## 1-8x24 FFP RIFLESCOPE

### OVERVIEW

Your AR is already one of the most versatile weapons ever created. Top it with a Strike Eagle® 1-8x24 FFP and not only do you the accurate holdovers at any magnification you've been looking for to get the most out of your rifle, you get a way to make range day even better. Powering the Strike Eagle® 1-8x24 FFP is the EBR-8 reticle, which provides true red dot-like performance at 1x and holdovers out to 600 yards, and a ranging feature. Nine daylight and two night-vision settings allow you to dial the center interrupted circle and dot to exactly match your lighting conditions. Rounding out the internals, an HD optical system and fully multi-coated lenses deliver a crisp sight picture to pick out targets faster. To stand up to getting knocked around in the field, the 30mm tube is made of aircraft grade aluminum, and capped turrets keep your zero locked in, so you can run and gun if you need to. The included throw lever makes for rapid magnification changes, ensuring you're ready for any target at any distance. With the Strike Eagle® 1-8x24 FFP you have an all-new way to make range day even better.

### WHY DID WE MAKE THESE SCOPES?

Since the debut for the Strike Eagle® 1-8x24 SFP, users have requested the same great optical performance with an illuminated First Focal Plane reticle to provide accurate holdovers out to 600 yards.

### WHAT ARE THE TOP USES FOR THESE PRODUCTS?

The top use will be target shooting.

### HOW DOES THIS UNIT COMPARE TO OTHER MODELS?

SKU	MAP	MAGNIFICATION X OBJECTIVE LENS DIAMETER	FOCAL PLANE	RETICLE	ILLUMINATION	EYE RELIEF	LINEAR FIELD OF VIEW (@ 100 YDS)	ZERO STOP	TUBE SIZE	PARALLAX SETTING	LENGTH	WEIGHT
<b>VIPER® PST™ GEN II</b>												
PST-1607	\$599.99	1-6x24	SFP	VMR-2 MRAD	Yes	3.8"	112.5' - 18.8'	N/A	30mm	100 yds.	10.8"	22.7 oz.

# STRIKE EAGLE®

1-8x24 FFP RIFLESCOPE

## WHAT IS THE BENEFIT OF FIRST FOCAL PLANE (FFP) VS SECOND FOCAL PLANE (SFP) RETICLE?

A Second Focal Plane reticle is visually consistent in size and weight across the magnification range; however, the subtension values are only accurate on one magnification, typically the highest. In contrast, a First Focal Plane reticle will scale with magnification, and the subtensions used for ranging, holdovers, and wind corrections will be accurate at all magnifications.

## IS THIS SCOPE'S ILLUMINATION TRUE DAYLIGHT BRIGHT?

No, however the illumination is bright enough to work well for all applications.

## IS THIS SCOPE NIGHT-VISION COMPATIBLE?

Yes, the two lowest illumination settings are designed for use with night-vision.

## WHAT IS THE EXPECTED BATTERY LIFE FOR THIS SCOPE?

The expected battery life at illumination setting 5 is 47 hours.

## AM I ABLE TO USE THE SCOPE WITHOUT ILLUMINATION?

Yes, the Strike Eagle® 1-8x24 FFP features a glass-etched reticle that can be used without illumination.

## WHAT IS THE BENEFIT OF A 125 YARD FIXED PARALLAX?

Fixing the parallax at 125 yards allowed this scope to have an increased depth of field for better optical quality to further distances and decreased parallax error at longer ranges.

## WHERE IS THIS UNIT MADE?

China.
