

VMwary?

A fast exit route from Broadcom

After Broadcom's acquisition of VMware, many companies are facing vast increases in licensing costs and are unsure about future updates and development, leading to a re-evaluation of their commitment to VMware.

Introducing: CivoStack Enterprise

CivoStack Enterprise is an alternative to VMware, offering equivalent functionality with a straightforward, on-prem licensing model and long-term pricing commitment to predictable pricing.

On-prem support

Enjoy fast and straightforward installation designed for on-prem deployment and compatible with your own hardware.

Up to 80% cheaper than Broadcom

Enjoy a straightforward VRAM consumption licensing model, achieving up to 80% savings compared to Broadcom costs.

Long term price commitment

CivoStack Enterprise ensures long-term financial clarity with a guaranteed price commitment, safeguarding against unexpected hikes.

Proven technology

- ✓ **Live migration** support for VMs ensures seamless transitions with zero downtime.
- ✓ **High availability** options ensure robust service reliability and fault tolerance.
- ✓ **Multi-tenancy** support enables efficient resource utilization and isolation, perfect for Service Providers and large-scale environments.

A simple migration path

CivoStack Enterprise provides a hassle-free migration path from VMware, allowing you to simply take your .vmdk files and import them with ease, complemented by free migration assistance to ensure a smooth and straightforward transition.

An easy path off VMware

With feature rich support

CivoStack Enterprise delivers cutting-edge features and tools, focusing on ease-of-use, smooth migration, and 24x7 advanced support.
