Neil J.A. Sloane,
A.T.&T. Bell Laboratories 2C-376,
600 Mountain Avenue,
Murray Hill NJ 07974, U.S.A.

Dear Neil,

I enclose Mousetrap.

We (other Richard & I) would love to know the story behind the changes in sequences #1186 & #1635 in the first edition to A2468 on p. 165 & A2469 on p. 221 in the version you gave me on 91-07-29. We only discovered that they were wrong (in Steen's paper & in your first edition) after considerable analysis & computation.

note that we give you two lines of info for one of them

At the foot of page 3, you'll note that we hope to appear in your second edition. On the other hand, I also hope that we're too late, 'cos it's hi time it appeared. If we **are** in time, then we have a countable infinity of new sequences for you, a finite number of which you can glean from the enclosed pages.

& that they are easily deduced for the other.

We'll try to reach you by email. You can reach us at either rkg@cpsc.ucalgary.ca or rjn@cs.dal.ca

Best wishes to you both,

Yours sincerely,

Richard K. Guy
Emeritus Professor of Mathematics
