Risk Insights

Revolutionizing Risk, Compliance, and Audit Management Processes with Artificial Intelligence

Augmenting human intelligence with powerful AI for risk, compliance, and audit management greatly assists in the day-to-day work processes. It drastically improves the efficiency and quality of work results. In the current challenging economic environment, Squirro's AI solution supports companies in overcoming the prevailing high employee turnover, keeping the cost base under control, and sometimes avoiding severe errors caused by overlooking relevant information or failing to recognize potential risks.

—— EXPLORE
What is Risk Insights?

Squirro's innovative AI solution is the key to overcoming the challenges in modern risk, compliance, and audit management through combining AI technologies such as an Insight Engine, Semantic Enterprise Search, Knowledge Graphs, and Generative AI.

This preconfigured AI solution connects all your organization's siloed internal, external, and premium data, marrying the content with the user's intent and context. It makes all this data computable, extracting the most relevant insights, and allows combinations of multiple data views via dashboards to stay on top of your risk, compliance, and audit management.

Delivered as a public or private cloud or on-premise solution, it is ready for stand-alone use or easily integrated into any enterprise application. The solution is built to scale both vertically and horizontally with all relevant access rights and security features.

GATHER → UNDERSTAND → ACT

CHALLENGES

- Do you have to deal with ever-growing amounts of data in various file formats from many unconnected applications?

- Are you noticing a high share of manual work in risk, compliance, and audit processes due to the length and complexity of the documents used?

- Do you often juggle several versions of the same document, which increasingly deviate from each other over time?

- Do you miss a 360° overview of all relevant internal and external documents?
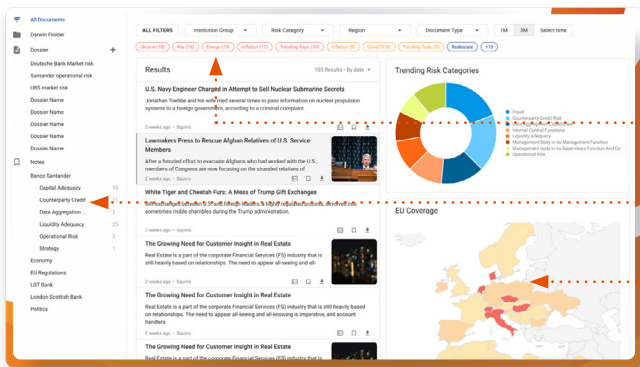

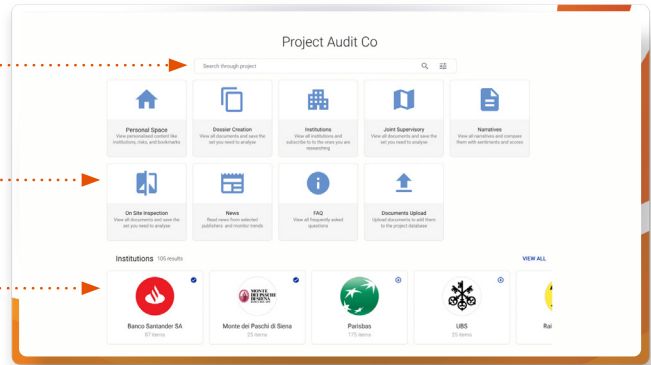

HIGHLIGHTS

- **Summarization and Question Answering**
  The latest Generative AI technology is used in an enterprise context to summarize the content of the relevant documents and answer dedicated questions.

- **Personalization**
  Knowledge graphs technology provides highly personalized relevant content and insights based on the user's role, intent, and context.

- **360° Dashboard**
  Aggregate all relevant data from different sources and with various formats to effortlessly synthesize the complete picture.

- **Semantic Enterprise Search**
  For automated recognition of relevant content. Regardless of different input and output languages.

- **Reference Viewer**
  A dashboard that enables efficient comparison of all the relevant documents and references.

- **Efficient Collaboration**
  Note-taking directly in the respective documents, contributing to the continuous growth of the company's internal know-how.

- **Workflow support**
  Dossier and report creation to easily track and share all relevant information.

swiss safety center · certified system

360° DASHBOARD

- **Semantic Enterprise Search**
  Comprehensive semantic enterprise search across all documents.

- **Workbench Applications**
  Specific workflow setups for individual audit tasks; dossier creation for specific cases.

- **Key Institutions & Highlights**
  Key elements to act on when institutions you follow publish new documents, automatically highlighted.
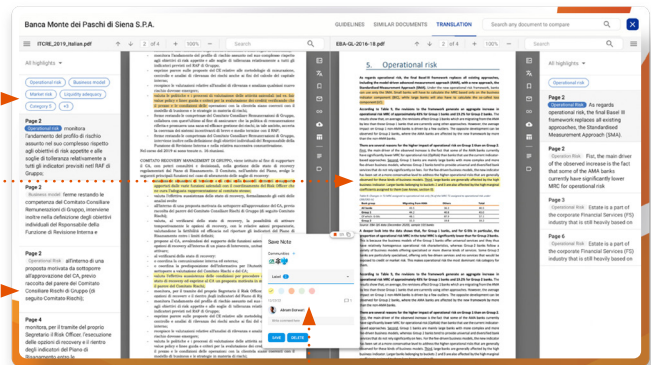

AUDIT WORKFLOW

Filter Options
Ability to navigate complex document collections easily

Overview Dashboard
Dashboard to show main items and initial risk assessment.

Risk Assessment
Widgets visualize additional vectors in the dataset.

REFERENCE VIEWER

- **Reference Viewer**
  A true novelty that allows for a side-by-side view of multiple documents.

- **For example**
  In a credit report, the relevant regulations are automatically referenced.

- **Classification**
  Each document is automatically classified and synchronized.

- **Note-taking**
  Each note may be eventually exported to create reports.
