FIERA

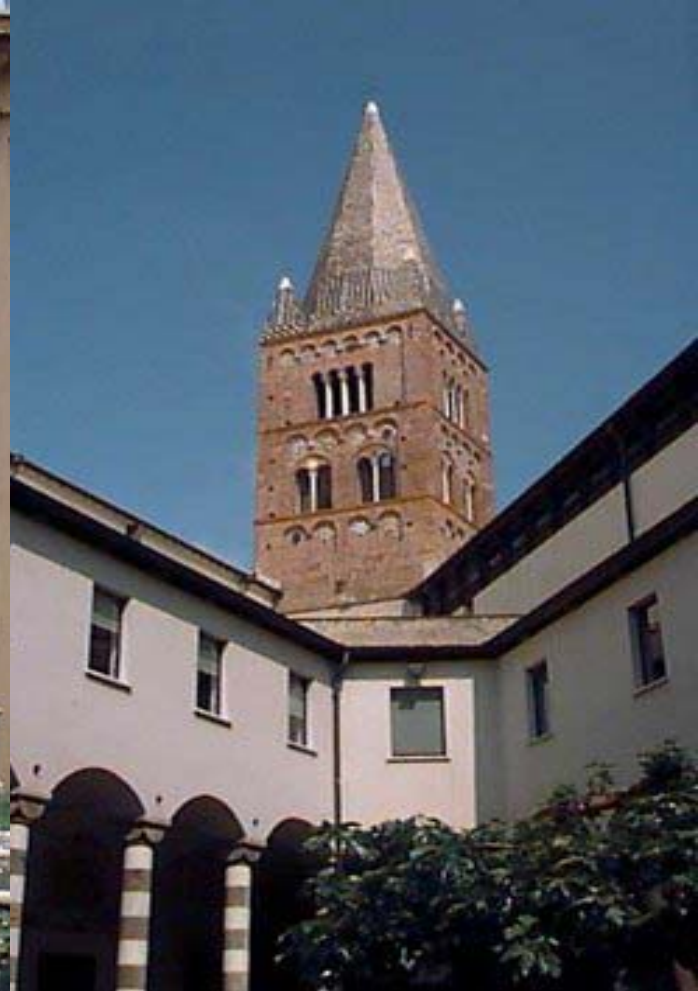

A port as great as the sea: Genoa, the main port call in the Mediterranean. Genoa has a strong tradition in manufacturing, but also an aggressive call to IT (in the technological district we have an Italian “MIT”...)

Genova, a city of art with a sea view, inviting the visitor to stop over for a few days, to discover its secret soul; “Superb” at birth, “great” over time, with its noble mansions, and the largest historical centre in Europe, reflecting the city’s ancient splendor...

...renovated in 2001 for the G8 meeting and in 2004 as the European Capital of Culture...

Models 2006

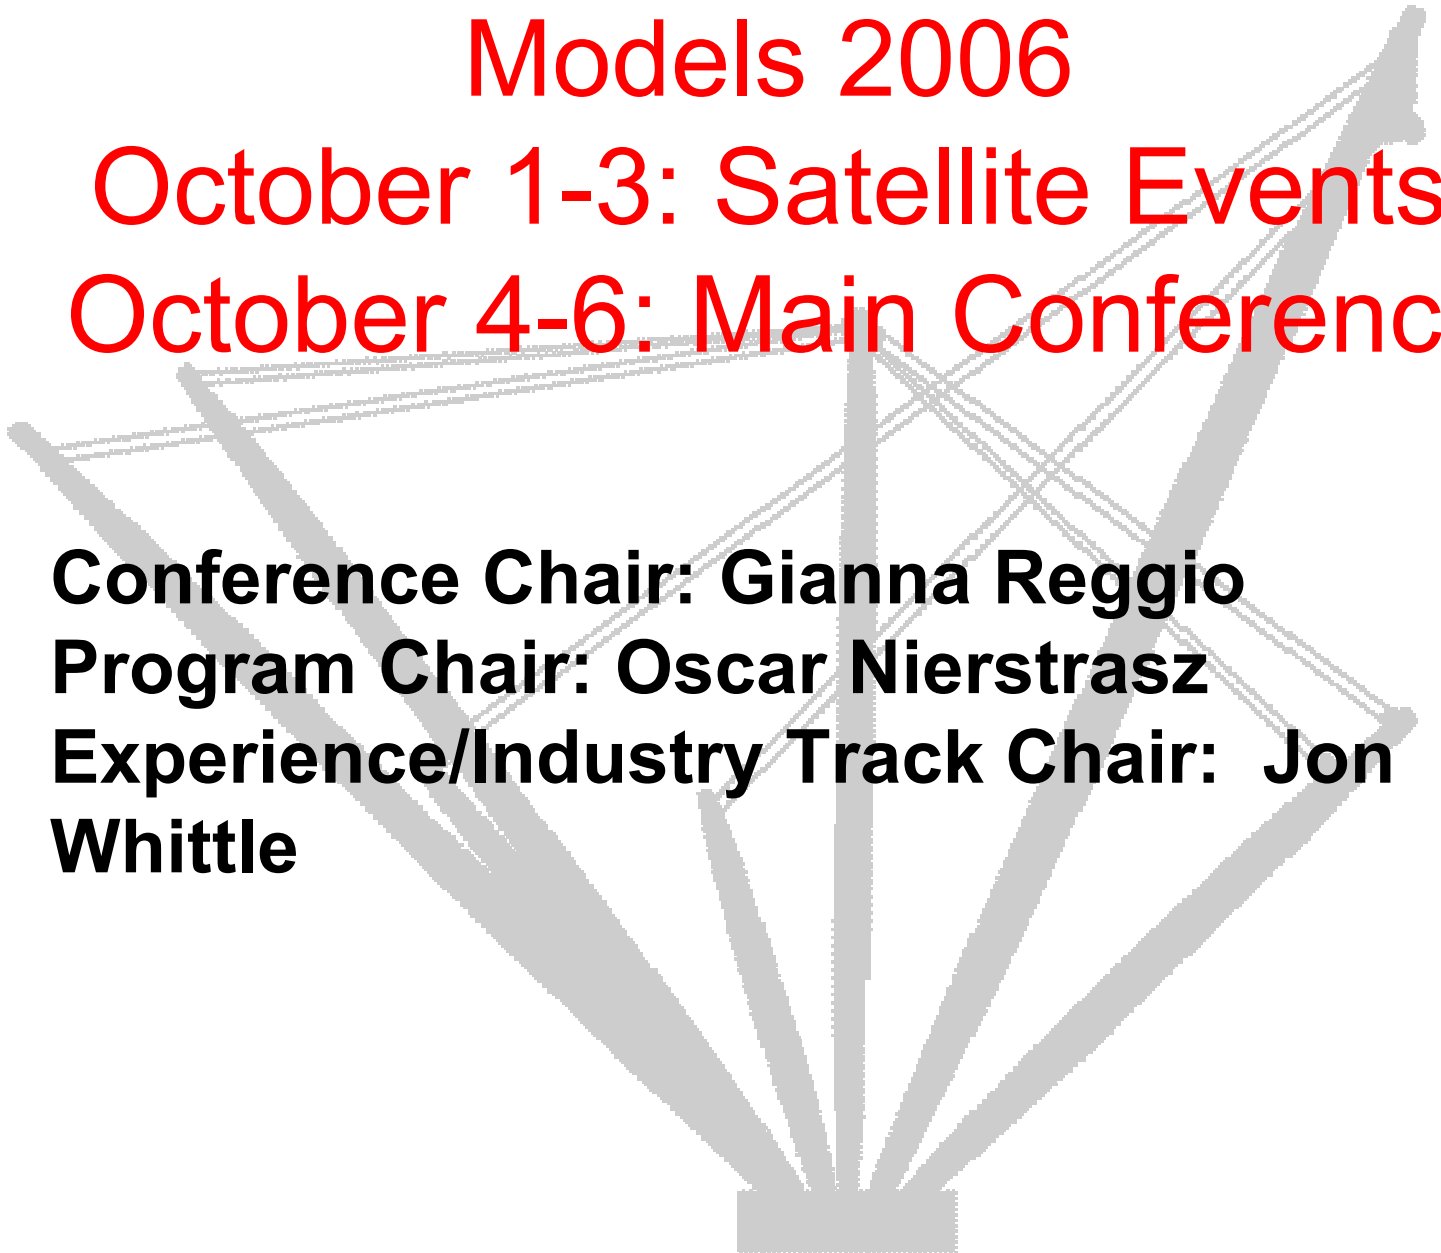

October 1-3: Satellite Events

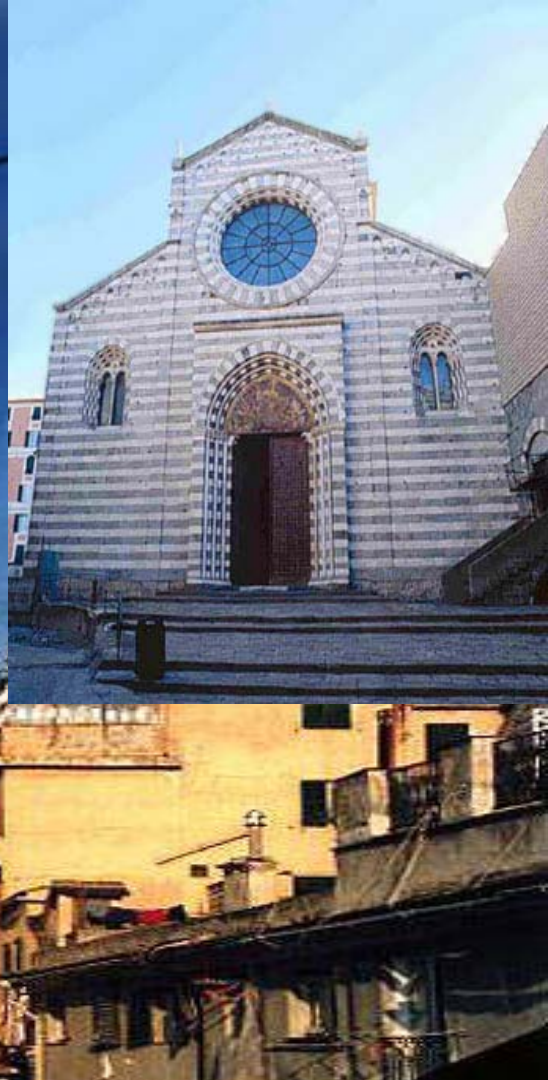

October 4-6: Main Conference

Conference Chair: Gianna Reggio

Program Chair: Oscar Nierstrasz

Experience/Industry Track Chair: Jon Whittle

Models 2006 will take place in the Teatro della Tosse near the piazza Sarzano, which is the only real great square within the Genova ancient city walls. The square is on a hill dominating the sea and offers an intriguing overlap of architectural and artistic styles, from the twelfth-century romanesque to modern lines

The Satellite Events before Models 2006 will (most probably) take place at the Bristol Hotel
