# The effects of handedness on sensorimotor rhythm desynchronization and motor-imagery BCI control
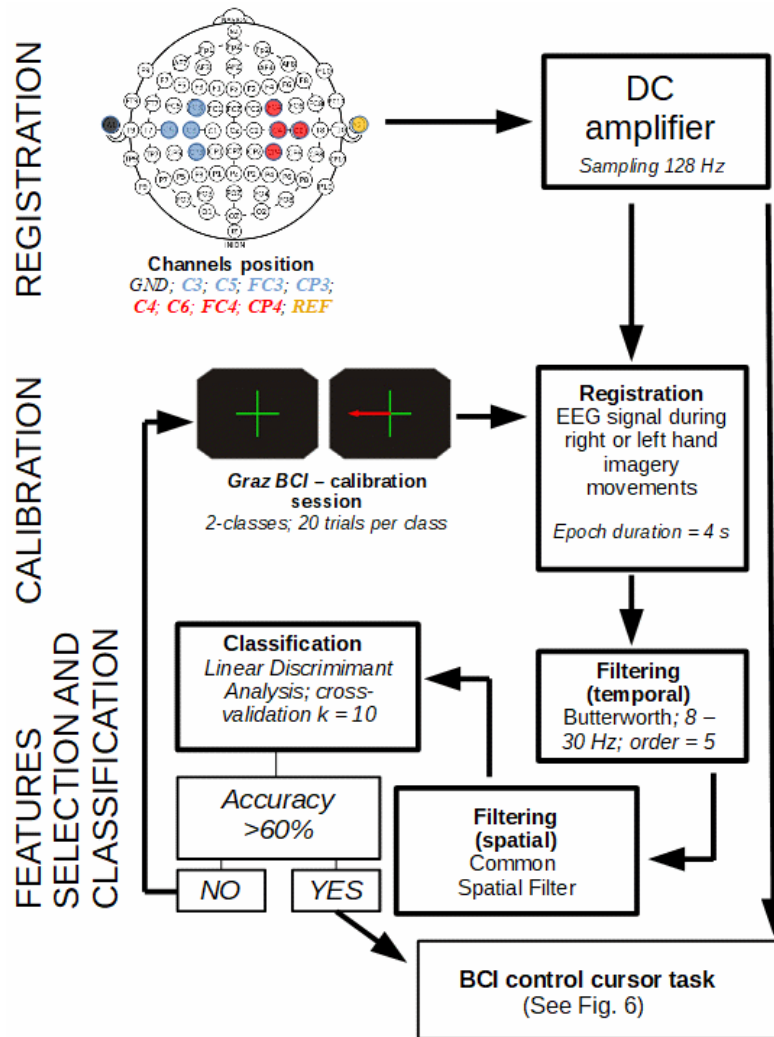

Dariusz Zapała, Emilia Zabielska-Mendyk, Paweł Augustynowicz, Andrzej Cudo, Marta Jaśkiewicz, Marta Szewczyk, Natalia Kopiś, Piotr Francuz

Supplementary Figure 1. Avarage scalp maps for all clusters. Ss – number of subjects; ICs – number of sources.

Supplementary Figure 2. Estimated dipole locations of ICs (*blue dots*) with MNI coordinates of cluster centroid and the probabilistic position in anatomical and Brodmann areas (*table*).

Supplementary Figure 3. The scheme of signal processing in the off-line session.
