Casein Comparison

Casein Comparison-Run.1

Casien poor candidate

In this experiment the top match from PlasmoDB was gene ID PF11\_0377 which encodes *P. falciparum*s casein kinase 1. So, we don't believe that >gi|23199991|ref|NP\_689407.1| casein kinase 1 epsilon [Homo sapiens] would be a good candidate for a malaria drug therapy.
