

What's Up, Doc? †

June 2024

Dr. Aaron B. Clevenson, Director, Insuperity Observatory in Humble ISD

Other Clubs (of the Solar System)

Solar System – These are the tasks that can be done this month:

All Planets and visible Dwarf Planets are morning “stars” this month.

Sun – Any clear day is a good time to get those sunspots, if there are any to be seen.

Sunset **2035** mid-month.

Moon:

The Maria requirement can be done any time the moon is visible. Look before 6/28 or after 6/13 for the fullest views.

The Highlands requirement can be done at the same time.

The Crater Ages requirement is best done on 6/12, or 6/13.

The Scarps requirement is best done on 6/14/5.

Occultations occur all the time, the bright ones can be found on the internet. Objects disappear on the East side of the moon.

Asteroids – Course Plotting and Measuring Movement requirements can be done at any time on any asteroid. See above to identify the bright ones this month.
