Where to request a Namespace

[Direct Link to Development Namespaces](#)

The screenshot shows the SAP Support interface. At the top, there is a navigation bar with 'SAP Support' and various menu items like 'My Support', 'Products', 'Tools', 'Maintenance', 'Offerings & Programs', 'ALM', and 'Explore SAP'. Below this, a breadcrumb trail shows 'Keys' > 'Overview' > 'License Keys' > 'SSCR Keys' > 'Migration Keys' > 'Namespaces' > 'USPS Unlock Code'. The main content area is titled 'Development Namespaces' and contains the following text: 'Development namespaces enable you to develop enhancements and solutions without having to agree on naming conventions with third parties. You can deploy your enhancements and solutions in any system around the world without the risk of name conflicts.' Below this, there are two bullet points: '✓ SAP partners and customers can exclusively reserve and use development namespaces.' and '✓ SAP allocates namespaces centrally to ensure they are exclusive. Partners and customers can only develop in reserved namespaces if their system includes a namespace-specific development key.' A blue button labeled 'Launch the Development Namespaces Application in SAP for Me' is positioned below the text. At the bottom of the page, there is a link for 'Development Namespaces Help'.

If you are using the Development Namespace application for the first time and no Namespace has been created yet, you get the following information:

The screenshot shows the SAP Namespaces application interface. At the top left, it says 'Namespaces Recently used' with a red circle containing the number '1'. To the right, it says '0 of 0' with three dots. Below this is a search bar with the word 'Search' and a magnifying glass icon. In the center of the page, there is a blue bird icon holding a bottle. Below the icon, the text reads: 'No recently used namespaces. Recently used Namespaces will appear after you accessed them.'

Click on Namespaces (1) to request a new Namespace.

Request a new Namespace

- 1 Click on Create Namespaces.
- 2 Insert Namespace Name and Description.
- 3 Click Create.
- 4 Mark the checkbox "I agree".
- 5 Confirm.

Click Create and your Namespace is created immediately.

CUSTOMER NUMBER	INSTALLATION	PRODUCER LICENSE/DEVELOPMENT KEY	CUSTOMER LICENSE/REPAIR KEY	REQUESTED BY	REQUESTED AT
1105772 SAP Test	206C1255 SAP Solution Manager	-	-	SAP SAP	
1208936 SAP Test Account - aPaul Pharma	206C2211 Installation AH1	-	-	SAP SAP	
1208936 SAP Test Account - aPaul Pharma	206C2217 ERP Standard Support	-	-	SAP SAP	
1208936 SAP Test Account - aPaul Pharma	20682223 ERP ESsupport	-	-	SAP SAP	
1208936 SAP Test Account - aPaul Pharma	20702214 NW Standard Support	-	-	SAP SAP	

- 1 Customer data.
- 2 S-User and Namespace description can be changed.
- 3 Filter functions.
- 4 Export of the data provided on the Card corresponding to the filters used.
- 5 Click to create Producer/Development and Customer/Repair Key in the line of installation number requested.

Add External Assignment to another customer and installation number outside of your company

The screenshot shows the SAP Systems & Provisioning interface for namespace /TEST15/. The main table lists installations for customer 1208936. A modal dialog 'Add External Assignment' is open, showing fields for 'Installation Number' and 'Customer Number'. A 'Confirmation' dialog is also open, asking to confirm the installation number 2016222 as an external assignment. Red numbers 1 through 4 indicate the steps: 1. Click 'Add External Assignment', 2. Enter 'Installation Number', 3. Click 'Add', 4. Click 'Confirm'.

- 1 Click on Add External Assignment.
- 2 Add Installation Number.
- 3 Click Add.
- 4 Confirm – External Assignment is created.
- 5 Keys are now visible at the customer which provided Installation Number.

Delete External Assignment

The screenshot shows the SAP Systems & Provisioning interface for namespace /TEST15/. The 'External Assignments' tab is selected. A table lists external assignments for customer 1208936. A red number 1 points to the 'External Assignments' tab, and a red number 2 points to the trash can icon next to the assignment. The assignment details are: Customer Number: 2018, Installation: NW, External Assignment.

- 1 Click tab External Assignment.
- 2 Click trash can to delete the External Assignment.

Reassignment / Move to another customer and installation number outside of your company

The screenshot shows the SAP Systems & Provisioning interface for namespace /TEST15/. The 'Reassign Owner' button is highlighted with a red number 1. A modal dialog 'Reassignment of Namespace Owner' is open, showing the message: 'You need to create a case to reassign a namespace to another company/owner. For more details, see KBA 3004591.' A red number 2 points to the dialog, and a red number 3 points to the 'Create Case' button.

- 1 Click Reassign Owner.
- 2 Follow the instructions in the pop-up that appear.
- 3 Create Case with all necessary data.

Generates a xlsx with all SAP Namespaces

Open Source Namespaces

If you are maintaining an ABAP Open Source project and want to reserve a namespace for it, simply reach out to ospo@sap.com with some details about this project. We will create the namespace for you and help you in all additional steps to use the namespace.

Click on the tab Open Source Namespaces and you will get a list of all available Open Source Namespaces.

By clicking on the Namespace, you will get a list of all your Installation numbers for which a Producer/Development and Customer/Repair Key can be generated.
