Dear Neil Sloane,

Thanks for your recent letter. I don't know whose ~~alt~~ address you got in NSW, but I've never been there, not even temporarily. As you will see in the enclosed, I had already found the error in H(4) - a slip of the hand in copying at one point - my older manuscripts have it correct. I believe I managed to catch this in the proofs of my article. I will send you a reprint when it appears. I'm very grateful for your confirmation of my numbers, I calculated them by hand because the terms are too ~~big~~ big for

single-precision calculations.

Perhaps you'd like to try  
finding 101 for the 9-dimensional octahedron  
or the 5-dimensional cube.

Regards,

David Singmaster
