

on December 2, 2020 at 1PM ET the

TORONTO GEOMETRY COLLOQUIUM

presents talk number nine

Vladimir G. Kim of
Adobe Research on
“Neural Mesh Processing”

opening speaker **Thomas Davies** of
University of Toronto & Autodesk on
“Overfit Neural Networks as a
Compact Shape Representation”

Follow us @GeometryToronto
<https://toronto-geometry-colloquium.github.io>

The Toronto Geometry Colloquium is a live weekly hour-long webseries showcasing geometry processing research. Topics range from computer science, mathematics, and engineering including 3D deep learning, computational fabrication, and computer graphics
