BELAGRO

"The exhibition BELAGRO reflects the dynamics of the implementation of the country's main directions in agro-industrial area. This forum definitely reflects the achievements of agro-industrial complex of Belarus and can truly be considered an annual synthesis of international experience. BELAGRO is extremely popular among our foreign partners."

Minister of Agriculture and Food

"The exhibition BELAGRO is a kind of summary on the achievements of agro-industrial complex. The interest in the exhibition is very high. A large number of contracts are usually signed at the exhibition. We can say for sure that the exhibition is always a success."

Deputy Prime Minister

"The exhibition BELAGRO displays not only samples of achievements of agricultural sector. We aimed to show that Belarus is a highly developed industrial country that is possesses modern mechanical engineering complex and latest technologies. This exhibition is also a platform with a great opportunity to discuss new projects, meet potential partners, and sign new contracts."

Chairman of the Republican Council of the National Assembly of Belarus

By the number of presented innovations, BELAGRO is the leading business platform of the country.

As a rule the exhibition is accompanied by extensive business program, which includes more than 40 events in various areas of agro-industrial sector: forums, conferences, B2B meetings, seminars, competitions, presentations, demonstrations, etc.
