to develop off-the-shelf machine learning methods that can be used easily and without expert knowledge. It covers a broad range of subfields, including hyperparameter optimization, neural architecture search, meta-learning, and transfer learning. This tutorial will cover the methods underlying the current state of the art in this fast-paced field.

Invited Talk - 5:30 - 6:20 PM

The Necessity of Diversity and Inclusivity in Tech

Rooms 220 CDE

Laura Gomez (Founder, Atipica)

Laura I. Gómez, is the Founder and CEO at Atipica, a venture-backed startup and founding member of Project Include. As a young immigrant to Silicon Valley, Laura grew up in Redwood City, the daughter of a single mother and nanny to several local tech leaders. At the age of 17, Laura I. Gómez had her first internship with Hewlett-Packard, which started her career in tech. Laura has worked at Google, YouTube, Jawbone, and Twitter, where she was a founding team member of the International team, which led Twitter's product expansion into 50 languages and dozens of countries. Her passion for diversity in tech extends into her startup, Atipica, as well as her involvement with several nonprofit organisations. Her passion is to lead data-driven initiatives that allow top level leaders to understand the business benefits of machine learning in recruiting and diversity. She has been recognized by the Department of State and Former Secretary of State Hillary Clinton for involvement in the TechWomen Program – she was the only female leader at Twitter to participate in 2012. She also serves on the board of the Institute for Technology and Public Policy alongside Lt Governor Gavin Newsom and former Secretary of State George P Schultz.

TUESDAY SCHEDULE

TIME	DESCRIPTION	LOCATION
8:30 - 9:20 AM	Invited Talk: Edward W Felten <i>Machine Learning Meets Public Policy: What to Expect and How to Cope</i>	Rooms 220 CDE
9:20 - 9:40 AM	Test Of Time Award: Leon Bottou, Olivier Bousquet <i>The Tradeoffs of Large-Scale Learning</i>	
9:40 - 10:05 AM	Coffee break	
10:05 - 10:45 PM	Parallel Tracks:	
	Track 1	Room 220 CD
	Track 2	Room 220 E
	Track 3	Room 517 CD
10:45 - 12:30 AM	Poster A Sessions Demonstrations	Rooms 210, 230, 517 AB Room 510 ABCD
12:45 - 2:15 PM	Lunch on your own	
1:15 - 2:15 PM	Town Hall Meeting	Room 517 CD
2:15 - 3:05 PM	Invited Talk: Michael Levin <i>What Bodies Think About: Bioelectric Computation Outside the Nervous System, Primitive Cognition, and Synthetic Morphology</i>	Rooms 220 CDE
3:05 - 3:30 PM	Coffee break	
3:30 - 5:00 PM	Parallel Tracks:	
	Track 1	Room 220 CD
	Track 2	Room 220 E
	Track 3	Room 517 CD
5:00 - 7:30 PM	Poster B Sessions	Rooms 210, 230, 517 AB

Machine Learning Meets Public Policy: What to Expect and How to Cope

Rooms 220 CDE, 8:30 - 9:20 AM

AI and Machine Learning are already having a big impact on the world. Policymakers have noticed, and they are starting to formulate laws and regulations, and to convene conversations, about how society will govern the development of these technologies. This talk will give an overview of how policymakers deal with new technologies, how the process might develop in the case of AI/ML, and why constructive engagement with the policy process will lead to better outcomes for the field, for governments, and for society.

Edward Felton
Princeton University

Edward W. Felton is the Robert E. Kahn Professor of Computer Science and Public Affairs at Princeton University, and the founding Director of Princeton's Center for Information Technology Policy. He is a member of the United States Privacy and Civil Liberties Oversight Board. In 2015-2017 he served in the White House as Deputy U.S. Chief Technology Officer. In 2011-12 he served as the first Chief Technologist at the U.S. Federal Trade Commission. His research interests include computer security and privacy, and technology law and policy. He has published more than 150 papers in the research literature, and three books. He is a member of the National Academy of Engineering and the American Academy of Arts and Sciences, and is a Fellow of the ACM.

What Bodies Think About: Bioelectric Computation Outside the Nervous System, Primitive Cognition, and Synthetic Morphology

Rooms 220 CDE, 2:15 - 3:05 PM

Brains are not unique in their computational abilities. Bacteria, plants, and unicellular organisms exhibit learning and plasticity; nervous systems speed-optimized information-processing that is ubiquitous across the tree of life and was already occurring at multiple scales before neurons evolved. Non-neural computation is especially critical for enabling individual cells to coordinate their activity toward the creation and repair of complex large-scale anatomies. We have found that bioelectric signaling enables all types of cells to form networks that store pattern memories that guide large-scale growth and form. In this talk, I will introduce the basics of developmental bioelectricity, and show how novel conceptual and methodological advances have enabled rewriting pattern memories that guide morphogenesis without genomic editing. In effect, these strategies allow reprogramming the bioelectric software that implements multicellular patterning goal states. I will show examples of applications in regenerative medicine and cognitive neuroplasticity, and illustrate future impacts on synthetic bioengineering, robotics, and machine learning.

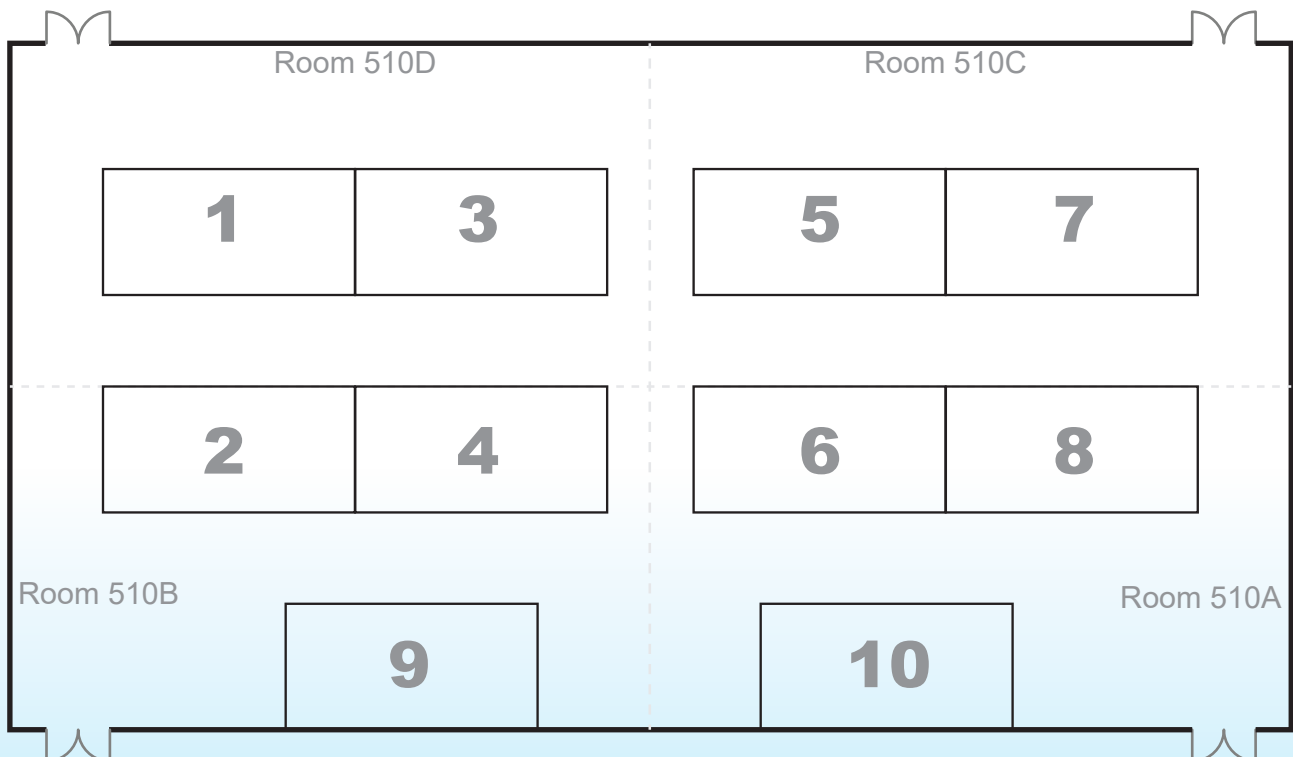

Michael Levin
Tufts University

Michael Levin is a professor at Tufts University, and director of the Allen Discovery Center at Tufts (allencenter.tufts.edu), working on computation in the medium of living systems. His original training was in computer science; his interest in AI and philosophy of mind led to a life-long focus on embryogenesis and regeneration as quintessential systems in which to understand how biophysical processes underlie complex adaptive decision-making. He received a Ph.D. in genetics from Harvard Medical School in 1996. Now, his group (www.drmmichaellevin.org) works at the interface between developmental biology, basal cognition, and computational neuroscience. Projects include the dynamics of memories during complete brain regeneration (how can a malleable living medium store cognitive content?), behavioral studies of artificial living machines and radically-altered anatomies (how can brains learn to operate bodies with novel sensory/motor structures), induction of complex organ regeneration in non-regenerative species, editing body pattern (e.g., inducing complete eyes to form out of gut tissue, repairing birth defects, and creating permanently-propagating 2-headed worms without genomic editing), tumor reprogramming. All of these projects are being pushed toward applications in regenerative medicine, as well as inspiring novel machine learning architectures and robotics approaches. The computational side of the group works on extending connectionist paradigms beyond Neural Networks, and creating software platforms for automating the inference of insights into pattern control (a bioinformatics of shape).

- #1 **Deep Neural Networks Running Onboard Anki's Robot, Vector**
Lorenzo Riano, Andrew Stein, Mark Palatucci
- #2 **TensorFlow Dance - Learning to Dance via Machine Learning**
Yaz Santissi
- #3 **Ruuh: A Deep Learning Based Conversational Social Agent**
Puneet Agrawal, Manoj Kumar Chinnakotla, Sonam Damani, Meghana Joshi, Kedhar Nath Narahari, Khyatti Gupta, Nitya Raviprakash, Umang Gupta, Ankush Chatterjee, Abhishek Mathur, Sneha Magapu
- #4 **Game for Detecting Backdoor Attacks on Deep Neural Networks using Activation Clustering**
Casey Dugan, Werner Geyer, Aabhas Sharma, Ingrid Lange, Dustin Ramsey Torres, Bryant Chen, Nathalie Baracaldo Angel, Heiko Ludwig
- #5 **Deep learning to improve quality control in pharmaceutical manufacturing**
Michael Sass Hansen, Sebastian Brandes Kraaijenzank
- #6 **Reproducing Machine Learning Research on Binder**
Jessica Forde, Tim Head, Chris Holdgraf, M Pacer
- #7 **A Hands-free Natural User Interface (NUI) for AR/VR Head-Mounted Displays Exploiting Wearer's Facial Gestures**
Jaekwang Cha, Shiho Kim, Jinhyuk Kim
- #8 **A model-agnostic web interface for interactive music composition by inpainting**
Gaëtan Hadjeres, Théis Bazin, Ashis Pati
- #9 **A machine learning environment to determine novel malaria policies**
Oliver Bent, Sekou L Remy, Nelson K Bore
- #10 **TextWorld: A Learning Environment for Text-based Games**
Marc-Alexandre Côté, Wendy Tay, Eric Yuan

WEDNESDAY SCHEDULE

TIME	DESCRIPTION	LOCATION
8:30 - 9:20 AM	Invited Talk: Joelle Pineau <i>Reproducible, Reusable, and Robust Reinforcement Learning</i>	Rooms 220 CDE
9:20 - 9:45 AM	Coffee break

Reproducible, Reusable, and Robust Reinforcement Learning

Rooms 220 CDE, 8:30 - 9:20 AM

We have seen significant achievements with deep reinforcement learning in recent years. Yet reproducing results for state-of-the-art deep RL methods is seldom straightforward. High variance of some methods can make learning particularly difficult when environments or rewards are strongly stochastic. Furthermore, results can be brittle to even minor perturbations in the domain or experimental procedure. In this talk, I will review challenges that arise in experimental techniques and reporting procedures in deep RL. I will also describe several recent results and guidelines designed to make future results more reproducible, reusable and robust.

Joelle Pineau
McGill University

Joelle Pineau is an Associate Professor and William Dawson Scholar at McGill University where she co-directs the Reasoning and Learning Lab. She also leads the Facebook AI Research lab in Montreal, Canada. She holds a BASc in Engineering from the University of

Waterloo, and an MSc and PhD in Robotics from Carnegie Mellon University. Dr. Pineau's research focuses on developing new models and algorithms for planning and learning in complex partially-observable domains. She also works on applying these algorithms to complex problems in robotics, health care, games and conversational agents. She serves on the editorial board of the Journal of Artificial Intelligence Research and the Journal of Machine Learning Research and is currently President of the International Machine Learning Society. She is a recipient of NSERC's E.W.R. Steacie Memorial Fellowship (2018), a Fellow of the Association for the Advancement of Artificial Intelligence (AAAI), a Senior Fellow of the Canadian Institute for Advanced Research (CIFAR) and in 2016 was named a member of the College of New Scholars, Artists and Scientists by the Royal Society of Canada.

Investigations into the Human-AI Trust Phenomenon

Rooms 220 CDE, 2:15 - 3:05 PM

As intelligent systems become more fully interactive with humans during the performance of our day-to-day activities, the role of trust must be examined more carefully. Trust conveys the concept that when interacting with intelligent systems, humans tend to exhibit similar behaviors as when interacting with other humans and thus may misunderstand the risks associated with deferring their decisions to a machine. Bias further impacts this potential risk for trust, or overtrust, in that these systems are learning by mimicking our own thinking processes, inheriting our own implicit biases. In this talk, we will discuss this phenomenon through the lens of intelligent systems that interact with people in scenarios that are realizable in the near-term.

Ayanna Howard
Georgia Institute of Technology

Ayanna Howard, Ph.D. is the Linda J. and Mark C. Smith Professor and Chair of the School of Interactive Computing in the College of Computing at the Georgia Institute of Technology. She also holds a faculty appointment in the School of Electrical and Computer Engineering.

Dr. Howard's career focus is on intelligent technologies that must adapt to and function within a human-centered world. Her work, which encompasses advancements in artificial intelligence (AI), assistive technologies, and robotics, has resulted in over 250 peer-reviewed publications in a number of projects - from healthcare robots in the home to AI-powered STEM apps for children with diverse learning needs. Dr. Howard received her B.S. in Engineering from Brown University, and her M.S. and Ph.D. in Electrical Engineering from the University of Southern California. To date, her unique accomplishments have been highlighted through a number of awards and articles, including highlights in USA Today, Upscale, and TIME Magazine, as well as being recognized as one of the 23 most powerful women engineers in the world by Business Insider. In 2013, she also founded Zyrobotics, which is currently licensing technology derived from her research and has released their first suite of STEM educational products to engage children of all abilities. Prior to Georgia Tech, Dr. Howard was a senior robotics researcher at NASA's Jet Propulsion Laboratory. She has also served as the Associate Director of Research for the Institute for Robotics and Intelligent Machines, Chair of the Robotics Ph.D. program, and the Associate Chair for Faculty Development in the School of Electrical and Computer Engineering at Georgia Tech.

#1 **BigBlueBot: A Demonstration of How to Detect Egregious Conversations with Chatbots**
Casey Dugan · Justin D Weisz · Narendra Nath Joshi · Ingrid Lange · J Johnson · Mohit Jain · Werner Geyer

#2 **Perception, sensing, motion planning and robot control using AI for automated feeding of upper-extremity mobility impaired people**
Tapomayukh Bhattacharjee · Daniel Gallenberger · David Dubois · Siddhartha Srinivasa · Louis L'Écuyer-Lapierre

#3 **Play Imperfect Information Games against Neural Networks**

#10 **Automatic Curriculum Generation Applied to Teaching Novices a Short Bach Piano Segment**
Emma Brunskill · Tong Mu · Karan Goel · Jonathan Bragg

Student Paper Awards

- **Non-delusional Q-learning and Value-iteration**

Tyler Lu · Dale Schuurmans · Craig Boutilier

- **Optimal Algorithms for Non-Smooth Distributed Optimization in Networks**

Kevin Scaman · Francis Bach · Sebastien Bubeck · Laurent Massoulié · Yin Tat Lee

- **Neural Ordinary Differential Equations**

Tian Qi Chen · Yulia Rubanova · Jesse Bettencourt · David Duvenaud

- **Nearly Tight Sample Complexity Bounds for Learning Mixtures of Gaussians via Sample Compression Schemes**

Hassan Ashtiani · Shai Ben-David · Nick Harvey · Christopher Liaw · Abbas Mehrabian · Yaniv Plan

THURSDAY SCHEDULE

TIME	DESCRIPTION	LOCATION
8:30 - 9:20 AM	Invited Talk: David Spiegelhalter <i>Making Algorithms Trustworthy: What Can Statistical Science Contribute to Transparency, Explanation and Validation?</i>	Rooms 220 CDE
9:20 - 9:45 AM	Coffee break	
9:45 - 10:45 PM	Parallel Tracks:	
	Track 1	Room 220 CD
	Track 2	Room 220 E
	Track 3	Room 517 CD
10:45 - 12:30 AM	Poster A Sessions Demonstrations	Rooms 210, 230, 517 AB Room 510 ABCD
12:45 - 2:15 PM	Lunch on your own	
2:15 - 3:05 PM	Invited Talk: Kunle Olukotun <i>Designing Computer Systems for Software 2.0</i>	Rooms 220 CDE
3:05 - 3:30 PM	Coffee break	
3:30 - 5:00 PM	Parallel Tracks:	
	Track 1	Room 220 CD
	Track 2	Room 220 E
	Track 3	Room 517 CD
5:00 - 7:30 PM	Poster B Sessions	Rooms 210, 230, 517 AB

Making Algorithms Trustworthy: What Can Statistical Science Contribute to Transparency, Explanation and Validation?

Rooms 220 CDE, 8:30 - 9:20 AM

The demand for transparency, explainability and empirical validation of automated advice systems is not new. Back in the 1980s there were (occasionally acrimonious) discussions between proponents of rule-based systems and those based on statistical models, partly based on which were more transparent. A four-stage process of evaluation of medical advice systems was established, based on that used in drug development. More recently, EU legislation has focused attention on the ability of algorithms to, if required, show their workings. Inspired by Onora O'Neill's emphasis on demonstrating trustworthiness, and her idea of 'intelligent transparency', we should ideally be able to check (a) the empirical basis for the algorithm, (b) its past performance, (c) the reasoning behind its current claim, including tipping points and what-ifs (d) the uncertainty around its current claim, including whether the latest case comes within its remit. Furthermore, these explanations should be open to different levels of expertise.

These ideas will be illustrated by the Predict 2.1 system for women choosing adjuvant therapy following surgery for breast cancer, which is based on a competing-risks survival regression model, and has been developed in collaboration with professional psychologists in close cooperation with clinicians and patients. Predict 2.1 has four levels of explanation of the claimed potential benefits and harms of alternative treatments, and is currently used in around 25,000 clinical decisions a month worldwide.

David Spiegelhalter
University of Cambridge

David Spiegelhalter is a statistician in the Centre for Mathematical Sciences at Cambridge University, and currently President of the Royal Statistical Society. His background is in Bayesian statistics, and after working in computer-aided diagnosis in the early 1980s, he jointly developed the Lauritzen-Spiegelhalter algorithm for exact

evidence propagation in Bayesian networks. He then led the team behind the BUGS software for MCMC analysis of Bayesian models.

He is now Chair of the Winton Centre for Risk and Evidence Communication, which aims to improve the way that statistical evidence is used by health professionals, patients, lawyers and judges, media and policy-makers. This work includes the development and evaluation of front-ends for algorithms used in patient care, focusing on explanation and transparency, particularly regarding uncertainty.

*He has over 200 refereed publications and is co-author of 6 textbooks, as well as *The Norm Chronicles* (with Michael Blastland) and *Sex by Numbers*. He works extensively with the media, and presented the BBC4 documentaries *'Tails you Win: the Science of Chance'* and the award-winning *"Climate Change by Numbers"*. He was elected Fellow of the Royal Society in 2005, and knighted in 2014 for services to medical statistics. Perhaps his greatest achievement came in 2011 when he was 7th in an episode of *Winter Wipeout* on BBC1.*

Designing Computer Systems for Software 2.0

Rooms 220 CDE, 2:15 - 3:05 PM

The use of machine learning to generate models from data is replacing traditional software development for many applications. This fundamental shift in how we develop software, known as Software 2.0, has provided dramatic improvements in the quality and ease of deployment for these applications. The continued success and expansion of the Software 2.0 approach must be powered by the availability of powerful, efficient and flexible computer systems that are tailored for machine learning applications. This talk will describe a design approach that optimizes computer systems to match the requirements of machine learning applications. The full-stack design approach integrates machine learning algorithms that are optimized for the characteristics of applications and the strengths of modern hardware, domain-specific languages and advanced compilation technology designed for programmability and performance, and hardware architectures that achieve both high flexibility and high energy efficiency.

Kunle Olukotun
Stanford

Kunle Olukotun is the Cadence Design Professor of Electrical Engineering and Computer Science at Stanford University. Olukotun is well known as a pioneer in multicore processor design and the leader of the Stanford Hydra chip multiprocessor (CMP) research project. Olukotun founded Afara Websystems to develop high-throughput, low-power multicore processors for server systems. The Afara multicore processor, called Niagara, was acquired by Sun Microsystems. Niagara derived processors now power all Oracle SPARC-based servers. Olukotun currently directs the Stanford Pervasive Parallelism Lab (PPL), which seeks to proliferate the use of heterogeneous parallelism in all application areas using Domain Specific Languages (DSLs). Olukotun is a member of the Data Analytics for What's Next (DAWN) Lab which is developing infrastructure for usable machine learning. Olukotun is an ACM Fellow and IEEE Fellow for contributions to multiprocessors on a chip and multi-threaded processor design and is the recipient of the 2018 IEEE Harry H. Goode Memorial Award. Olukotun received his Ph.D. in Computer Engineering from The University of Michigan.

FRIDAY WORKSHOPS

8AM - 6:30PM

To find out Workshop locations, download the app or visit neurips.cc

- **Bayesian Deep Learning**
Yarin Gal · José Miguel Hernández-Lobato · Christos Louizos · Andrew Wilson · Zoubin Ghahramani · Kevin P Murphy · Max Welling
- **Visually grounded interaction and language**
Florian Strub · Harm de Vries · Erik T Wijmans · Samyak Datta · Ethan Perez · Mateusz Malinowski · Stefan Lee · Peter Anderson · Aaron Courville · Jeremie MARY · Dhruv Batra · Devi Parikh · Olivier Pietquin · Chiori HORI · Tim Marks · Anoop Cherian
- **Continual Learning**
Razvan Pascanu · Yee Teh · Marc Pickett · Mark Ring
- **Critiquing and Correcting Trends in Machine Learning**
Tom Rainforth · Matt Kusner · Benjamin Bloem-Reddy · Brooks Paige · Rich Caruana · Yee Whye Teh
- **Deep Reinforcement Learning**
Pieter Abbeel · David Silver · Satinder Singh · Joelle Pineau · Joshua Achiam · Rein Houthoofd · Aravind Srinivas
- **All of Bayesian Nonparametrics (Especially the Useful Bits)**
Diana Cai · Trevor Campbell · Michael Hughes · Tamara Broderick · Nick Foti · Sinead A Williamson
- **MLSys: Workshop on Systems for ML and Open Source Software**
Aparna Lakshmiratan · Sarah Bird · Siddhartha Sen · Joseph Gonzalez · Daniel Crankshaw
- **NIPS 2018 Competition Track Day 1**
Sergio Escalera · Ralf Herbrich
- **The second Conversational AI workshop – today's practice and tomorrow's potential**
Alborz Geramifard · Jason D. Williams · Larry Heck · James Glass · Milica Gasic · Dilek Hakkani-Tur · Steve Young · Lazaros C. Polymenakos · Y-Lan Boureau · Maxine Eskenazi
- **Modeling the Physical World: Learning, Perception, and Control**
Jiajun Wu · Kelsey Allen · Kevin Smith · Jessica Hamrick · Emmanuel Dupoux · Marc Toussaint · Josh Tenenbaum
- **2nd Workshop on Machine Learning on the Phone and other Consumer Devices (MLPCD 2)**
Sujith Ravi · Wei Chai · Yangqing Jia · Hrishikesh Aradhye · Prateek Jain
- **Challenges and Opportunities for AI in Financial Services: the Impact of Fairness, Explainability, Accuracy, and Privacy**
Manuela Veloso · Nathan Kallus · Sameena Shah · Senthil Kumar · Isabelle Moulinier · Jiahao Chen · John Paisley
- **Causal Learning**
Martin Arjovsky · Christina Heinze-Deml · Anna Klimovskaia · Maxime Oquab · Leon Bottou · David Lopez-Paz
- **Imitation Learning and its Challenges in Robotics**
Mustafa Mukadam · Sanjiban Choudhury · Siddhartha Srinivasa
- **NIPS 2018 workshop on Compact Deep Neural Networks with industrial applications**
Lixin Fan · Zhouchen Lin · Max Welling · Yurong Chen · Werner Bailer
- **Smooth Games Optimization and Machine Learning**
Simon Lacoste-Julien · Ioannis Mitliagkas · Gauthier Gidel · Vasilis Syrgkanis · Eva Tardos · Leon Bottou · Sebastian Nowozin
- **Modeling and decision-making in the spatiotemporal domain**
Ransalu Senanayake · Neal Jean · Fabio Ramos · Girish Chowdhary
- **Machine Learning for Geophysical & Geochemical Signals**
Laura Pyrak-Nolte · James R Rustad · Richard Baraniuk
- **Workshop on Ethical, Social and Governance Issues in AI**
Chloe Bakalar · Sarah Bird · Tiberio Caetano · Edward W Felten · Dario Garcia · Isabel Kloumann · Finnian Lattimore · Sendhil Mullainathan · D. Sculley
- **Workshop on Security in Machine Learning**
Nicolas Papernot · Jacob Steinhardt · Matt Fredrikson · Kamalika Chaudhuri · Florian Tramèr

SATURDAY WORKSHOPS

8AM - 6:30PM

To find out Workshop locations, download the app or visit neurips.cc

- **Integration of Deep Learning Theories**

Richard Baraniuk · Anima Anandkumar · Stephane Mallat · Ankit Patel · nhật Hồ

- **Wordplay: Reinforcement and Language Learning in Text-based Games**

Adam Trischler · Angeliki Lazaridou · Yonatan Bisk · Wendy Tay · Nate Kushman · Marc-Alexandre Côté · Alessandro Sordoni · Daniel Ricks · Tom Zahavy · Hal Daumé III

- **Machine Learning for the Developing World (ML4D): Achieving sustainable impact**

William Herlands · Maria De-Arteaga · Amanda Coston

- **Learning by Instruction**

Shashank Srivastava · Igor Labutov · Bishan Yang · Amos Azaria · Tom Mitchell

- **Machine Learning for Systems**

Anna Goldie · Azalia Mirhoseini · Jonathan Raiman · Kevin Swersky · Milad Hashemi

- **Relational Representation Learning**

Aditya Grover · Paroma Varma · Frederic Sala · Christopher Ré · Jennifer Neville · Stefano Ermon · Steven Holtzen

- **NIPS Workshop on Machine Learning for Intelligent Transportation Systems 2018**

Li Erran Li · Anca Dragan · Juan Carlos Niebles · Silvio Savarese

- **Machine Learning for Health (ML4H): Moving beyond supervised learning in healthcare**

Andrew Beam · Tristan Naumann · Marzyeh Ghassemi · Matthew McDermott · Madalina Fiterau · Irene Y Chen · Brett Beaulieu-Jones · Michael Hughes · Farah Shamout · Corey Chivers · Jaz Kandola · Alexandre Yahi · Samuel G Finlayson · Bruno Jedynak · Peter Schulam · Natalia Antropova · Jason Fries · Adrian Dalca · Irene Chen

- **Second Workshop on Machine Learning for Creativity and Design**

Luba Elliott · Sander Dieleman · Rebecca Fiebrink · Jesse Engel · Adam Roberts · Tom White

- **Machine Learning for Molecules and Materials**

José Miguel Hernández-Lobato · Klaus-Robert Müller · Brooks Paige · Matt Kusner · Stefan Chmiela · Kristof Schütt

- **Medical Imaging meets NIPS**

Ender Konukoglu · Ben Glocker · Hervé Lombaert · Marleen de Bruijine

- **Reinforcement Learning under Partial Observability**

Joni Pajarinen · Chris Amato · Pascal Poupart · David Hsu

- **Privacy Preserving Machine Learning**

Adria Gascon · Aurélien Bellet · Niki Kilbertus · Olga Ohrimenko · Mariana Raykova · Adrian Weller

- **AI for social good**

Margaux Luck · Tristan Sylvain · Joseph Paul Cohen · Arsene Fansi Tchango · Valentine Goddard · Aurelie Helouis · Yoshua Bengio · Samuel Greydanus · Cody Wild · Taras Kucherenko · Arya Farahi · Jonathan Penn · Sean McGregor · Mark Crowley · Abhishek Gupta · Kenny Chen · Myriam Côté

- **NIPS 2018 Workshop on Meta-Learning**

Joaquin Vanschoren · Frank Hutter · Sachin Ravi · Jane Wang · Erin Grant

- **NIPS 2018 Competition Track Day 2**

Ralf Herbrich · Sergio Escalera

- **CiML 2018 - Machine Learning competitions “in the wild”: Playing in the real world or in real time**

Isabelle Guyon · Evelyne Viegas · Sergio Escalera · Jacob D Abernethy

- **Infer to Control: Probabilistic Reinforcement Learning and Structured Control**

Leslie Kaelbling · Martin Riedmiller · Marc Toussaint · Igor Mordatch · Roy Fox · Tuomas Haarnoja

- **Emergent Communication Workshop**

Jakob Foerster · Angeliki Lazaridou · Ryan Lowe · Igor Mordatch · Douwe Kiela · Kyunghyun Cho

- **Interpretability and Robustness in Audio, Speech, and Language**

Mirco Ravanelli · Dmitriy Serdyuk · Ehsan Variani · Bhuvana Ramabhadran

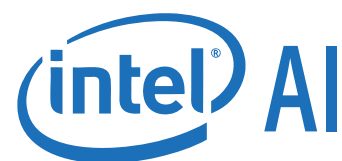

- **Machine Learning Open Source Software 2018: Sustainable communities**

Heiko Strathmann · Viktor Gal · Ryan Curtin · Antti Honkela · Sergey Lisitsyn · Cheng Soon Ong

2018 SPONSORS

Neural Information Processing Systems gratefully acknowledges the generosity of those individuals and organizations who have provided financial support for the NeurIPS 2018 conference. Their financial support enables us to sponsor student travel and participation, general support to host the conference, and the volunteers who assist us.

DIAMOND SPONSORS

The Facebook logo, consisting of the word "facebook" in a bold, blue, lowercase sans-serif font.The ELEMENT AI logo, with "ELEMENT" in a bold, black, uppercase sans-serif font and "AI" in a smaller, black, uppercase sans-serif font with a superscript.The IBM Research AI logo, with "IBM Research AI" in a bold, black, sans-serif font.The Microsoft logo, featuring the four-color square icon (red, green, blue, yellow) to the left of the word "Microsoft" in a grey, sans-serif font.The amazon.com logo, with "amazon.com" in a bold, black, lowercase sans-serif font and the orange arrow underneath.The GRAPHCORE logo, with "GRAPHCORE" in a bold, black, uppercase sans-serif font.The Lambda logo, featuring a black square with a white Greek letter lambda (λ) inside, and the word "Lambda" in a bold, black, sans-serif font below it.The stradigi AI logo, with "stradigi" in a bold, black, lowercase sans-serif font and "AI" in a smaller, black, uppercase sans-serif font inside a blue square.The NVIDIA logo, featuring a green stylized eye icon above the word "NVIDIA" in a bold, black, uppercase sans-serif font.The intel AI logo, with the word "intel" in a blue, lowercase sans-serif font inside a blue oval, followed by "AI" in a bold, blue, uppercase sans-serif font.The salesforce logo, featuring a blue cloud shape with the word "salesforce" in a white, lowercase sans-serif font inside.The MTL INTL logo, with "MTL" and "INTL" in a bold, multi-colored (pink, purple, blue) sans-serif font, and "MONTRÉAL INTERNATIONAL" in a smaller, black, uppercase sans-serif font below it.

DIAMOND SPONSORS

FACEBOOK - Giving people the power to share and connect requires constant innovation. At Facebook, research permeates everything we do. We believe the most interesting research questions are derived from real world problems. Working on cutting edge research with a practical focus, we push product boundaries every day. At the same time, we publish papers, give talks, and collaborate broadly with the academic community.

ELEMENT AI - We advance cutting-edge AI research and turn it into scalable solutions that make businesses safer, stronger, and more agile.

IBM RESEARCH - At IBM Research, we invent things that matter to the world. Today, we are pioneering promising and disruptive technologies that will transform industries and society, including the future of AI, blockchain and quantum computing. We are home to 3,000+ researchers including 5 Nobel Laureates, 9 US National Medals of Technology, 5 US National Medals of Science, and 6 Turing Awards.

MICROSOFT - Microsoft Research is where leading scientists and engineers have the freedom and support to propel discovery and innovation. Here, they pursue and publish curiosity-driven research in a range of scientific and technical disciplines that can be translated into products. With access to vast computing power, global multi-disciplinary teams tackle complex problems that drive breakthrough technologies and improve lives.

AMAZON - Amazon is guided by four principles: customer obsession rather than competitor focus, passion for invention, commitment to operational excellence, and long-term thinking. Customer reviews, personalized recommendations, Prime, AWS, Kindle, Amazon Echo, and Alexa are some of the products and services pioneered by Amazon. For more information about machine learning at Amazon, visit amazon.jobs/NIPS.

GRAPHCORE - Graphcore has created a completely new processor, the Intelligence Processing Unit (IPU), specifically designed for machine intelligence.

LAMBDA - LLambda provides Deep Learning Workstations & Servers. Our products include:

- Deep Learning Servers
- Deep Learning Workstations
- GPU Cloud Services

Our customers include Apple, Microsoft, Intel, Tencent, Stanford, Cal, the US Navy, US Airforce, and others. Lambda Labs systems come pre-installed with TensorFlow, PyTorch, Caffe and all of the deep learning software you need to start training immediately. Learn more at LAMBDA.LABS.COM.

STRADIGI AI - Stradigi AI helps enterprises quickly transform their businesses through artificial intelligence powered solutions in a configurable, scalable and secure way. Backed

by one of Canada's largest applied research labs, our team provides customers and partners a full ecosystem catered to AI innovation, giving them a competitive edge.

NVIDIA - NVIDIA is the pioneer of GPU computing — a supercharged form of computing loved by the most demanding computer users in the world. Fueled by the insatiable demand for better 3D graphics and the massive scale of the gaming market, NVIDIA evolved the GPU into a computer brain at the exciting intersection of virtual reality, high performance computing, and artificial intelligence. In 2006, the creation of the CUDA programming model opened up the parallel-processing capabilities of the GPU to general-purpose computing. And when GPU computing was applied to deep learning in 2012, it ignited the era of modern AI. Today, more than 600,000 developers have embraced the NVIDIA platform to solve some of the most complex problems in computer science. NVIDIA GPU computing has become the essential tool of the da Vincis and Einsteins of our time. For them, we've built the equivalent of a time machine.

INTEL AI - About Intel AI Early detection of tumors. Predicting equipment failures before they happen. Having a natural conversation with your home or car. Making retail more personal than ever. This is Artificial Intelligence powered by Intel, and companies around the globe are using it to make money, save money, and advance the future of their industry. At Intel, we're using decades of expertise in silicon, software, communications, memory and storage to create the new technologies that AI demands. Technologies that break barriers between data center and edge, server and network, training and inference, model and reality – maximizing the economics of AI to take data from theory to real-world success. Learn more: ai.intel.com.

SALESFORCE - Salesforce Research advances state-of-the-art AI techniques, developing models, prototypes, and experiments that pave the path for innovative products on the Einstein AI Platform. We tackle real-world problems from Salesforce's enterprise customers harnessing the latest deep learning models, from image recognition to natural language processing.

MONTREAL INTERNATIONAL - Home to numerous world-class research labs, Montréal houses the largest academic concentration of AI professionals in the world with over 300 researchers and doctoral students in AI related fields. Montréal is definitely THE place to be, with its exploding startup ecosystem, the establishment of AI giants and the unique collaboration of professors and industry leaders. If that wasn't enough, Montréal is a safe and welcoming city with a rich multicultural fabric and thriving arts, food and cultural scenes. Come have a chat with us and we'll show you all the exciting investment, career and academic opportunities Montréal has to offer!

PLATINUM SPONSORS

QUANTUMBLACK - QuantumBlack is an advanced analytics firm, acquired by McKinsey & Company in 2015. Teams work in multi-disciplinary environments harnessing data to provide real-world impact bringing together the brightest data scientists, engineers and designers to take on the biggest problems. Our projects range from helping pharmaceutical companies bring lifesaving drugs to market quicker to optimising a Formula 1 car's performance. At QuantumBlack you'll enjoy the benefits of being part of one of the leading management consultancies globally and the autonomy to thrive in a fast growth tech culture.

DOC.AI - doc.ai is an AI powered platform that builds AI modules for distributed health applications. The doc.ai modules enable deep learning computations on quantified biology to develop personal health insights and predictive models. Our models extract medical information from images, video, and audio, and are delivered to our users on their smart phones.

CITADEL - Citadel is a leading investor in the world's financial markets. For over a quarter of a century, we have sought to deliver industry-leading investment returns to clients including corporate pensions, endowments, foundations, public institutions, and sovereign wealth funds. Our global team works to help our clients' capital fulfill its greatest potential across a diverse range of markets and investment strategies, including fixed income & macro, equities, quantitative, commodities and credit. For more information, visit Citadel.com. Citadel Securities is an award-winning global market maker that helps meet the liquidity needs of asset managers, banks, broker-dealers, hedge funds, government agencies, and public pension programs. We offer a broad array of fixed income and equity products, utilizing a unique set of capabilities and tools designed to drive down the cost of transactions. We strive to provide the most efficient execution and highest caliber of client services, making markets more fair and accessible for all. For more information, visit CitadelSecurities.com.

BOREALIS AI - A RBC Institute for Research, is a curiosity-driven research centre dedicated to achieving state-of-the-art in machine learning. Established in 2016, and with labs in Toronto, Montreal, Edmonton, Waterloo, and Vancouver, we support open academic collaborations and partner with world-class research centres in artificial intelligence. With a focus on ethical AI that will help communities thrive, our machine learning scientists perform fundamental and applied research in areas such as reinforcement learning, natural language processing, deep learning, and unsupervised learning to solve ground-breaking problems in diverse fields.

GOOGLE - Our mission is to organize the world's information and make it universally accessible and useful, and AI is enabling us to do that in incredible new ways - solving problems for our users, our customers, and the world. AI makes it easier for you to do things every day, whether it's searching for photos of people you love, breaking down language barriers, or helping you get things done with your own personal digital assistant. But it's also providing us with new ways of looking at old problems and helping transform how we work and live, and we think the biggest impact will come when everyone can access it.

NAVER LINE - As Korea's No.1 internet company, NAVER Corporation accounts for over 76 percent of the country's search market, and operates a diverse range of services and products related to news, blogging, music, translations, webtoons, video and more. Based in Japan, LINE Corporation launched the LINE messaging app in June 2011 and since then has grown into a diversified platform, offering a variety of services and contents for more than 200 million users around the globe.

PLATINUM SPONSORS

UBER - Uber's mission is to bring reliable transportation to everywhere, for everyone. We started in 2010 to solve a simple problem: how do you get a ride at the touch of a button? More than eight years and five billion trips later, we've started tackling an even greater challenge: reducing congestion and pollution in our cities by getting more people into fewer cars

BAIDU - Baidu is the biggest Chinese search engine and Chinese website worldwide. With the development of 17 years, Baidu has thousands of R&D engineers, who constitute the best technical team around China and even the world.

WAVE COMPUTING - Wave Computing is revolutionizing AI and deep learning with its dataflow-based systems. The company's vision is to bring deep learning to the data, wherever the data is—from the datacenter to the edge of the cloud. Wave's innovative system solutions provide high-performance training and high-efficiency inferencing at scale, enabling companies to drive better business value from their data.

DEEPMIND - DeepMind is on a long-term mission to solve intelligence. We combine the ambitious and interdisciplinary nature of scientific thinking with the energy and focus of a technology start-up to create an inspiring environment where pioneering research and engineering can flourish. This approach sits at the heart of our progress so far, with cutting-edge advances across fields - ranging from deep reinforcement learning and neuroscience to robotics and safety - coming together to create increasingly general-purpose learning systems that can be applied to solve challenges in science, healthcare, and energy.

ALIBABA - ALIBABA GROUP'S MISSION IS TO MAKE IT EASY TO DO BUSINESS ANYWHERE. We enable businesses to transform the way they market, sell and operate. We provide the fundamental technology infrastructure and marketing reach to help merchants, brands and other businesses to leverage the power of the Internet to engage with their users and customers. Our businesses are comprised of core commerce, cloud computing, digital media and entertainment, innovation initiatives and others. Through investee affiliates, Cainiao Network and Koubei, respectively, we participate in the logistics and local services sectors.

APPLE - We're a diverse collection of people, reimagining what's possible to help us do what we love in new ways. The people who work here have reinvented entire industries with the Mac, iPhone, iPad, and Apple Watch, and with services, including iTunes, the App Store, Apple Music, and Apple Pay.

VOLEON - Voleon is a technology company that applies state-of-the-art machine learning techniques to real-world problems in finance. For more than a decade, we have led our industry and worked at the frontier of applying machine learning to investment management. We have become a multibillion dollar asset manager, and we have ambitious goals for the future.

BYTEDANCE - Founded in 2012, Bytedance owns a series of content platforms that enable people to connect with, consume, and create content through machine learning technology. Our flagship product Toutiao is the largest AI-powered content platform in China. Bytedance also operates a series of products popular with mobile users worldwide, including Tik Tok and News Republic.

QUALCOMM - Qualcomm invents breakthrough technologies that transform how the world connects, computes and communicates. When we connected the phone to the Internet, the mobile revolution was born. Today, our inventions are the foundation for life-changing products, experiences, and industries. As we lead the world to 5G, we envision this next big change in cellular technology spurring a new era of intelligent, connected devices and enabling new opportunities in connected cars, remote delivery of health care services, and the IoT — including smart cities, smart homes, and wearables.

ANT FINANCIAL - Ant Financial is a technology company that brings inclusive financial services to the world. Ant Financial, officially founded in October 2014, originated from Alipay founded in 2004. Ant Financial is dedicated to bringing the world more equal opportunities through building a technology-driven open ecosystem and working with other financial institutions to support the future financial needs of society

Neural Information Processing Systems would like to especially thank Facebook for streaming services.

Neural Information Processing Systems would like to especially thank Microsoft Research for their donation of Conference Management Toolkit (CMT) software and server space.

EXHIBITORS

GOLD SPONSORS

TWO SIGMA - At Two Sigma we imagine breakthroughs in investment management, insurance and related fields by pushing the boundaries of what open source and proprietary technology can do. In the process, we work to help real people. Through our investors, we support the retirements of millions around the world and help fund breakthrough research, education and a wide range of charities and foundations. Our engineers and modelers harness data at tremendous scale, using machine learning, distributed computing and other technologies to build powerful predictive models. Come build with us!

MAN AHL - Man AHL is a quantitative investment manager. A pioneer of systematic trading since 1987, we mix machine learning, computer science and engineering with terabytes of data to invest billions of dollars every day. Our collaboration with academia – the Oxford-Man Institute of Quantitative Finance – celebrated its 10th anniversary in 2017. We are a flat-structured company that seeks the best.

ISEE - iSee, an MIT spin-off, is paving the way for autonomous vehicles that can deal with unfamiliar situations and complex interactions on the road. Inspired by computational cognitive science, our humanistic artificial intelligence will seamlessly integrate into society and benefit human lives.

INVENIA LABS - Invenia Labs uses machine learning to optimise the electricity grid, ensure demands are met at least-possible prices and minimum pollution. Our work helps to reduce emissions and pollution, improve the reliability of the grid and increase economic efficiency. We are researchers with backgrounds in machine learning, mathematics, physics, computer science, engineering and economics. In addition to being researchers, we are all interested in problems that have a huge impact on the world, specifically complex systems that involve economic and environmental efficiency along with human health and AI safety.

PREFERRED NETWORKS - Preferred Networks (PFN) is a Tokyo-based startup that applies deep learning technologies to emerging industrial problems. PFN develops Chainer, a deep learning framework. PFN works with many world-leading companies, such as Toyota Motor for autonomous driving, FANUC for manufacturing robots, and National Cancer Center Japan for healthcare. Its subsidiary is located in California.

CIRRASCALE - Cirrascale Cloud Services is a premier provider of dedicated, multi-GPU cloud-based solutions enabling GPU-driven deep learning frameworks and HPC applications. The Company delivers a secure, bare-metal high-performance cloud platform enabling customers to scale their business as needed. To learn more about Cirrascale Cloud Services, visit <http://www.cirrascale.cloud> or call (888) 942-3800.

JANE STREET - Jane Street is a quantitative trading firm that uses innovative technology, a scientific approach, and a deep understanding of markets to guide our business. We employ over 700 people in New York, London, Hong Kong, and Amsterdam. The environment is intellectual and

collaborative; every day, there are new problems to solve and new theories to test. We're always looking for our next great idea.

PONY.AI - Founded in late 2016, Pony.ai aims to build the safest and most reliable self-driving solution and deliver it at a global scale. Pony.ai's fully self-developed software algorithms and infrastructure enables a vehicle to accurately perceive its surroundings, predict what others will do, and maneuver itself accordingly. Pony.ai is a privately held company headquartered in China and in the United States.

V7 - V7's deep learning tech is built to double the pace of scientific progress in humanity's most important searches for cures. We are a London based team operating in stealth. At NIPS we are launching Graphotate, a beautifully designed, semi-automatic image annotation tool for scientific research and applications. Visit our booth to try it and receive an invite code. Graphotate is free for academia.

NAVER LABS - NAVER LABS is an Ambient Intelligence company of NAVER, Korea's leading internet company. NAVER LABS researchers, engineers and designers work on future technologies including autonomous driving, robotics and artificial intelligence. The primary areas of research at NAVER LABS Europe in France are computer vision, natural language processing and machine learning and optimization.

BOSCH - The Bosch Center for Artificial Intelligence, founded in early 2017, deploys cutting-edge AI technologies to generate real-world impact across Bosch products and services. The center's goal is to achieve a leading position for Bosch in AI by attracting top talent, conducting differentiating research, and applying AI for the transformation of Bosch towards an AI-driven IoT company.

TWITTER - Twitter, Inc. (NYSE: TWTR) is what's happening and what people are talking about, all around the world. From breaking news and entertainment to sports and politics, from big events to everyday interests. If it's happening anywhere, it's happening first on Twitter. Twitter is where the full story unfolds with all the live commentary and where live events come to life unlike anywhere else. Twitter is available in more than 40 languages around the world. The service can be accessed at twitter.com, on a variety of mobile devices and via SMS. For more information, visit about.twitter.com or follow [@twitter](https://twitter.com/twitter). For information on how to download the Twitter and Periscope apps, visit twitter.com/download and periscope.tv.

UNITY - Unity is the creator of the world's most widely-used real-time 3D development platform, giving developers around the world the tools to create rich, interactive 2D, 3D, VR and AR experiences.

CUBIST SYSTEMATIC STRATEGIES - Cubist Systematic Strategies, the quantitative investing business of Point72, deploys systematic, computer-driven trading strategies across multiple liquid asset classes, including equities, futures, and foreign exchange. The core of our effort is rigorous research into a wide range of market anomalies, fueled by our unparalleled access to a wide range of publicly available data sources.

WAYFAIR - Through technology and innovation, Wayfair makes it possible for shoppers to quickly and easily find exactly what they want from a selection of more than 10 million items across home furnishings, décor, home improvement, housewares and more. Wayfair is reinventing the way people shop for their homes - from product discovery to final delivery, committed to delighting its customers every step of the way.

PDT PARTNERS - PDT Partners has had significant success over the past 24 years as a quantitative investment manager by using a scientifically rigorous approach to develop and deploy trading strategies. We're looking for people who love digging into challenging, data-driven problems. We have a supportive, collaborative culture, and are committed to being a fantastic place to work!

G-RESEARCH - G-Research uses scientific techniques to produce world-beating predictive research and builds advanced technology to analyse big data. We believe in the science of ideas, where innovation meets imagination. What we create today, predicts tomorrow.

ARM - Arm technologies enable the world's most popular AI platform — the smartphone — including machine learning (ML) features like predictive text, speech recognition, and computational photography. We also enable newer AI platforms like voice assistants and consumer robots that are revolutionizing how people interact with technology and the way technology interacts with the world.

MATHWORKS - The MATLAB and Simulink product families are fundamental applied math and computational tools adopted by more than 5000 universities and colleges. MathWorks products help prepare students for careers in industry, where the tools are widely used for data analysis, mathematical modeling, and algorithm development in collaborative research and new product development.

DISNEY RESEARCH - Disney Research's objective is to drive value across The Walt Disney Company by injecting scientific & technological innovation. Our world-class research seeks to invent and transfer the most compelling technologies enabling the company to differentiate its content, services, and products. Disney Research combines the best of academia and industry, by doing basic and application-driven research.

BENEVOLENTAI - BenevolentAI is the global leader in the development and application of artificial intelligence ("AI") for scientific innovation. It is the largest private AI company in Europe and one of the five largest private AI companies in the world. BenevolentAI has built a leading position in artificial intelligence by developing technologies that deliver previously unimaginable scientific advances, rapidly accelerate scientific innovation and completely disrupt traditional methods of scientific discovery. The technology has been

validated in drug discovery, specifically, in the most challenging field of human biology: the identification of new disease targets.

JUMP TRADING - Jump Trading is a leader in automated trading powered by applied machine learning, high performance computing, and custom hardware. Founded in 1999, Jump Trading remains a privately owned and funded company with an entrepreneurial culture and 600 employees across offices in Chicago, New York, London, Singapore, and Shanghai.

NEXTAI - NextAI is Canada's premiere AI startup accelerator located in Toronto and Montreal - two global hotspots for AI research and commercialization. NextAI is for entrepreneurs, researchers and scientists looking to launch AI-enabled ventures. We provide up to \$200K of seed funding and founder development in the form of in-depth business and technical education taught by award-winning global faculty and entrepreneurs. All NextAI teams are given workspace and in-kind startup perks and access to corporate partners providing resources, including technology tools, data sets and mentorship.

TWENTY BILLION NEURONS - Twenty Billion Neurons is bringing deep learning-based AI to edge computing devices. With TwentyBN solutions, devices from laptop computers to appliances to robots can understand what is happening in the world around them using nothing more than an RGB camera. In training these devices, the company leverages its unique Crowd-Acting platform, on which humans demonstrate the world to machines.

BLOOMBERG - Bloomberg's technology drives the world's financial markets. Bloomberg's core product, the Terminal, is a must-have for more than 325,000 of the most influential people in finance. Our data scientists, engineers and researchers are building machine learning models for predicting the impact of news stories on company prices, recommendation systems, semantic parsing for question answering, topic clustering and classification, sentiment analysis, anomaly detection in time series and a variety of other problems.

D. E. SHAW - The D. E. Shaw group is trusted by investors across the world to manage their assets by seeking the optimal balance of risk and reward. We use a combination of quantitative and qualitative tools to uncover independent, hard-to-find sources of return across global public and private markets. Founded in 1988 over a small bookstore in downtown New York City, the D. E. Shaw group began with six employees and \$28 million in capital and quickly became a pioneer in computational finance. In the early days of exposed pipes and extension cords, tripping on a cable could take out our whole trading system. Today, the firm has more than 1,200 people around the globe and an institutional-grade (and trip-proof) infrastructure, but we still value creativity, entrepreneurship and the spirit of discovery.

INSILICO MEDICINE - Insilico Medicine is committed to extending human performance and longevity using the latest advances in AI. Insilico develops end-to-end AI-powered drug discovery pipelines and it pioneers the applications of the generative adversarial networks (GANs) and reinforcement learning for de novo generation of drug molecules. Insilico received NVIDIA top 5 AI companies for social impact 2017, CB Insights' global top 100 AI companies 2018, and the Frost & Sullivan 2018 North American Artificial Intelligence for Aging Research and Drug Development Award.

IVADO - IVADO aims to bring together industry professionals and academic researchers to develop cutting-edge expertise in data science, operational research and artificial intelligence. With over 1000 affiliated scientists, IVADO is an advanced multidisciplinary centre for knowledge in sectors including statistics, business intelligence, deep learning, applied mathematics, data mining and cybersecurity.

HUAWEI - Huawei is a leading global provider of information and communications technology (ICT) infrastructure and smart devices. With integrated solutions across four key domains – telecom networks, IT, smart devices, and cloud services – we are committed to bringing digital to every person, home and organization for a fully connected, intelligent world.

MORGAN STANLEY - Morgan Stanley is a global financial services firm and a market leader in investment banking, securities, investment management and wealth management services. With offices in more than 41 countries, the people of Morgan Stanley are dedicated to providing our clients the finest thinking, products and services to help them achieve even the most challenging goals.

SBERBANK - Sberbank is a powerful innovative bank which is rapidly becoming one of the major digital financial institutions. Sberbank is an international bank in the top 20 in terms of capitalization with offices in Switzerland, Austria, England, Turkey and a number of European countries. We are actively using artificial intelligence and machine learning technologies to empower our products and services.

COGENT LABS - Based in Tokyo, Cogent Labs provides cutting-edge Artificial Intelligence solutions to solve real-world problems and to improve people's quality of life and work. Our international team conducts advanced applied and fundamental research in machine learning and deep learning to develop high quality products and business solutions, leveraging expertise across a wide range of fields including time-series forecasting, natural language processing and image processing.

NETFLIX - Netflix is the world's leading internet entertainment service with 125 million memberships in over 190 countries enjoying TV series, documentaries and feature films across a wide variety of genres and languages. Netflix uses machine learning across a wide range of core business areas, including: personalization, content creation, and streaming algorithms.

CAPITAL ONE - Capital One is a diversified bank that offers a broad array of financial products and services to consumers, small businesses and commercial clients. A Fortune 500 company, Capital One has one of the most widely recognized brands in America.

SPORTLOGIQ - SPORTLOGIQ is an AI-powered sports analytics company transforming the way fans & teams experience the game. Founded in 2015 by an Olympic athlete and a PhD in computer vision and machine learning, we help teams win more games and broadcasters engage more viewers. We're looking for passionate researchers & engineers to help us transform every aspect of the sports industry with machine intelligence.

YANDEX - Yandex is one of the largest internet companies in Europe, operating Russia's most popular search engine. We provide user-centric products and services based on the latest innovations in information retrieval, machine learning and machine intelligence to a worldwide customer audience on all digital platforms and devices.

SAMSUNG - Samsung semiconductor solutions are the engines that power today's devices. The Samsung U.S. SOC R&D Lab was founded in 2010 as a research center for cellular modem systems and solutions. Over the years, the lab expanded its research and development roles into two main fields, wireless communications and multimedia processing. R&D efforts in wireless communications include 5G cellular New Radio.

BIOMIND - BioMind™ is deeply committed to improving the lives of millions of patients globally through deeptech. Staffed by a mission-driven people who love building great products powered by Artificial Intelligence, the team creates predictive applications to help hospitals diagnose medical conditions and manage healthcare-related problems. BioMind™ AI applications cover a wide spectrum of areas including brain tumours, vascular diseases and pathology.

J.P. MORGAN - At J.P. Morgan, technology is at the core of everything we do to & is the foundation of our exceptional client & employee experience. We have 50,000 professionals that collaborate to design, build, & deploy cutting edge solutions. We hired ~300 people for Machine Learning, AI, & Data Science roles last year & we're looking for more who want to solve big data science problems and change the world.

INSPUR - Inspur is the leader in intelligent computing and ranked top three in worldwide server manufacturing. We provide cutting-edge hardware design and deliver extensive AI product solutions. Inspur provides customers with customized IT infrastructures and AI solutions that are Tier 1 in quality and energy efficiency. Inspur's products are optimized for applications and workloads built for data center environments.

LYFT - Lyft's vision of the self-driving future is shaped around people — not cars. With accessible, safe transportation for everyone, we can redefine our world and reclaim our cities. Engineers at Level 5 are equipping vehicles with the latest advancements in sensors, and applying deep learning to predict and perceive the world around us. We're leveraging route by route data from the million Lyft rides completed every day to both rapidly advance our technology and train our vehicles.

SAS - SAS is the leader in business analytics software and services, and the largest independent vendor in the business intelligence market. With innovative business applications supported by an enterprise intelligence platform, SAS helps customers at 44,000 sites improve performance and deliver value by making better decisions faster, since 1976.

SILVER SPONSORS

XPRIZE - XPRIZE, a 501(c)(3) nonprofit organization, is the global leader in designing & implementing innovative competition models to solve the world's grandest challenges including the \$10M ANA Avatar XPRIZE competition challenging teams to develop a multipurpose avatar system and the \$5M IBM Watson AI XPRIZE competition is challenging teams to develop powerful Artificial Intelligence (AI) applications.

SQUAREPOINT - Squarepoint is a systematic investment manager with deep functional expertise in Quantitative Research, Trading and Technology. We design and build our own cutting-edge systems, from high performance trading platforms to large scale data analysis and compute farms. With main offices in New York, London and Singapore, we emphasize true global collaboration by aligning our teams functionally.

360 SECURITY CENTER - Founded in December 2005, 360 Security Center is a leading internet security service provider in China. Our seasoned technical team is devoted to developing innovative and advanced security technology to protect personal computers and mobile phones. We offer a wide variety of security products, such as 360 Security Guard, 360 AntiVirus, 360 Secure Browser, 360 Safebox and 360 MobileSafe.

ROADSTAR.AI - Founded in May 2017, Roadstar.ai is a Shenzhen & Silicon Valley-based startup specializing in Level 4 autonomous driving technologies. The company has raised US\$128 million in Series-A Funding, marking the largest single-round funding for China's self-driving industry. Roadstar.ai has formed strategic partnerships with OEMs and Tier 1 suppliers from Japan, USA, and Europe.

INCEPTION INSTITUTE OF ARTIFICIAL INTELLIGENCE - The Inception Institute of Artificial Intelligence (IIAI) is a national research organization of the UAE. IIAI is leading fundamental and applied research that pushes the boundaries of AI knowledge and its application for solving complex problems in all domains.

BRIDGESTONE - Bridgestone Corporation, headquartered in Tokyo, is a pioneer in the field of tire and rubber manufacturing. Recently, we launched a dedicated organization Digital Solution Center to further accelerate pushing the boundaries of mobility services by understanding ever-changing customer needs, based on advanced technologies in distributed IoT analytics and sensor-fusion technologies.

EDGESTREAM - Devoted to institutional investment management in an ever-changing world. Focused on quantitative methods and liquid markets across the globe.

LAB41 - Lab41 is an IQT Lab that explores how the U.S. government can leverage emerging machine learning capabilities to impact mission. We're tackling the most difficult challenges in data analytics, in support of the U.S. Intelligence Community. IQT Labs are a part of In-Q-Tel and strive to illustrate the art of the possible. Our projects leverage and contribute to the open source community.

XBRAIN - xBrain develops AI solutions, specialized in Natural Language for businesses. For us machines and people are complementary and by facilitating the collaboration between humans and AI, we empower people to reach their true potential. It's with this mindset that xBrain created satisfaction.AI the first AI powered conversational platform dedicated to disrupt the customer service.

YIXUE INC - YiXue Inc. is a leading AI-based adaptive learning service provider for K-12 students in China. YiXue offers after-school courses for Math, English, Chinese, Physics and Chemistry subjects, powered by its proprietary AI adaptive engine and custom-built courseware. Students can enjoy a supervised adaptive learning experience that has been proven to improve both efficacy and student engagement.

QUADRATURE CAPITAL - Founded in 2010, Quadrature Capital is a small tech business run by programmers. Using cutting edge technologies and complex algorithms, we analyse petabytes of structured and unstructured data to trade in a way that's impossible for humans. Our trading is entirely automated and we look to bring automation to everything we do. Talented people and powerful technology make it all possible.

WESTBOURNE PARTNERS - Westbourne Partners is a boutique recruitment firm and an AI specialist. Our portfolio of clients covers exciting start-ups, global Tech firms & the most successful Hedge Funds. We help our clients gain an edge in the competitive area of talent acquisition & help connect our candidates with well-matched teams in R&D. Our coverage includes Autonomous Driving, AR/VR, Research Labs & Quant Trading.

SOUNDHOUND - SoundHound Inc. turns sound into understanding and actionable meaning. We believe in enabling humans to interact with the things around them by speaking naturally to mobile phones, cars, and every other part of the emerging 'connected' world. Our Houndify platform brings voice-enabled AI to everyone, everywhere, including our Hound voice assistant our SoundHound music recognition app.

PRYON - Developer of an AI platform intended to provide the accuracy and security features necessary for enterprise applications. The company is operating in stealth mode.

PETUUM - Petuum, Inc. is a ML and AI company built upon years of research by leading CMU faculty & students. We are creating a powerful, programmable and distributed everyday tool for managers, engineers and data scientists. With it's omni-lingual (all languages), omni-mount (all hardware), and omni-source (all data formats) platform, Petuum is putting practical AI into the hands of every enterprise.

AITRICS - As a leading AI research group in Healthcare with dozens of papers published at top-tier machine learning conferences, AITRICS aims to deliver predictive, preventive and personalized care, while giving everyone access to the power of data-driven health intelligence. Its rigorous, research-driven approach will lead to optimized precision care, strengthening trust, fairness and transparency.

SCALE AI - SCALE AI is Canada's artificial intelligence (AI) Supercluster dedicated to building the next-generation supply chain and boosting industry performance by leveraging AI technologies.

IVADO LABS - IVADO Labs is a Montreal-based start-up in the heart of one of the fastest growing AI communities in the world. We are building a new organization with a mandate to deliver advanced solutions and software products in the field of data science, operational research and AI. Our goal : to solve the most complex problems and the highest added value for our technological and industrial partners via.

KNIGHT FOUNDATION - Knight Foundation is a national foundation with strong local roots. We invest in journalism, in the arts, and in the success of cities where brothers John S. and James L. Knight once published newspapers. Our goal is to foster informed and engaged communities, which we believe are essential for a healthy democracy.

SIGOPT - SigOpt was founded to empower the world's experts by building software solutions that accelerate and amplify their impact. SigOpt's Optimization Solution automates hyperparameter tuning to improve team productivity, accelerate model development, and scale high-performing models in production.

IMAGIA - Imagia is the artificial intelligence B2B co-development partner for the next generation of healthcare solutions. We unlock AI-driven healthcare research collaborations through the Evidens platform. Evidens removes data access barriers for non-AI-expert clinical researchers, and provides research and discovery infrastructure for both clinical and AI researchers.

OUSTER - Ouster is a leading provider of LIDAR and related robotics technology dedicated to bringing 3D sensing to the masses. We sell the OS-1 and OS-2 LIDAR sensors which are the most capable, powerful, and affordable sensors on the market. We focus on practical, scalable engineering, and pride ourselves on shipping products.

GHELIA - GHELIA Inc. was established in June 2017 as a joint venture between Sony CSL, UEI Corporation, and WIL, LLC.. GHELIA aims to utilize AI technologies not only for business enterprises but also for human enhancement. In order to achieve this, we are working on a new AI platform suitable for lay people to easily develop their own AI systems and freely distribute them across the globe.

PUPIL LABS - Pupil Labs develops open source software and builds accessible hardware for eye tracking. Our mobile eye tracking headsets have research grade specs and enable accessible and scalable eye tracking research. Pupil software ships with state of the art eye tracking algorithms. Pupil Labs enables VR and AR research and development by providing eye tracking add-ons for the latest consumer hardware.

OBSIDIAN SECURITY - Obsidian Security is a data-driven start-up working at the intersection of cybersecurity, artificial intelligence, ethical data science, and hybrid-cloud environments. Founded by Glenn Chisholm, Ben Johnson, and Matt Wolff with backing from Greylock Partners, Obsidian Security is focused on using applied mathematics and machine learning to secure and empower today's hybrid cloud organizations.

FREENOME - Freenome is an AI genomics company on a mission to empower everyone with the tools they need to detect, treat, and ultimately prevent their diseases. By applying advanced machine learning techniques to recent breakthroughs in genomic science, Freenome is developing noninvasive blood tests to detect early-stage cancer and improve precision oncology treatments for millions of patients.

NETEASE FUXI LAB - NetEase Fuxi Lab is an AI developer founded on the principle of bridging artificial intelligence and electronic games through transdisciplinary research. Fuxi focuses on reshaping audiovisual experience of gaming and boosting the development of AI frontier research at the same time.

TENCENT AI LAB - Established in April 2016, Tencent AI Lab is a corporate-level research and application lab of artificial intelligence. AI Lab's vision is to "Make AI Everywhere" for the benefit of people in all aspects of life. Backed by 70 world-class research scientists and 300 experienced engineers in China and US, the lab strives to continuously improve AI's capability.

DIDI CHUXING - Didi Chuxing is the world's leading mobile transportation platform. We are committed to working with communities and partners to solve the world's transportation, environmental and employment challenges by using big data-driven deep-learning algorithms that optimize resource allocation. By continuously improving user experience and creating social value, we strive to build an open, efficient, coll

HEARST - Hearst is one of the nation's largest diversified media, information and services companies with more than 360 businesses. Its major interests include ownership in cable television networks such as A&E, HISTORY, Lifetime and ESPN; global financial services leader Fitch Group; Hearst Health; Transportation assets ; 31 television stations, Newspapers (e.g. Sfgate), and Magazines (e.g. Elle, Cosmo).

SENSETIME - SenseTime is the world's most valuable artificial intelligence (AI) unicorn focusing on computer vision and deep learning. The company has raised a total financing of more than US 1.6 billion and is valued over US 4.5 billion. With the mission of leading AI innovation to power the future, SenseTime has independently developed a deep learning platform, supercomputing centers, and a range of AI..

SILVER SPONSORS

ENIGMA - Our mission is to empower people to interpret and improve the world around them. We do this by transforming how data is seen and used in the enterprise. Enigma connects internal and external data to surface insights that inform business decisions, solve problems and unlock new opportunities

PARIS REGION - Enjoying a leading economic position in Europe with more than 500,000 firms, 29 Fortune Global 500 company headquarters, and 150,000 researchers, Paris Region, also called in France "Region Île-de-France" ranks among the most competitive regions for research and development, innovation, and entrepreneurship and aims to become a world leading hub for artificial intelligence

ASCENT ROBOTICS - Ascent Robotics, through the influence of theoretical neuroscience, is developing a new algorithmic approach to robotic control. Building intuitive and interpretable full stack AI across autonomous vehicles and industrial robotics. Since inception in 2016, the company has attracted talented individuals to solve the world's most complex issues.

GROQ - Groq is a semiconductor company building easy to use, high TOPS/Watt machine learning accelerators with sub-millisecond latency. Learn more at www.groq.com.

SK TELECOM - SK Telecom is Korea's largest telecom company with more than 29 million mobile subscribers and actively developing powerful platforms (Lifestyle Enhancement, Media and IoT) aimed at delivering optimal value to customers. AI Research Center and research group 'T-Brain' is focused on advancing fundamental AI research while also producing practical applications on SKT's own data and service platform.

VERISK ANALYTICS - Verisk Analytics is a leading data analytics provider serving customers in insurance, financial services, energy and specialized markets. We've been delivering data, analytics, and decision support services to our customers for more than 45 years. We're a socially responsible global company operating in 30 countries around the world.

HABANA LABS - Habana Labs was founded in 2016 to unlock the true potential of AI by providing an order of magnitude improvements in processing performance, cost and power consumption. The company set out to develop AI processors from the ground up, optimized for the specific needs of training deep neural networks and for inference deployment in production environments. Habana Labs is a fabless semiconductor company located in Tel-Aviv, Israel and San Jose, California, employing over 120 people worldwide.

EXPEDIA - Expedia is one of the world's leading full-service online travel brands helping travelers easily plan and book travel from the widest selection of vacation packages, flights, hotels, rental cars, rail, cruises, activities, attractions, and services. Our scientists combine their passion for travel and expertise in ML/AI to solve some of the most complex computational problems in the travel domain.

ARGO AI - Argo AI was founded to tackle one of the most challenging applications in computer science, robotics and artificial intelligence with self-driving vehicles. Argo AI is developing and deploying the latest advancements in artificial intelligence, machine learning and computer vision to help build safe and efficient self-driving vehicles that enable these transformations and more. The challenges are

APTIV - Aptiv is a global technology company that develops safer, greener and more connected solutions, which enable the future of mobility. Headquartered in Dublin, Aptiv has 147,000 employees and operates 14 technical centers, as well as manufacturing sites and customer support centers in 45 countries. Visit aptiv.com.

NASPERS - Naspers is a global internet and entertainment group and one of the largest technology investors in the world. www.naspers.com.

PARALLELM - ParallelM is the first and only company delivering machine learning operationalization (MLOps) at scale. ParallelM's breakthrough MCenter™ solution is built specifically to power the deployment and management of machine learning pipelines in production, so that companies can scale machine learning across their business applications.

HSBC - HSBC is one of the world's largest banking and financial services organisations. With around 3,800 offices in both established and emerging markets, we aim to be where the growth is, connecting customers to opportunities, enabling businesses to thrive and economies to prosper, and, ultimately, helping people to fulfil their hopes and realise their ambitions. www.gbm.hsbc.com

HUDSON RIVER TRADING - Hudson River Trading brings a scientific approach to trading financial products. We have built one of the world's most sophisticated computing environments for research and development. Our researchers are at the forefront of innovation in the world of algorithmic trading. At HRT we are mathematicians, computer scientists, statisticians, physicists and engineers. We research and develop automated

LIONBRIDGE - The Global Services for Machine Intelligence team at Lionbridge provides human-powered services to support our customers' AI efforts by providing unparalleled scalability and complete global coverage. For more information about Global Services for Machine Intelligence, Lionbridge, please contact GSML@lionbridge.com

GSA CAPITAL - GSA Capital is a multi-award winning investment manager that has been delivering exceptional results to global investors for over 15 years. With offices in London, New York and Hong Kong, GSA Capital combines a world-class proprietary platform with innovative thinking to develop and deploy systematic and process-driven investment strategies across all asset classes, geographies and timescales.
