

Santa Claus and Black Pete on Mars, Curiosity Sol 538

6 oct. 2019 by leon elshout, roodgoudvanparvaim.nl, – aurichalcum2018 (at) protonmail.com

In the first picture I tend to see Santa Claus and Black Pete on Mars, embracing each other (Nasa, Curiosity cited in Burnett, Sol 538). This Santa Claus took part in the Council of Nicea in 325 A.D. He supported the idea of the pagan doctrine of trinity that was implemented into official christianity. This means that there is something dark about this Santa Claus. There is also the black and white contrast with Black Pete which reminds us of the dualism of the Pillars of Hercules in Plato's Atlantis story.

What to make of Santa and Pete on Mars? First there is the religious dimensions that roots in the Council of Nicea. Secondly, nothing happens for nothing. Santa and Pete KNEW that they were being photographed by the Curiosity Cam. Instead of stealing this alien robot of their neighbouring planet earth they decided to embrace each other in front of the camera. They showed "peace" to our world instead of hostility. The Martians KNOW that we send from time to time robots to their planet. They seem to leave our space ships alone and seemingly pay no attention to it. If they would steal our robots, we could see this on Earth as an act of hostility. Maybe there is even a law on Mars that prohibits all Martians to touch our space ships.

But how long will the Martians stay peacefully to us? Until the coming antichrist has revealed himself to our world, the earth? As far as I know it was mister Burnett who identified the two persons in this picture, Sol 538. I discovered the figures of Santa Claus and Black Pete in the image. Another pic of Black Pete I could identify in the Lorri Driver on Pluto (Nasa, New Horizons, cited in Waring, 2015, photo, Lorri Driver). This picture was taken by the New Horizons.

Santa Claus and Black Pete are icons who belong very much to the Netherlands, which is my home country. Anno 2019 tensions have risen regarding the figure of Black Pete. Some people consider him as a racist caricature. This means that the Martians "KNOW" what is going on on earth, even in Holland. They might have shown us how to make peace with each other by simply embracing each other. One detail: Black Pete is carrying a weapon on his leg. What is it and why? The Dutch Black Pete is famous for his "cane". The Martian Black Pete seems to carry a real weapon.
