ADVANCES IN SCIENCE, TECHNOLOGY AND ENGINEERING SYSTEMS JOURNAL

Volume 2 Issue 5 **September-October 2017**

CONTENTS

Three-Pass Protocol Implementation in Vigenere Cipher Classic Cryptography Algorithm with Keystream Generator Modification 01
Amin Subandi, Rini Meiyanti, Cut Lika Mestika Sandy, Rahmat Widia Sembiring

Modification of Symmetric Cryptography with Combining Affine Chiper and Caesar Chiper which Dynamic Nature in Matrix of Chiper Transposition by Applying Flow Pattern in the Planting Rice 06
Dewi Sartika Ginting, Kristin Sitompul, Jasael Simanulang, Rahmat Widia Sembiring, Muhammad Zarlis

Collaborative Encryption Algorithm Between Vigenere Cipher, Rotation of Matrix (ROM), and One Time Pad (OTP) Algoritma 13
Elwinus H. A. Mendrofa, Elwin Yunith Purba, Boy Yako Siahaan, Rahmad W Sembiring

Combination of Caesar Cipher Modification with Transposition Cipher 22
Fahrul Ikhsan Lubis, Hasanal Fachri Satia Simbolon, Toras Pangidoan Batubara, Rahmat Widia Sembiring

Analysis of Learning Development With Sugeno Fuzzy Logic And Clustering 26
Maulana Erwin Saputra, Safrizal

A Theoretical and Experimental Comparison of One Time Pad Cryptography using Key and Plaintext Insertion and Transposition (KPIT) and Key Coloumnar Transposition (KCT) Method 31
Pryo Utomo, Nadia Widari Nasution, Arisman, Rahmat Widia Sembiring

System Control Device Electronics Smart Home Using Neural Networks 35
Safarul Ilham, Abdul Muin, Dedi Candro

Comparison of K-Means and Fuzzy C-Means Algorithms on Simplification of 3D Point Cloud Based on Entropy Estimation 38
Abdelaaziz Mahdaoui, Aziz Bouazi, Abdallah Marhraoui Hsaini, El Hassan Sbai

Degenerate p(x)-elliptic equation with second membre in L^1 45
Adil Abbassi, Elhoussine Azroul, Abdelkrim Barbara

Steel heat treating: mathematical modelling and numerical simulation of a problem arising in the automotive industry 55
Jose Manuel Diaz Moreno, Concepcion Garcia Vazquez, Maria Teresa Gonzalez Montesinos, Francisco Ortegon Gallego, Giuseppe Viglialoro

Petrov-Galerkin formulation for compressible Euler and Navier-Stokes equations 63
Nacer E. El Kadri E, Abdelhakim Chillali

Simulation of flows in heterogeneous porous media of variable saturation 70
Nacer E. El Kadri E, Abdelhakim Chillali

Models accounting for the thermal degradation of combustible materials under controlled temperature ramps 78
Alain Brillard, Patrick Gilot, Jean-Francois Brilhac

Threshold Multi Split-Row algorithm for decoding irregular LDPC codes 88
Chakir Aqil, Rachid El Alami, Ismail Akharraz, Abdelaziz Ahaitouf

A new color image encryption algorithm based on iterative mixing of color channels and chaos 94
Mohamed Essaid, Ismail Akharraz, Abderrahim Saaidi and Ali Mouhib

Cyclical contractive conditions in probabilistic metric spaces 100
Abderrahim Mbarki, Rachid Oubrahim

Group law and the Security of elliptic curves on F_p[e_1,...,e_n] 104
Abdelalim Seddik, Chaichaa Abdelhak, Souhail Mohamed

Nonlinear parabolic problem with lower order terms in Musielak-Orlicz spaces 109
Mhamed Elmassoudi, Ahmed Aberqi, Jaouad Bennouna

S-asymptotically w-periodic solutions in the p-th mean for a Stochastic Evolution Equation driven by Q-Brownian motion 124
Solym Mawaki Manou-Abi, William Dimbour

On the Spectrum of problems involving both p(x)-Laplacian and P(x)-Biharmonic 134
Abdelouahed El Khalil, My Driss Morchid Alaoui, Abdelfattah Touzani

Existence and Boundedness of Solutions for Elliptic Equations in General Domains 141
Elhoussine Azroul, Moussa Khouakhi, Chihab Yazough

Nonresonance between the first two Eigencurves of Laplacian for a Nonautonomous Neumann Problem 152
Ahmed Sanhaji, Ahmed Dakkak

Existence Results for Nonlinear Anisotropic Elliptic Equation 160
Youssef Akdim, Mostafa El moumni, Abdelhafid Salmani

Boundary gradient exact enlarged controllability of semilinear parabolic problems 167
Touria Karite, Ali Boutoulout

L^{∞} -Estimates for Nonlinear Degenerate Elliptic Problems with p-growth in the Gradient 173
Youssef Akdim, Mohammed Belayachi

Doubly Nonlinear Parabolic Systems In Inhomogeneous Musielak- Orlicz-Sobolev Spcaes 180
Ahmed Aberqi, Mhamed Elmassoudi, Jaouad Bennouna, Mohamed Hammoumi
