on October 28, 2020 at 12PM ET the

TORONTO GEOMETRY COLLOQUIUM

presents talk number four

opening speaker
Jiayi Eris Zhang of **University of Toronto**
on "Complementary Dynamics"

Danny Kaufman of
Adobe Research on
"Reliable Responses: Simulating
Elasticity with Guarantees"

Follow us **@GeometryToronto**
https://toronto-geometry-colloquium.github.io

The Toronto Geometry Colloquium is a live weekly hour-long webseries
showcasing geometry processing research. Topics range from computer
science, mathematics, and engineering including 3D deep learning,
computational fabrication, and computer graphics
