TORONTO GEOMETRY COLLOQUIUM

Sumukh Bansal
InterDigital R&I Rennes
"Affine Interpolation in a
Lie Group Framework"

Chenfanfu Jiang
University of Pennsylvania
"Continuum Rupture, Discrete Particles"

Follow us @GeometryToronto
https://toronto-geometry-colloquium.github.io

The Toronto Geometry Colloquium is a live weekly hour-long
webseries showcasing geometry processing research. Topics range
from computer science, mathematics, and engineering including 3D
deep learning, computational fabrication, and computer graphics
