

RAMS 2021 Author Index

Adly, Ihab

Biased Voting: Proposed Novel Error Detection and Recovery Mechanism (EDRM) - 164

Agergaard, Julie Krogh

Data-driven systematic evaluation of preventive maintenance performance - 112

Agergaard, Julie Krogh

Visualize Maintenance Data to Identify Safety Issues and Opportunistic Maintenance Possibilities - 78

Al-Bahi, Ali

Failure Modeling of C-130 Turbines using Artificial Neural Networks - 208

Al-Bahi, Ali

Failure Modes and Effects Analysis of T-56 Turboprop Engine Turbine - 231

ALKADY, GEHAD

Biased Voting: Proposed Novel Error Detection and Recovery Mechanism (EDRM) - 164

Alqarni, Abdulsalam

Predicting Corrosion Growth and Reliability of the Pipeline - 28

Amaba, Ben

The Evolution of Artificial Intelligence in the Automotive Industry Supply Chain - 109

AMER, HASSANEIN

Biased Voting: Proposed Novel Error Detection and Recovery Mechanism (EDRM) - 164

Antesberger, Tobias

Multi-sensor system simulation based on RESTART algorithm - 27

Apostolou, Evan

Fall-Back Analysis using Model-Based Engineering - 154

Apostolou, Evan

Syndrome Diagnostics - Fault Detection and Isolation (FDI) for Complex Systems using Causation-based AI - 155

Appledorn, Robert

Supportability Optimized thru RAM Data - 100

Araujo, Elinaldo

The importance of engineering technical reviews to improve the product reliability - 206

Araujo, Jean

Systematic Mapping of Literature on Software Aging and Rejuvenation Research Trends - 220

Bai, Jing

Transient Security and Dependability Analysis of Fog Micro Datacenter under Attack - 152

Barkley, John

Built-In Test Selection Methodology for Optimal Reliability Fault Coverage - 93

Bates, Lisa

Software Reliability in a DevOps Continuous Integration Environment - 165

Bazargan Lari, Mohammad Reza

A Data Mining Approach for Forecasting Machine Related Disruptions - 211

Bellinello, MARJORIE

Defining Operator Driven Reliability Inspection Routes through Reliability, Risk Analysis and Quality Control - 62

Bellinello, MARJORIE

Maintenance Management Optimization to Improve System Availability based on Stochastic Block Diagram - 82

Berenguer, Christophe

Cascade Effect Analysis in Torrential Hazard Context for Prioritizing Check Dams Maintenance Strategies - 47

Berenguer, Christophe

Post-prognostics decision strategy to manage the lifetime of a multi-stacks PEMFC system - 83

Berenguer, Christophe

Virtual age models: monitoring information level and quality of parametric estimation - 72

Bertsche, Bernd

Cyclisation of Safety Diagnoses: Influence on the Evaluation of Fault Metrics - 33

Bertsche, Bernd

Effect of interval censoring on the probability of test success in reliability demonstration - 14

Bertsche, Bernd

Effect of the Uncertainty of Prior Knowledge in Reliability Test Planning using the Probability of Test Success - 228

Bieber, Marie

Data-Driven Prognostics Incorporating Environmental Factors for Aircraft Maintenance - 148

Bobbio, Andrea

Assessing self-adapting routing algorithm in a mobile IoT environment - 86

Bobbio, Andrea

Transient Security and Dependability Analysis of Fog Micro Datacenter under Attack - 152

Bonato, Marco

Pitfalls of Accelerated Validation Tests on Automotive Products - 39

Brenière, Léa

Virtual age models: monitoring information level and quality of parametric estimation - 72

Brown, Justin

Built-In Test Selection Methodology for Optimal Reliability Fault Coverage - 93

Brown, Justin

Design Methodology for False Alarm Reduction using Unsupervised Learning in Non-Networked Systems - 88

Bruneo, Dario

Assessing self-adapting routing algorithm in a mobile IoT environment - 86

Cadet, Catherine

Post-prognostics decision strategy to manage the lifetime of a multi-stacks PEMFC system - 83

Caminada Netto, Adherbal

Defining Operator Driven Reliability Inspection Routes through Reliability, Risk Analysis and Quality Control - 62

Caminada Netto, Adherbal

Maintenance Management Optimization to Improve System Availability based on Stochastic Block Diagram - 82

Campbell, Ian

Design Methodology for False Alarm Reduction using Unsupervised Learning in Non-Networked Systems - 88

Castermans, Luc

Big data driven reliability growth for repairable health care systems - 17

Cates, Kimberly

Towards Prescriptive Risk Assessment: Utilizing Data Science to Model and Predict Top Degraders in Aircraft - 153

Cerotti, Davide

Assessing self-adapting routing algorithm in a mobile IoT environment - 86

Chahrour, Nour

Cascade Effect Analysis in Torrential Hazard Context for Prioritizing Check Dams Maintenance Strategies - 47

Chan, Daniel

Fall-Back Analysis using Model-Based Engineering - 154

Chan, Daniel

Model-based RAMS: optimising model development in a distributed working environment - 157

Chang, Xiaolin

Transient Security and Dependability Analysis of Fog Micro Datacenter under Attack - 152

Chatterjee, Kaushik

Synergic Use of LDA, DRBFM, FTA to Optimize Root Cause Analysis of Complex Problems - 11

Chu, Jiayun

An improved model of function failure identification and propagation based on mathematical logic - 51

Clay, William

No Problem Found Framework based on Analytics and Machine Learning - 20

Coburger, Anthony

The Bounding Problem: Single Event Effect Rate Prediction Using MCMC - 111

Coleman, Robert

Transforming Logistics networks with Location of Repair Analysis - 59

Collins, Elmer

Reliability Assessment of Dormant Storage Components - 84

Conroy, Paddy

Model-based RAMS: optimising model development in a distributed working environment - 157

Cornford, Steven

An Assurance Case with a Model at its Core - 15

Costa, Jackson

Systematic Mapping of Literature on Software Aging and Rejuvenation Research Trends - 220

Cota, Eduardo

A Phased based approach for PHM - 168

Crooks, Kenney

Novel approach to CBM+ implementation on aviation systems - 108

Crowder, Stephen

Reliability Assessment of Dormant Storage Components - 84

Czerlunczakiewicz, Ewelina

Pitfalls of Accelerated Validation Tests on Automotive Products - 39

Dammann , Oliver

Heterogeneous Data-merging Platform for Improved Risk Management in Power Grids - 194

DAOUD, RAMEZ

Biased Voting: Proposed Novel Error Detection and Recovery Mechanism (EDRM) - 164

Davila-Frias, Alex

Deep Neural Networks (DNNs) for all-terminal network reliability estimation - 128

Dazer, Martin

Effect of interval censoring on the probability of test success in reliability demonstration - 14

Dazer, Martin

Effect of the Uncertainty of Prior Knowledge in Reliability Test Planning using the Probability of Test Success - 228

DeLong, Todd

An Analysis of the ATCS Generator Polynomial - 52

DISTEFANO, SALVATORE

Assessing self-adapting routing algorithm in a mobile IoT environment - 86

DiVenti, TONY

An Assurance Case with a Model at its Core - 15

Doyen, Laurent

Virtual age models: monitoring information level and quality of parametric estimation - 72

Edwards, Ricka

APL's Spacecraft Reliability Performance - 172

Edwards, Ricka

Reliability Analysis for the Interstellar Probe – A 50+ Year Mission - 184

Engert, Daniel

Effect of interval censoring on the probability of test success in reliability demonstration - 14

Evans, John

An Assurance Case with a Model at its Core - 15

Fang, Guanqi

Dependence Modeling for Multivariate System Reliability Prediction - 65

Favarão da Silva, Renan

Applying Principal Component Analysis for Multiparametric Failure Prognosis and Remaining Useful Life Estimate - 63

Feather, Martin

An Assurance Case with a Model at its Core - 15

Fernald, Catherine

Healthcare's Resilience during the COVID-19 Pandemic: Case Study of Nursing Operations Adaption - 163

Figueiredo Goncalves, Joao Filipe

Design for Stress - 16

Fiondella, Lance

Software Reliability Models with Bathtub-shaped Fault Detection - 67

Franklin, Paul

Impact of Repair Logistics on Product Reliability - 230

Franklin, Paul

Solving Problems with Rapid Data Discovery - 229

Franqui, Jaime

A Case Study: Application of RCCA to Solve a Critical Electronics Manufacturing Problem - 161

Fulton, Wes

Estimating Quantity of Missing Data in Tails of Distribution - 7

Gavin, Zane

Maintenance Strategy Determination During Warranty When Replacing with Better-than-New (BTN) is An Option - 10

Gazzea , Michele

Heterogeneous Data-merging Platform for Improved Risk Management in Power Grids - 194

Ge, Mengmeng

Model based Cybersecurity Analysis: Past Work and Future Directions - 147

German, Reinhard

Multi-sensor system simulation based on RESTART algorithm - 27

Ghaleb, Mageed

Real-time production scheduling with random machine breakdowns using deep reinforcement learning - 227

Ghosh, Biman

No Problem Found Framework based on Analytics and Machine Learning - 20

Gribaudo, Marco

Assessing self-adapting routing algorithm in a mobile IoT environment - 86

Groth, Katrina

A Multi-Rate Sampling Method for Discretizing Continuous-Time Event Sequences - 185

Grundler, Alexander

Effect of interval censoring on the probability of test success in reliability demonstration - 14

Grundler, Alexander

Effect of the Uncertainty of Prior Knowledge in Reliability Test Planning using the Probability of Test Success - 228

Gruska, Greg

Integrating FMEAs, FMEDAs, and Fault trees For Functional Safety” - 166

Gupta, Kunal

The Evolution of Artificial Intelligence in the Automotive Industry Supply Chain - 109

Gupta, Shuchita

The Evolution of Artificial Intelligence in the Automotive Industry Supply Chain - 109

Halstead, Matthew

The Bounding Problem: Single Event Effect Rate Prediction Using MCMC - 111

Hamaji, Fernando Hiroyuki

Applying Principal Component Analysis for Multiparametric Failure Prognosis and Remaining Useful Life Estimate - 63

Hamdan, Bayan

Reliability Analysis of Partially Observed Systems Using Dynamic Bayesian Networks - 199

Hamidi, Maryam

Deep Learning-based Anomaly Detection for Midstream Infrastructures - 56

Hansen, Kasper Barslund

Visualize Maintenance Data to Identify Safety Issues and Opportunistic Maintenance Possibilities - 78

Herbert, Patrick

No Problem Found Framework based on Analytics and Machine Learning - 20

Herzig, Thomas

Effect of interval censoring on the probability of test success in reliability demonstration - 14

Hong, Jin

Model based Cybersecurity Analysis: Past Work and Future Directions - 147

Huang, Wei

A Framework of Big Data Driven Remaining Lifetime Prediction of On-Orbit Satellite - 146

Huang, Zhaofeng Carl

Enhanced Weibayes Method and Its Applications - 23

Huang, Zhaofeng Carl

MBSE and FMEA Integration Using GENESYS Tool - 22

Jayatileka, Sarath

Practical Implications of Weibull Shape Parameter; Lessons & Pitfalls - 143

Jayatileka, Sarath

Reliability Modelling in HVAC & other Industry Equipment Using Big Data - 193

Jenkins, Ronaldo

Using Consequence-Based Assessment Techniques to Improve Standard Risk Matrix Results - 213

Jia, Chuanzhou

On the Reliability of 4G & 5G Telecommunication Networks from the Perspective of Operation & Maintenance - 46

Jiao, Jian

An improved model of function failure identification and propagation based on mathematical logic - 51

Jing, Yongfeng

An improved model of function failure identification and propagation based on mathematical logic - 51

Jones, Harry

Level of repair and complexity - 130

Jones, Harry

Long duration testing for cost-effective high reliability for Mars - 129

Jones, Melissa

Interstellar Mapping and Acceleration Probe (IMAP) Software FMEA - 144

Jugdaw, Sanjay

Reliability Performance Reporting of Intelligent Completions – An Effective Approach to Reliability Management - 124

Kada, Belkacem

Failure Modeling of C-130 Turbines using Artificial Neural Networks - 208

Kada, Belkacem

Failure Modes and Effects Analysis of T-56 Turboprop Engine Turbine - 231

Kaminskiy, Mark

Reliability Applications of Gini Type Index - 149

Karimian, Foad

Fatigue crack initiation prognostics based on thermodynamic and information entropy using dynamic Bayesian network - 181

Katahira, Masafumi

FMEA Focusing on the Interaction Between Physical and Computational Elements in Cyber-Physical Systems - 70

Keedy, Elias

Mixed Effects Reliability Model of Flow Meters with Multiple Failure Modes in the Process Industry - 61

Khalid, Waqas

AI-Based Maintenance Scheduling for Offshore Oil and Gas Platforms - 85

Kim, Dongseong

Model based Cybersecurity Analysis: Past Work and Future Directions - 147

Kim, Ho-Bin

Model-based RAMS: optimising model development in a distributed working environment - 157

Köhler, Armin

Cyclisation of Safety Diagnoses: Influence on the Evaluation of Fault Metrics - 33

Kohtz, Sara

Capacity degradation modeling for Li-ion batteries using a multiscale Gamma process approach - 195

Krivtsov, Vasiliy

Reliability Applications of Gini Type Index - 149

Kymal, Chad

Integrating FMEAs, FMEDAs, and Fault trees For Functional Safety” - 166

Lebaigue, Paul

Syndrome Diagnostics - Fault Detection and Isolation (FDI) for Complex Systems using Causation-based AI - 155

Lee, Juseong

Multi-objective analysis of condition-based aircraft maintenance strategies using discrete event simulation - 50

Lewis, Austin

A Multi-Rate Sampling Method for Discretizing Continuous-Time Event Sequences - 185

Lewitschnig, Horst

Design for Stress - 16

Li, Yan-Fu

A Novel Health Indicator for the Polygonal Wear of the High-Speed Train Wheels Based on the Wheel Profile Data - 99

Li, Yan-Fu

On the Reliability of 4G & 5G Telecommunication Networks from the Perspective of Operation & Maintenance - 46

LI, Zhongliang

Post-prognostics decision strategy to manage the lifetime of a multi-stacks PEMFC system - 83

Liao, Ying

Mixed Effects Reliability Model of Flow Meters with Multiple Failure Modes in the Process Industry - 61

Liu, Bo

Transient Security and Dependability Analysis of Fog Micro Datacenter under Attack - 152

Liu, Xinyang

An Evaluation Framework for Condition-based Maintenance Policies on Stochastically Deteriorating Systems - 24

Maciel, Paulo

Systematic Mapping of Literature on Software Aging and Rejuvenation Research Trends - 220

Maheve, Manju

Applicability and Limitations of Reliability Allocation Methods - 77

Maheve, Manju

Single Event Effects Analysis to improve the system safety and fault tolerance - 80

Mahmoodzadeh Poornaki, Zahra

Development and Application of a Trustability Metric for Reinforcement Learning Approaches in Asset Integrity - 141

Martinez, Jose

Transient Security and Dependability Analysis of Fog Micro Datacenter under Attack - 152

Matos, Rubens

Systematic Mapping of Literature on Software Aging and Rejuvenation Research Trends - 220

Mayo, Reginald

A Phased based approach for PHM - 168

McLinn, James

Practical Implications of Weibull Shape Parameter; Lessons & Pitfalls - 143

McMahon, Mike

The Evolution of Artificial Intelligence in the Automotive Industry Supply Chain - 109

Melani, Arthur Henrique

Applying Principal Component Analysis for Multiparametric Failure Prognosis and Remaining Useful Life Estimate - 63

Melani, Arthur Henrique

Defining Operator Driven Reliability Inspection Routes through Reliability, Risk Analysis and Quality Control - 62

Melani, Arthur Henrique

Maintenance Management Optimization to Improve System Availability based on Stochastic Block Diagram - 82

Men, Tianli

A Novel Health Indicator for the Polygonal Wear of the High-Speed Train Wheels Based on the Wheel Profile Data - 99

Mendoza, Vincent

Transforming Logistics networks with Location of Repair Analysis - 59

Michalski, Miguel

Applying Principal Component Analysis for Multiparametric Failure Prognosis and Remaining Useful Life Estimate - 63

Michalski, Miguel

Defining Operator Driven Reliability Inspection Routes through Reliability, Risk Analysis and Quality Control - 62

Michalski, Miguel

Maintenance Management Optimization to Improve System Availability based on Stochastic Block Diagram - 82

Miro, James

Transforming Logistics networks with Location of Repair Analysis - 59

Mitici, Mihaela

Multi-objective analysis of condition-based aircraft maintenance strategies using discrete event simulation - 50

Mobtahej, Pooyan

Deep Learning-based Anomaly Detection for Midstream Infrastructures - 56

Modarres, Mohammad

Fatigue crack initiation prognostics based on thermodynamic and information entropy using dynamic Bayesian network - 181

Moore, Michael

Enhanced Weibayes Method and Its Applications - 23

Morisaki, Shuji

FMEA Focusing on the Interaction Between Physical and Computational Elements in Cyber-Physical Systems - 70

Mortensen, Niels Henrik

AI-Based Maintenance Scheduling for Offshore Oil and Gas Platforms - 85

Mortensen, Niels Henrik

Data-driven systematic evaluation of preventive maintenance performance - 112

Mortensen, Niels Henrik

Grouping of Activities for Improving Maintenance Planning - 48

Mortensen, Niels Henrik

Visualize Maintenance Data to Identify Safety Issues and Opportunistic Maintenance Possibilities - 78

Mosleh, Ali

Development and Application of a Trustability Metric for Reinforcement Learning Approaches in Asset Integrity - 141

Mosleh, Ali

Human Role in Failure of Autonomous Systems: A Human Reliability Perceptive - 142

Mount-Campbell, Austin

Healthcare's Resilience during the COVID-19 Pandemic: Case Study of Nursing Operations Adaption - 163

Mura, Ivan

Stochastic Modeling and Analysis of Phased-Mission Systems Dependability - 12

Murad, Carlos

Maintenance Management Optimization to Improve System Availability based on Stochastic Block Diagram - 82

Murad, Carlos Alberto

Defining Operator Driven Reliability Inspection Routes through Reliability, Risk Analysis and Quality Control - 62

Nabeta, Silvio Ikuyo

Defining Operator Driven Reliability Inspection Routes through Reliability, Risk Analysis and Quality Control - 62

Nabeta, Silvio Ikuyo

Prognosis Smart System based on AI applied to Equipment Health Monitoring in 4.0 Industry Scenario - 60

Nafreen, Maskura (Niti)

Software Reliability Models with Bathtub-shaped Fault Detection - 67

Namihira, Kohsuke

FMEA Focusing on the Interaction Between Physical and Computational Elements in Cyber-Physical Systems - 70

Namoura, Hamed

Real-time production scheduling with random machine breakdowns using deep reinforcement learning - 227

Nepal, Bimal

Predicting Corrosion Growth and Reliability of the Pipeline - 28

Nielsen, Emelia Karoline Suddek

Grouping of Activities for Improving Maintenance Planning - 48

Nogradi, Chris

Software Reliability in a DevOps Continuous Integration Environment - 165

Okubo, Naoko

FMEA Focusing on the Interaction Between Physical and Computational Elements in Cyber-Physical Systems - 70

Outbib, Rachid

Post-prognostics decision strategy to manage the lifetime of a multi-stacks PEMFC system - 83

Pacevicius, Michael

Addressing the Problem of Data Veracity Loss Across Risk Assessment Processes - 192

Pacevicius, Michael

Heterogeneous Data-merging Platform for Improved Risk Management in Power Grids - 194

Paltrinieri, Nicola

Addressing the Problem of Data Veracity Loss Across Risk Assessment Processes - 192

Pan, Rong

Dependence Modeling for Multivariate System Reliability Prediction - 65

Pang, Shujie

An improved model of function failure identification and propagation based on mathematical logic - 51

Papachristou, Christos

No Problem Found Framework based on Analytics and Machine Learning - 20

Parendo, Carol

Structured Data for Product Performance Improvement - 79

PETER, PRIYA

Applicability and Limitations of Reliability Allocation Methods - 77

PETER, PRIYA

Single Event Effects Analysis to improve the system safety and fault tolerance - 80

PETER, PRIYA

Structured Data for Product Performance Improvement - 79

Peters, Judith

Reliability Modelling in HVAC & other Industry Equipment Using Big Data - 193

Plawecki, Nathan

Novel approach to CBM+ implementation on aviation systems - 108

QATTAN, NIZAR

Failure Modeling of C-130 Turbines using Artificial Neural Networks - 208

QATTAN, NIZAR

Failure Modes and Effects Analysis of T-56 Turboprop Engine Turbine - 231

Qiu, Kun

A Study on Environmental Factors for Environmental-Diversity-Based Fault Tolerance Techniques - 137

Qiu, Minhao

Multi-sensor system simulation based on RESTART algorithm - 27

Ramos, Marilia

Human Role in Failure of Autonomous Systems: A Human Reliability Perceptive - 142

Reutzel, Joseph

An Analysis of the ATCS Generator Polynomial - 52

Rittgers, Jon

An Approach to Reliability Growth for Medical Device Development - 9

Rochman, Monica

Healthcare's Resilience during the COVID-19 Pandemic: Case Study of Nursing Operations Adaption - 163

SAKURAI, Atsushi

A Framework for Performing Quantitative Fault Tree Analyses for Subsystems with Periodic Repairs - 30

Salem, Saeed

Deep Neural Networks (DNNs) for all-terminal network reliability estimation - 128

SALVO ROSSI, Pierluigi

Addressing the Problem of Data Veracity Loss Across Risk Assessment Processes - 192

Santos, Bruno

Data-Driven Prognostics Incorporating Environmental Factors for Aircraft Maintenance - 148

Sapronova, Alla

Heterogeneous Data-merging Platform for Improved Risk Management in Power Grids - 194

Scarpa, Marco

Assessing self-adapting routing algorithm in a mobile IoT environment - 86

Selski, Carrie

Towards Prescriptive Risk Assessment: Utilizing Data Science to Model and Predict Top Degraders in Aircraft - 153

Sharifi, Mani

Joint Optimization of the Production Scheduling, Maintenance, and Inventory - 201

Shelton, Marta

An Assurance Case with a Model at its Core - 15

Shrivastava, Pankaj

Reliability Performance Reporting of Intelligent Completions – An Effective Approach to Reliability Management - 124

Sigsgaard, Kristoffer Vandrup

AI-Based Maintenance Scheduling for Offshore Oil and Gas Platforms - 85

Sigsgaard, Kristoffer Vandrup

Data-driven systematic evaluation of preventive maintenance performance - 112

Sigsgaard, Kristoffer Vandrup

Grouping of Activities for Improving Maintenance Planning - 48

Sigsgaard, Kristoffer Vandrup

Visualize Maintenance Data to Identify Safety Issues and Opportunistic Maintenance Possibilities - 78

Silva Junior, Alecio

Prognosis Smart System based on AI applied to Equipment Health Monitoring in 4.0 Industry Scenario - 60

Smith, Clayton

APL's Spacecraft Reliability Performance - 172

Smith, Clayton

Reliability Analysis for the Interstellar Probe – A 50+ Year Mission - 184

Smith, Clayton

The Bounding Problem: Single Event Effect Rate Prediction Using MCMC - 111

Smith, Jan

Boeing 737MAX Thru DC6 Fleet Grounding Decisions Revisited with Event Interval Probability Analysis - 216

Soleymani, Iman

AI-Based Maintenance Scheduling for Offshore Oil and Gas Platforms - 85

Soleymani, Iman

Data-driven systematic evaluation of preventive maintenance performance - 112

Sorour, Kirollos

Biased Voting: Proposed Novel Error Detection and Recovery Mechanism (EDRM) - 164

Souza, Gilberto Francisco Martha de

Applying Principal Component Analysis for Multiparametric Failure Prognosis and Remaining Useful Life Estimate - 63

Souza, Gilberto Francisco Martha de

Defining Operator Driven Reliability Inspection Routes through Reliability, Risk Analysis and Quality Control - 62

Souza, Gilberto Francisco Martha de

Maintenance Management Optimization to Improve System Availability based on Stochastic Block Diagram - 82

Souza, Gilberto Francisco Martha de

Prognosis Smart System based on AI applied to Equipment Health Monitoring in 4.0 Industry Scenario - 60

Stecki, Jacek

Fall-Back Analysis using Model-Based Engineering - 154

Stecki, Jacek

Syndrome Diagnostics - Fault Detection and Isolation (FDI) for Complex Systems using Causation-based AI - 155

Stukes, Robert

Transforming Logistics networks with Location of Repair Analysis - 59

Sun, Feng-Bin

Maintenance Strategy Determination During Warranty When Replacing with Better-than-New (BTN) is An Option - 10

Sunderajan, Narasimman

Reliability Modelling of a Medical Disposable to Reduce Field Returns - 119

Tacnet, Jean-Marc

Cascade Effect Analysis in Torrential Hazard Context for Prioritizing Check Dams Maintenance Strategies - 47

Taghipour, Sharareh

A Data Mining Approach for Forecasting Machine Related Disruptions - 211

Taghipour, Sharareh

Joint Optimization of the Production Scheduling, Maintenance, and Inventory - 201

Taghipour, Sharareh

Real-time production scheduling with random machine breakdowns using deep reinforcement learning - 227

Tarum, Carl

Estimating Quantity of Missing Data in Tails of Distribution - 7

Thieme, Christoph A.

Addressing the Problem of Data Veracity Loss Across Risk Assessment Processes - 192

Thorn, Andrew

Fall-Back Analysis using Model-Based Engineering - 154
