

EM Drive Thruster by Anti Maxwell Dual Monopole Tubular Interference Field Reduction Around a Conductor.

Leo Vuyk,
Architect,
leovuyk@gmail.com
the Netherlands

Abstract.

A so called EmDrive (Electro Magentic Drive) defy classical physics expectations because it shows repellent less or reaction less thruster qualities.

According to Quantum FFF Theory (Function Follows Form at the quantum level) however, the magnetic field is build on two monopole rigid string particles which can be represented as curved lines of radiation trajectories, for a stable magnetic field more or less cooperating by opposing each other.

Thus, the magnetic quantum field has always TWO different shaped curved monopole vector components: a North- and a South vector field component.

This is comparable with the electric Quantum field, equipped with Plus and Minus vector components but it is in contrast with all other quantum fields like the neutrino- gravity-or x-gamma ray field.

However, based on observation of iron filing-powder patterns, close to direct currents in a wire, it is postulated, that these monopole (N+S) particle/ wave dualities travel locally parallel to each other inside the vacuum Axion/Higgs field, with a strong field reduction result also called a magnetic B-flied effect.

A so called B field is well known to be present around a long solenoid.

Inside the spiral solenoid, there is the strongest magnetic field present, however outside the solenoid the magnetic field is reduced down to zero, also originated by the anti Maxwell dipping field effect .

This Anti Maxwell dipping phenomenon is originated by the interference of both (N+S) monopole fields of parallel propagating magnetic monopole radiation trajectories, according to my monopole magnetic Quantum FFF model.

These B field reductions (or dipping) are also observed to be concentrated in a tubular form around the current in a conductor..

Introduction.

There are Two levitation principles to be observed, using the B-field reduction principles around a current in a conductor.

A: Levitation by dual conductor-magnet plating interaction.(figure 1,2,3,4)

B: Levitation by dual conductor-conductor interference. (figure 5,6,7)

by using two coaxial Tesla Bifilar coils using coil conductors with different cross section.

Ad 1, The Lorentz levitation force will become a non symmetric form, with a one sided reduced reaction force of the reduced Anti Maxwell tubular area around conductor coils on a local magnet (figure 1,2,3,4)

The magnet will create a normal Lorentz force on the electrons in the wire for levitation, but the magnets do not “feel” locally the opposing magnetic Standard Maxwell field around the current in the wire. The EM Drive is the result.

Ad 2, The Lorentz levitation force will become a non symmetric (reduced) form, with a one sided reduced reaction force created by the Anti Maxwell dipping area around the conductor coil with larger diameter conductor tubes, for effective screening of a second conductor coil with smaller diameter tubes conductors. (figure 5,6,7)

The configuration of both systems (of ad:A and B) are suggested to most effective in the form of a disc, however the middle disc section of such a disc can be left out for easy manufacturing.

As a consequence of the tubular B-field around a conductor, both levitation systems A and B, are in contradiction with Maxwell’s magnetic field law around an electric direct current wire and I call it the “tubular local magnetic dropping zone” (or B field dead zone) around the electric conductor, which can be used for reaction less drive propulsion and Levitation in combination with different forms of strong tubular or spiral magnets.

Magnet optimization of the EM Drive, is suggested to create spiral configurations of high performance magnet plating with spiraling electric conductors in between the plating.

The Lorentz force created on the wire by the static magnetic field of the tubular or spiral magnet (s) is supposed to be the only force in the system, due to the absence (or dipping) of a reaction force on the magnet plating due to the local magnetic dropping zone.

Three circular anti-Maxwell propulsion systems in triangle configuration on a flying machine, should be enough to create stable piloting and flight. Recent experiments with coiled magnetized iron tubes has already shown this new physics reaction-less levitation propulsion effect.(see video)

History.

Recently professor, Neil Turok said about the problematic understanding of our world of physics: “And so we have to go back and question those founding principles and find whatever it is, whatever new principle will replace them”. see: <http://www.cbc.ca/radio/ideas/the-ultimate-simplicity-of-everything-1.3490322> By chance Quantum FFF Theory is based on some forgotten ideas of well known scientists.

It was **Abdus Salam** who proposed that quarks and leptons should have a sub-quantum level structure, and that they are compound rigid particles with a specific non-zero sized form.

Jean Paul Vigier postulated that quarks and leptons are "pushed around" by an energetic sea of vacuum particles.

David Bohm suggested in contrast with The "Copenhagen interpretation", that reality is not created by the eye of the human observer, and second: elementary particles should be "guided by a pilot wave".

John Bell argued that the motion of mass related to the surrounding vacuum reference frame, should originate real

"Lorentz-transformations", and also real relativistic measurable contraction.

Richard Feynman postulated the idea of an all pervading energetic quantum vacuum.

He rejected it, because it should originate resistance for every mass in motion, relative to the reference frame of the quantum vacuum.

However, I postulate counter intuitive possibility, that this resistance for mass in motion, can be compensated, if we combine the ideas of Vigier, Bell, Bohm and Salam, and a new dual universal Bohmian "pilot wave", which is interpreted as the EPR correlation (or Big Bang entanglement) between individual elementary anti-mirror particles, living in dual universes.

So my proposal is based on a Rigid String Theory with real rigid strings able to mutate and merge by form based interlocking.

Em. Drive for Reaction Less Space Propulsion by New Physics Dual Anti-Maxwell Magnetic Monopole effect.

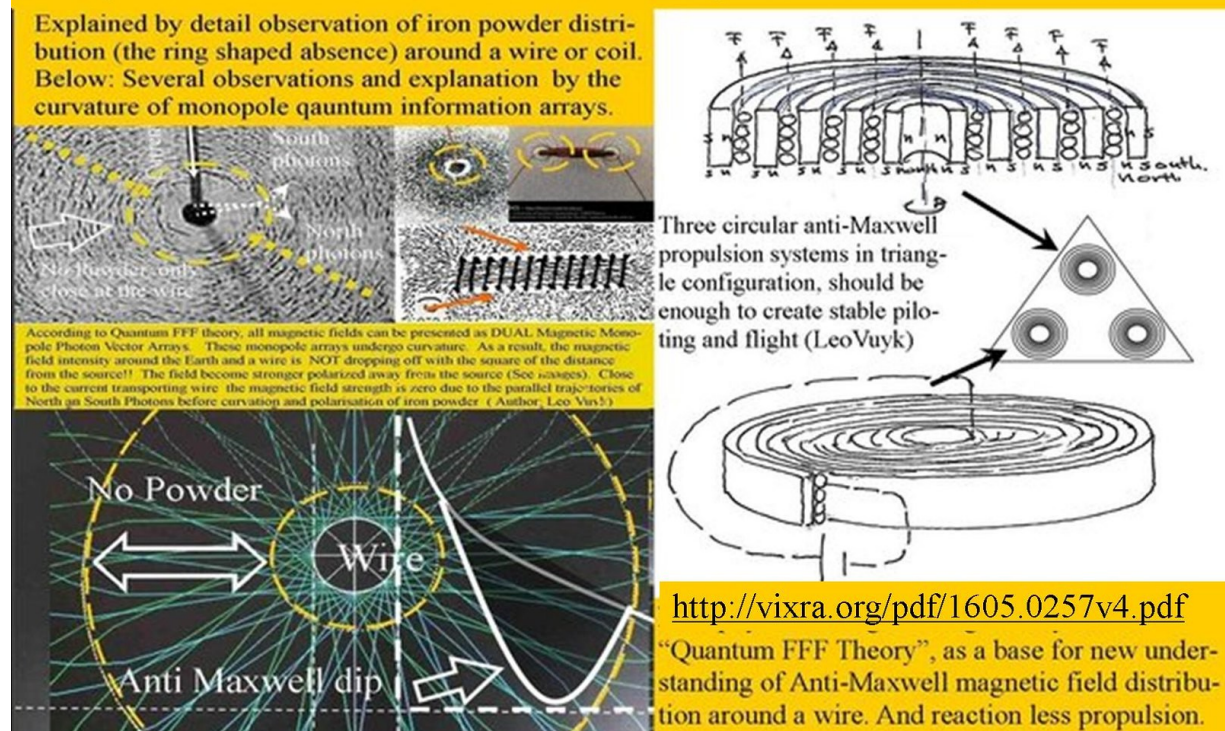

Figure 1

EM Drive by new Physics EM Monopole Effect.

A new physics Space Drive by the Interesting anti Maxwell dip-effect, according to Quantum FFF Theory. see: <https://bigbang-entanglement.blogspot.com/2019/01/an-new-space-drive-by-impossible-anti.html> and: <https://nationalufocenter.com/2019/05/filers-files-19-2019-uk-report-on-black-triangles/> Ufo photos: White circles, seem to be Anti Maxwell dip-EM drives for levitation and piloting. Yellow circles seem to be landing vehicles.

Em. Drive for Reaction Less Space Propulsion by New Physics Dual Anti-Maxwell Magnetic Monopole effect.

Explained by detail observation of iron powder distribution (the ring shaped absence) around a wire or coil. Below: Several observations and explanation by the curvature of monopole quantum information arrays.

Triangle shaped UFOs.

White circles, seem to be Anti Maxwell dip-EM drives for levitation and piloting. Yellow circles seem to be landing vehicles.

Figure 2,

Simple experiment to show EM drive effect between a 12 V car battery driven current in a coil around a magnetized tube according to Quantum FFF Theory.

Construction phase of the LeoVuyk EM drive principle experiment, based on Q-FFF monopole theory.

For the monopole principle see also: <http://vixra.org/pdf/1708.0170v1.pdf>

Below the end product of the EM Drive, with additional 20x Neodymium magnets 1x2x0.4 cm.

Figure 2,

Anti Maxwell Zone close to a current in a wire, is responsible for a new dual Monopole Photon based reaction less spaceflight principle.

Reaction less space propulsion principle based on a so called "Anti Maxwell zone" around a direct current in a wire.

According to Quantum FFF Theory based dual magnetic photon monopole model.

Lorentz force on the wire without a magnet reaction force.

According to Quantum FFF theory, all magnetic fields can be presented as DUAL Magnetic Monopole Photon Vector Arrays. These monopole arrays undergo curvature. As a result, the magnetic field intensity around the Earth and a wire is NOT dropping off with the square of the distance from the source! The field become stronger polarized away from the source (See images). Close to the current transporting wire the magnetic field strength is zero due to the parallel trajectories of North and South Photons before curvature and polarisation of iron powder (Author: Leo VanK)

TWO (North and South) Monopole Photon trajectories around a current in a wire shown in cross section. Between the two yellow circles both (N+S) trajectories are pointing about parallel. The result: No iron Powder orientation between the concentric circles, as is observed in the lab (see upper photo). This is a firm support for the monopole photon vector array element of Quantum FFF Theory.

Figure 4, example of the levitation force between two magnets, by reaction force on the magnet reduction.

Dual Coil Levitation (two Tesla anti symmetrical bifilar coils)

Anti Symmetric Bifilar Tesla coil for EM Drive.

Levitation effect by Anti Maxwell Dip area around a current in a wire. Basic tubular conductor coil configurations, creating levitation force (up) without reaction force, by substituting the smaller tube configuration with the Anti Maxwell Dip area projected around the larger coil groups. According to Quantum FFF Theory.

Below: Tubular Coil configuration cross section with two coil groups. The smaller tube coil group is fully succeeded by the Anti Maxwell Dipper Area (zone) of the larger tube group for levitation (up) efficiency without an equal reaction force, (down) as should be the case in standard physics.

Figure 11,

Additional information about Q-FF Theory.

LHC 125,750+XXX GeV, Higgs presented as 3D Quantum knots.

According to Q-FFF Theory, the single Higgs vacuum particle itself is massless. However merger particles could for different Quantum Knots with various masses and shapes.

MAJORANA particle's placed in the new extended standard model based on Q-FFF Theory. OOU is e-e+ related, UUU, LUL,RUR are Neutrino related. Called sterile Neutrinos.

The coding of Single Elementary Particles is based on the so called "rotational click positions" of the three hinges, which are assumed to be regularly placed over the ring shaped Higgs "Quaron Torus Particle" (page 2). This ring has one splitting point and three hinges which have consecutively four 90 degree click positions each. The best Torus ring diameter ratio to click-on is about 1/7. The ring coding of the hinges positions is as follows.

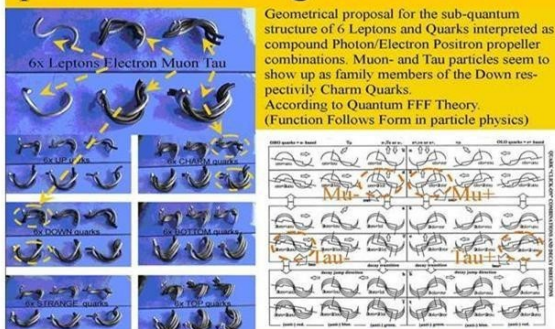

Explanation of the codes:
 U= Up rotation (180 degrees)
 O= Unchanged circle
 L= Left rotation (90 degrees)
 R= Right rotation (90 degrees)

Higgs particles are supposed to oscillate in Tandem along so called linear Vacuum Lattices, two by two in opposite directions, as the symmetrical opposite pistons of a boxer engine, as the origin of all energy, spin and mass effects. This enables the Tandem Higgs particles to change the form of their own Torus into an Electron and Positron pair at

Geometrical proposal for most particles building the universe

Geometrical proposal for the sub-quantum structure of 6 Leptons and Quarks interpreted as compound Photon/Electron Positron propeller combinations. Muon- and Tau particles seem to show up as family members of the Down respectively Charm Quarks. According to Quantum FFF Theory. (Function Follows Form in particle physics)

All Photons (1x. graviton, 2x electr.- 2x magnetic- and 1x general (x-gamma-ray) photon) and two Fermions (Electron + Positron) are formed direct out of the "Mother" ring shaped Higgs particle, by internal hinge rotation (below). Dark Matter particles are supposed to be formed by interlocking 3 or 4 photons (below). Neutrinos are deformed by interlocking 3 or 4 photons or fermions. (not shown) See Quantum FFF Theory. (Function Follows Form) <http://vixra.org/abs/1103.0002>

Figure 12, particle schemes of Quantum FFF Theory.

Other recent Q-FFF posters:

Equivalence between gravity and acceleration does not hold in Quantum FFF Theory. Mass in motion needs a reference frame of ZPE oscillating Higgs field and Lorentz polarization of conscious propeller Fermions (s) to keep a non accelerated flight.

Quantum Gravity as pressure distribution of the oscillating dual Higgs/Graviton vector field.

Polarized Fermion Mass in motion through the resistive, but also pushing oscillating Higgs vacuum (according to Quantum FFF theory)

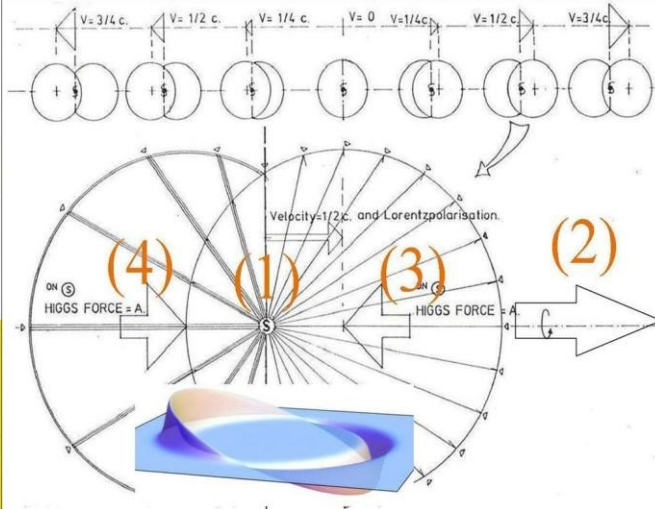

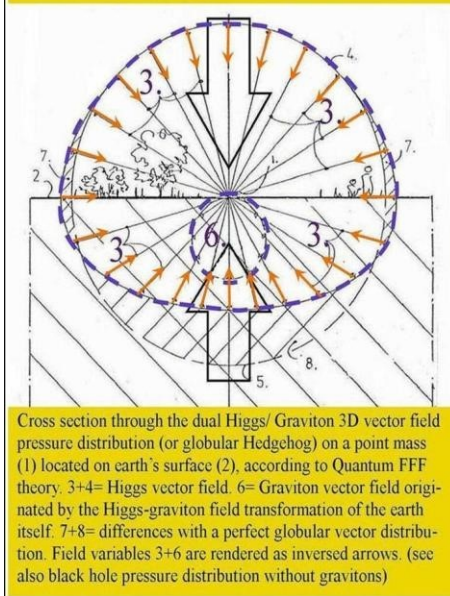

Figure 15, Quantum gravity.

Anti Matter deficit problem solved by the mirror symmetric Undivided Multiverse without dual Cats in boxes.

The Wavefunction collapse in the (CP symmetric) raspberry multiverse by the entangled observation between (anti) copy particles

According to Quantum FFF Theory, the collapse of the wavefunction is assumed to be triggered by particle collisions with instant entanglement between (anti-) COPY universes. So there is Charge and Parity symmetry between the entangled particles living in opposing universes. Each particle is its own observer!! Each human has to deal with one or more opposing anti-COPY humans.

Mirror symmetry between CP symmetric universes

2-D Section through the raspberry multiverse, with huge void in the middle. The void in the middle is supposed to be originated by the start of the Fractal process, when the vacuum density of the raspberry multiverse was still too high for a fine grained fractal process (see the book)

The Dodecahedron Raspberry Multiverse with a 5-fold neighbour Low Variance contact structure lead to a Golden Ratio (Phi) in every single universe according to Quantum FFF Theory (Function Follows Form)

Figure 16, Anti matter deficit problem solved by mirror symmetric undivided (entangled) Multiverse without dead or alive Cats in boxes.
