How to request keys and setup systems Recommendations

SAP Global License Audit & Compliance

PUBLIC

THE BEST RUN **SAP**

General remarks

➢ On the following slides you will find details of the Installations required on your account in order to request license keys and create systems.

Important:

➢ During the license key request process, the selected installation number will only display the licenses contractually tied to that installation number.

➢ If a product is not shown it may be that the contractual license is not tied to the selected installation number

➢ In such cases, please contact the SAP Order Management to provide the correct installation numbers tied to your contractual licenses.

Create system without license key and request installations

➢ Please note in case a product does not need a key you still use the license key request application to create a system.

➢ New Installations can be created under https://support.sap.com/keys-systems-installations/installations.html

➢ If you need help please create a ticket for the component XX-SER-LIKEY

Simplification of key request

Request any kind of license keys under any kind of installations

	Product of installation number					
Product (range) of key/system request		Classic SAP (ERP, CRM, SRM, NW...)	SAP BusinessObjects / Analytics	SAP Sybase	SAP Business One	SAP Solution Manager
	Classic SAP (ERP, HANA, CRM, SRM, NW...)	✅	✅	✅		
	SAP BusinessObjects / Analytics (package overview on slide 6/7/8)	✅	✅	✅		
	SAP Sybase	✅	✅	✅		
	Other products (product overview on slide 5)	✅	✅	✅		
	SAP Business One / SAP Business One OEM edition/ SAP Business One version for HANA		Lumira for B1 Crystal Dashboard for B1		✅	
	SAP Solution Manager					✅ *

Explanation: ✅ ➡ License key request possible

* We recommend using a Solution Manager installation when creating a Solution Manager system

Other products
