

Smart, automated and flexible non-emergency medical transport (NEMT) scheduling.

Traumasoft and RealTime Routes provide your business with the ability to programmatically and dynamically route trips – maximizing capacity and minimizing disruption.

Calculate the best route in just a few clicks.

Automated real-time routing.
Use AI to eliminate human error and maximize your on-road utilization.

“Traumasoft... revolutionized our communications center and has improved our resource utilization overnight.”

Automatically create the best route schedule

Begin your day confident that RealTime Route's algorithm has plotted the optimal schedule for your crews

- Enable a real-time schedule that minimizes 'no-ride' miles and maximizes productive time on the road
- Automatically calculate pick-up time and assign trips according to your criteria
- Avoid late, early and unneeded pickups

Build only the crews you need

Good staff are key to good service – use the right amount of field personnel for the right amount of work

- Only use the staff needed and match trips to team credentials
- Trigger CAD (Computer-aided Dispatch) actions from the map
- Provide a clear navigation map for drivers

Re-calculate route changes in real-time

Enjoy the flexibility of adjusting the schedule as needed

- Add, edit or remove trips - analyzing and determining the best route
- Synchronized recalculation when a new trip is added, at any point in the day. Override trip determination as needed
- A clear multi-stop navigation map to guide drivers through their day

Automatically create real time multi-trip schedules for non-emergency vehicles.

Scheduling Non-Emergency Medical Transportation (NEMT) pickups every day is laborious, time-consuming and prone to costly errors.

It involves concentration; mentally calculating, plotting and planning. Invariably, at some point, trips need to be rescheduled, added or cancelled. Something always gets in the way.

Traumasoftware and RealTime Routes have teamed up to optimize and unburden this scheduling and rescheduling function. We know NEMT is about optimizing time on the road, so we enlisted world-leading algorithmic computing power to solve the problem.

What does that mean?

It means you can create an optimized schedule that's logical for drivers and beneficial for operators. The resulting trip schedule reduces no-ride miles and magically minimizes the distance between pick-ups.

The system assigns trips based on trip criteria, allows you to view multiple trips on the navigation map and automatically calculates pick-up times so you'll minimize mistakes and non-productive time in vehicles.

Moreover, when the time comes, synchronize recalculation when a new trip is added at any point in the day.

That's flexible, simple and smart.

A revolution in route scheduling.

FLEXIBLE

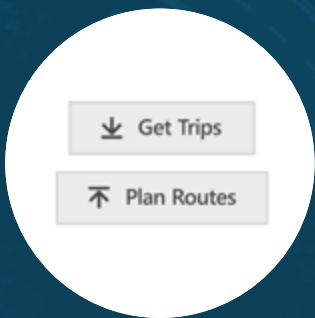

SIMPLE

SMART

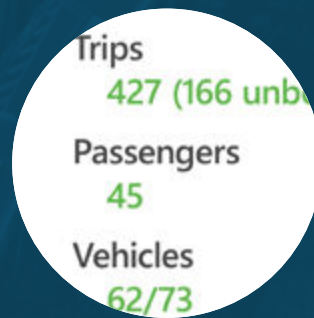

Eliminate the guesswork and get above the noise.

SIMPLE INTERFACE.
Point and click to get things moving and see above the noise.

CLEAR COMPREHENSIVE REPORTS.
Reports that offer just the right amount of information in an easy-to-understand format.

UNDERSTAND YOUR CAPACITY.
A simple summary to get a status on crews, trips and capacity.

MAPPED VIEWS.
Automated plotting takes away the slow manual process of planning trips.

Trips	Routes	Timeline

TRAUMASOFT

Born from the real-world needs of providers, Traumasoft is an EMS performance technology company.

Traumsoft was developed from the ground up, providing organizations with one integrated solution to elevate their entire operation. We exist in the community and draw on the wisdom of the industry to continually develop and deliver automated, smart software for the future of EMS Operations.
