

Experienced pattern of packet loss process

Legend

- G_i : Gap duration of i^{th} pair
- B_i : Burst duration of i^{th} pair
- $MOS_P^i(G_i, B_i)$: The MOS score attributed to i^{th} pair, that refers to the perceived quality following the periodic application of (G_i, B_i) pattern

$$MOS = \frac{\sum_i (G_i/10) MOS_P^i(G_i, B_i)}{\sum_i (G_i/10)}$$
