Dear Software Service Providers,

RE: URGENT NOTICE ON ADDITIONS TO THE iXBRL FILING DATA TO BE SUBMITTED TO THE CIPC

01 October 2019 is earmarked as a key milestone in CIPC where we will be introducing changes to the current data model, taxonomy and the iXBRL iFile capability on e-services. As part of this journey, there are some important changes that we need our partner software service providers to take urgent notice of and comply with accordingly. Software Service Providers must please take note that they will be required *to include a watermark or text as a footnote* bearing the name of the Software Service Provider (SSP). Additionally, as from 01 October 2019, *a tag will be introduced that will require SSPs to tag the Software and Software Version used to generate the iXBRL AFS instance document.*

Yours Faithfully

Adv. Rory Voller
Commissioner: CIPC
Date ..3.. September 2019
