

**A****iPS-3F****iPS-4F****B****iPS-3F****iPS-4F**

**Supplementary Figure 8** AA does not influence the apoptotic statuses of differentiating iPSCs. A and B, TUNEL (A) and Annexin V-PI (B) staining analysis showed apoptotic and necrosis indexes of both iPSC lines at differentiation day-5. Data are collected from three experiments and expressed as means  $\pm$  SEM. ns, no significant difference.
