

Sensors and Materials

Special Issue on Advanced Sensors Materials and Processes

Call for Papers

There are many applications where sensors, such as strength, distance, height, and pressure sensors, are used daily. Sensors are also heavily used in aerospace, intelligent manufacturing, and IoT. This special issue focuses on the advanced materials and processing technologies of sensors used in everyday life, manufacturing, and IoT applications, including materials, systems, design, and manufacturing techniques. The materials used can be carbon, metals, ceramics, polymers, and related composite materials. We also welcome papers on sensor applications of biomolecular materials, microorganisms, and various organic and inorganic materials.

Scope:

Sensor design	Sensors in life
Sensor materials	Sensors in manufacturing
Sensor applications	Sensors in IoT
Sensor fabrication	Sensors in systems
Intelligent sensors	Sensors in biomedicine

Submission due date: ~~December 31, 2023~~ > **extended to June 30, 2024**

Journal website: <https://sensors.myu-group.co.jp/>

Guest Editors: Shih-Chen Shi (National Cheng Kung University) and
Tao-Hsing Chen (National Kaohsiung University of Science and Technology)

Submit to: Online Manuscript Submission System (<https://myukk-org.ssl-xserver.jp/form/>)

(Attention)

As stated in Instructions to Authors in the Guidelines, the author(s) will be obliged to pay the publication fee upon the acceptance of the manuscript for publication (for example, JPY 123200 for 10 pages in *Sensors and Materials* format). If the quality of the English of your manuscript does not satisfy the journal standards, the authors must bear the proofreading fee (JPY 10000–40000), which will be charged in addition to the publication fee.

If you have any questions, please feel free to contact the editorial staff at the address below.

Editorial Department of *Sensors and Materials*
