

# Plastic-Free Parks

WHILE SOME MATERIALS ARE EASY TO IDENTIFY, PLASTIC CAN BE COMPLICATED. IF THE ITEM DOESN'T HAVE A CHASING ARROWS SYMBOL WITH A NUMBER, REFERENCE THIS GUIDE.

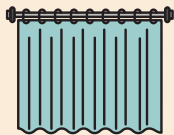

**PET:** Polyethylene Terephthalate - Clear or tinted plastic often used for drink bottles, cups, etc.

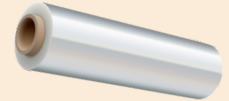

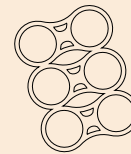

**HDPE:** High-density Polyethylene - White or colored plastic often used for product bottles, jugs, etc.

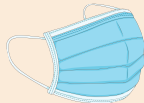

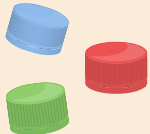

**PVC:** Polyvinyl Chloride - Durable plastic, hard or rubbery often used for building materials, toys & shower curtains

**LDPE:** Low-density Polyethylene - Clear, white or colored plastic often used for bags, trays & drink holders

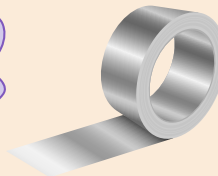

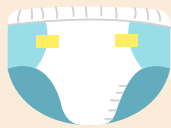

**PP:** Polypropylene: Hard but flexible plastic often used for food containers, bottle caps, food wrappers, etc.

**PS:** Polystyrene: Rigid, brittle plastic OR foam often used for take-out food containers, lids, etc.

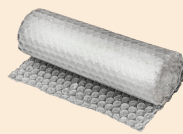

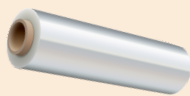

**O:** Other / Unknown - Bioplastics, products containing other unidentifiable plastics, etc.

## SINGLE VS. MULTI-LAYER MATERIALS

**SL:** Single-layer - Flexible plastic film often used for bags, etc.

**ML:** Multi-layer: Plastics bonded with another material often used for sachets, personal care items, etc.
