

This Figure shows the sample segmentation results for all nine networks. The first three columns are the results for brain scans with one channel while the second three columns are the results for brain scans with three channels. The last three columns are breast images. "Org" and "GT" show the original image and ground truth mask. "O", "P", and "U" denote O-Net, PSP-Net, and U-Net decoders, respectively. "Res", "Vgg", and "Sim" denote Res-net, Vgg-Net, and Simple encoders, respectively.
