on December 23, 2020 at 10AM ET the

TORONTO GEOMETRY COLLOQUIUM

presents talk number eleven

Xiaodong Wei of
EPFL on
"Analysis-Aware
Subdivision and Trimming"

opening speaker **Rosa María Sánchez** of
King Juan Carlos University on
"Robust Eulerian-on-Lagrangian Rods"

Follow us **@GeometryToronto**
https://toronto-geometry-colloquium.github.io

The Toronto Geometry Colloquium is a live weekly hour-long webseries showcasing geometry processing research. Topics range from computer science, mathematics, and engineering including 3D deep learning, computational fabrication, and computer graphics
