Knowledge Management Insights

All your organization's knowledge easily accessible and actionable.

Countless hours are spent searching for content, researching, and finding the right subject matter experts within your organization. Besides being costly, it can cause a lot of frustration among employees. Especially nowadays, in a difficult economic environment and companies facing a permanent lack of highly qualified staff or a high employee turnover. A smarter and more efficient way to ensure the findability of relevant information is essential to successful knowledge management.
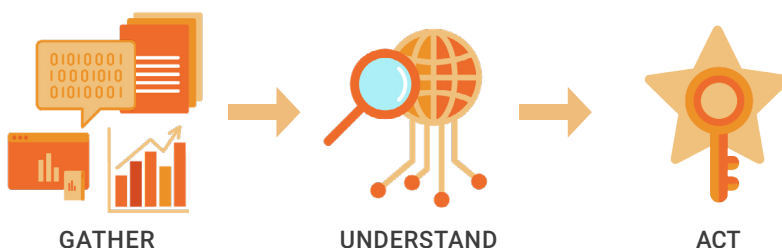

WHAT'S IN IT FOR YOU?

Squirro Knowledge Management Insights is a preconfigured AI-enabled solution connecting all your siloed data sources, marrying content with the user's intent and context. It provides a unified search across all your organization's knowledge and delivers the insights you need for intelligent decision-making in a secure and compliant manner.

Squirro's leading Semantic Enterprise Search and Insight platform generates insights from any content and data by employing Composite AI, combining technologies such as machine learning and NLP, Generative AI, and graph technologies.

HOW IT WORKS

Squirro Knowledge Management Insights connects all your organization's siloed internal, external, and premium knowledge sources. It makes all these data computable, and It allows combinations of multiple data views into dashboards to stay on top of your knowledge.

GATHER   UNDERSTAND   ACT

Delivered as a public or private cloud or on-premise solution, it is ready for stand-alone use or easily integrated into any enterprise software. The solution is built to scale both vertically and horizontally.

BENEFITS

- Do you need to work with data and generate insights from various sources stored in multiple siloed applications?

- Are you interested in bringing your new hires up to speed significantly faster?

- Will your employees benefit from instantly identifying the right experts to talk to?

- Will your company benefit from eliminating potential double work caused by a lack of understanding of what is already in place?
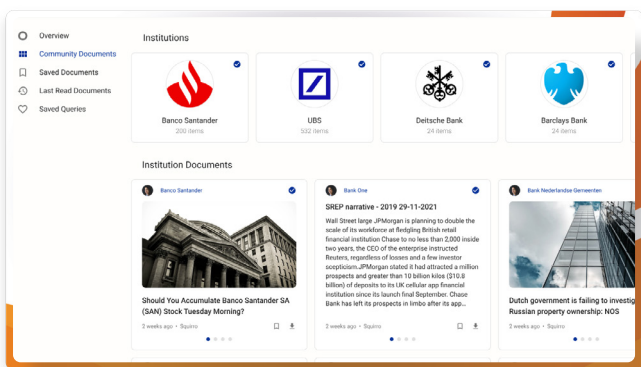

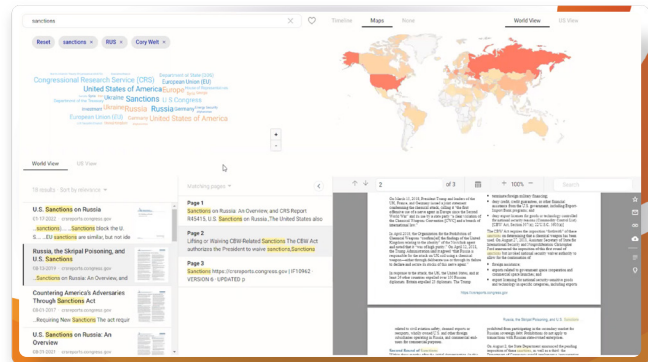

FEATURES

- **Discover insights**
  The search-based, intuitive interface allows users to discover new insights naturally.

- **Aggregate all Data Sources**
  Get unified access to your data regardless of its origin or format.

- **Composite AI**
  Relevant insights by marrying content with context and intent using knowledge graphs and with the full power of Generative AI in your enterprise environment.

- **Concept Search**
  Search a concept (e.g., based on a document or a paragraph) instead of keywords.

- **Enrich**
  Enrich your data with sentiments, entities (relevant categories), tags, and locations, to highlight different data dimensions.

- **Instant Analytics**
  Connect and visualize your data in minutes.

- **Share in Seconds**
  Publish a dashboard with a few clicks to share live on the web, mobile, or integrated with your internal systems.

- **Stay informed**
  Receive automated notifications and alerts for the topics relevant to you.

1 COMPOSITE AI ENABLED KNOWLEDGE MANAGEMENT

Squirro connects all your siloed structured and unstructured content from internal, external, and premium sources and lets you search in an intuitive manner. With features like advanced type-ahead, synonym recognition, subject matter expert finder, and much more, Squirro's Composite AI solution is a true game changer for knowledge management.

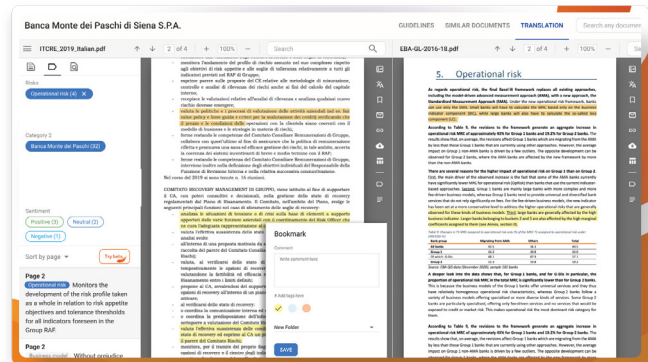

2 COMMUNITIES AND RECOMMENDATIONS

Squirro creates communities based on your internal classifications and taxonomies. Communities let users subscribe and browse content they are interested in. Thanks to advanced AI capabilities, our solution can also continuously provide you with content recommendations tailored to your intent and needs.

3 MANAGE UNSTRUCTURED DATA EFFICIENTLY

Search and reference multiple unstructured documents simultaneously, irrespective of language. Intuitive bookmarking and note-taking functionalities allow you to build a knowledge reference library to easily return to or share with colleagues.
