Academic Audit Application Updates

New Features

- Program-based constraints
  - Specify sub-requirements for majors/minors (i.e. general vs. honors math)
- NameCoach integration
  - "Play" buttons appear beside student names
- Default Concentration
  - If a student does not have a concentration selected, a "default requirement" can be created
  - Can contain standard track courses
  - Will automatically apply to students not on Honors track
- "Plan Actions History" tab makes advisor initiated plans visible to admins and advisors
- Detailed descriptions of univeristy requirements
- "Entry Term" added to Audit Criteria options
- Search undeclared students
- Create student sets and assign permissions
- Students can view degree plans against closest available audit if no matching audit exists

Fixed Issues

- Programs no longer display out of order in print audits
- Updated display of repeatable courses to clarify which instance of the course is counting
