

VideoCutLER: Surprisingly Simple Unsupervised Video Instance Segmentation

Supplementary Material

A. Appendix

Figure A.1. We present additional qualitative visualizations (Figures A1-A5) showcasing the zero-shot unsupervised video instance segmentation results of VideoCutLER on YoutubeVIS. VideoCutLER is pretrained on image dataset ImageNet-1K and directly evaluated on video dataset YouTubeVIS.

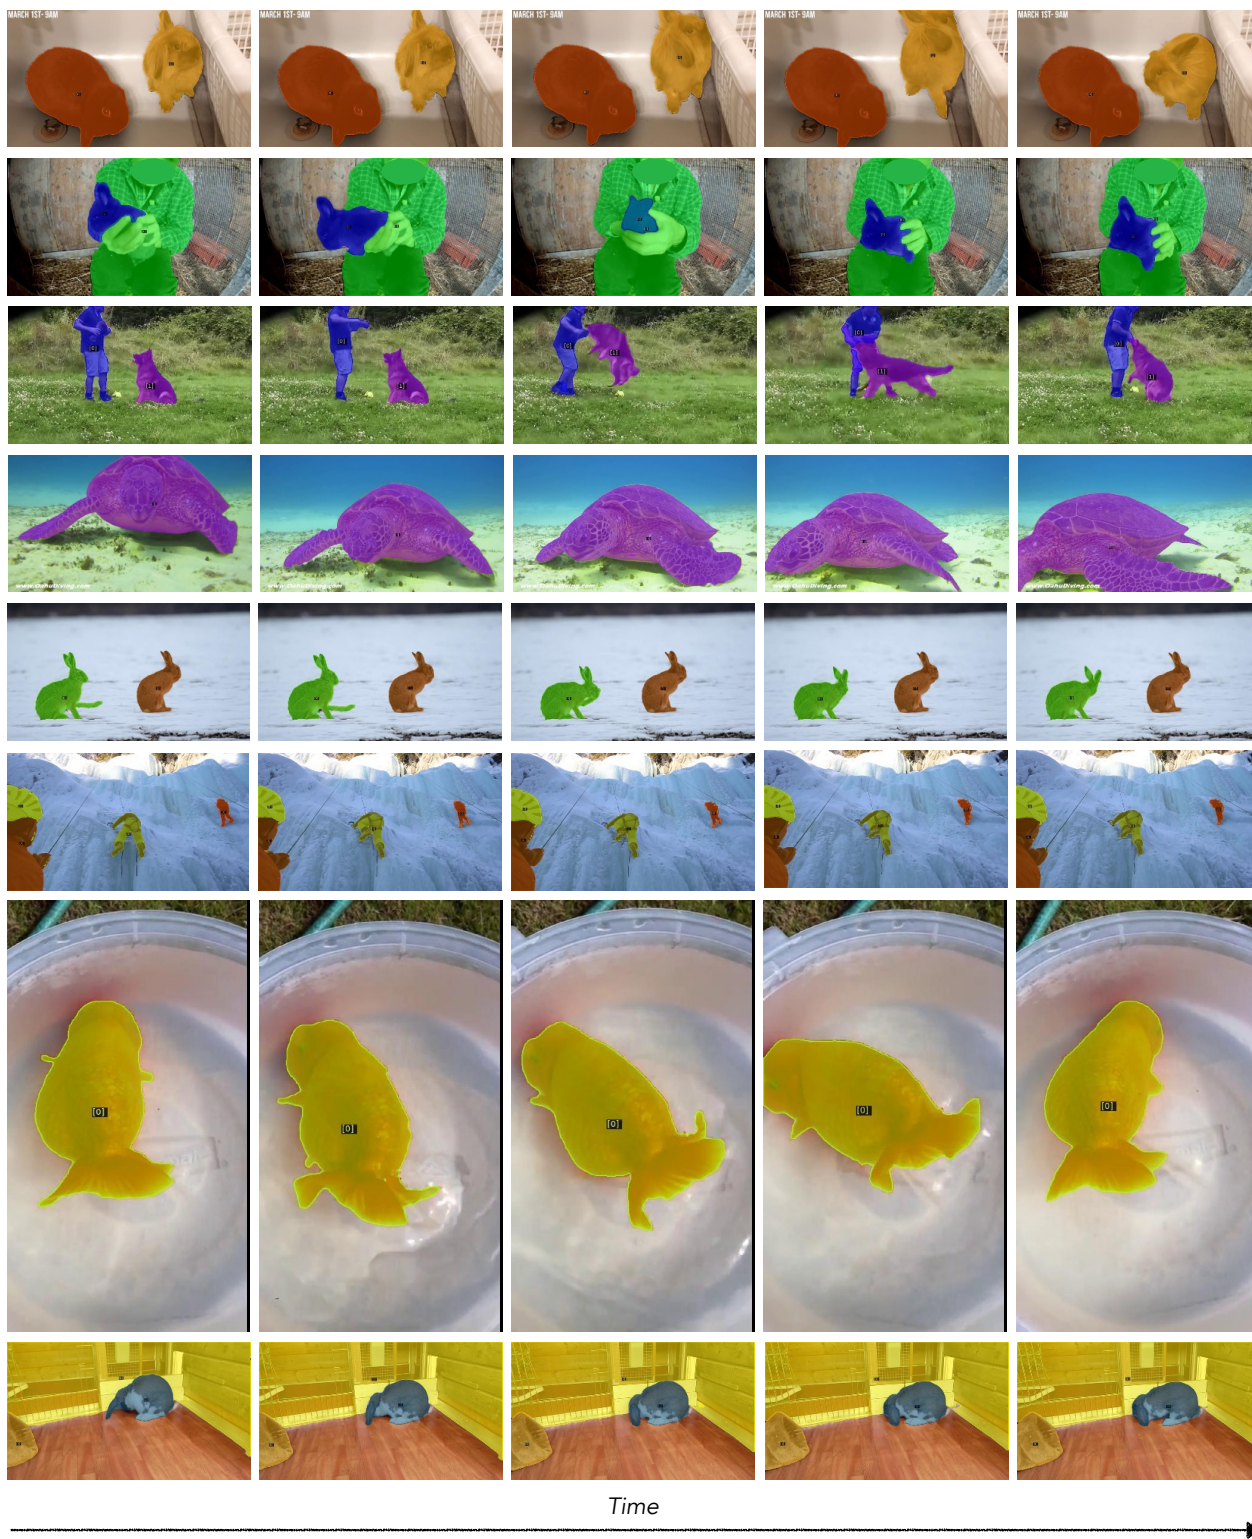

Figure A.2. Additional qualitative visualizations.

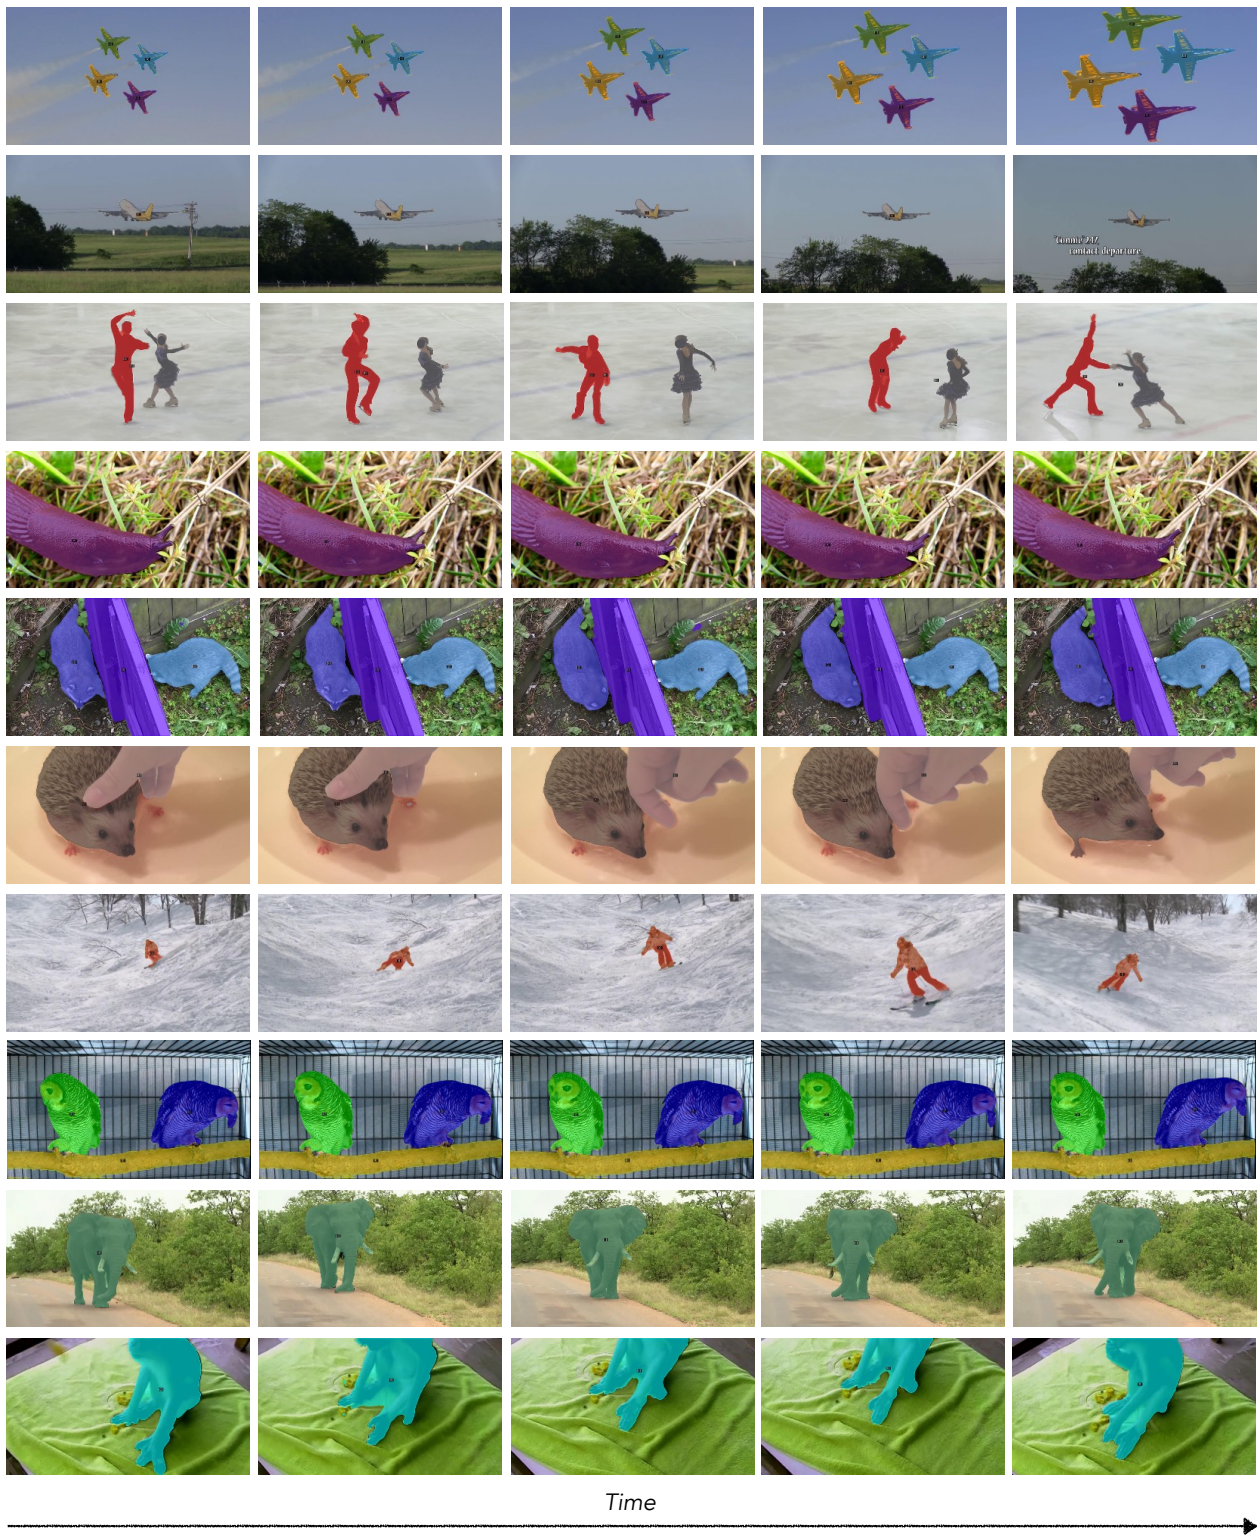

Figure A.3. Additional qualitative visualizations.

Figure A.4. Additional qualitative visualizations.
