Western blot reaction of alkaline phosphatase-labelled polyclonal antibodies to the expressed protein of CCV ORF7 (CP) with extracts from the reference sample of CYLV (DC119) from the Netherlands (lane 1), carrot leaves infected with a German CCV isolate from Frankenhausen (lane 2), non-infected carrot leaves (lane 3), and with the recombinant ORF7 protein (CP). Lanes M show the migration of the pre-stained marker proteins (Biorad), the approximate sizes of which are indicated on the right.
