

Indicative values for Net Transfer Capacities (NTC) in Europe
Summer 2005, working day, peak hours
(Preliminary and non-binding values)

W A R N I N G:

These indicative values have been computed by extrapolation from standard situations, in order to evaluate the transfer capacity through a single interface for a typical exchange situation (UCTE Reference Case). Thus these figures are only indicative and they are not cumulative (they cannot be summed up). When the evaluation of a transfer limit requires to use a set of assumptions which are too far from usual or foreseeable situations (leading to high inaccuracies), the NTC value has been replaced by "no realistic value".

FROM	TO	MW	VALUE PROVIDED BY
Albania	JIEL/EKC*	200	Albania and EKC
	Greece	250 // 10	Albania // Greece
Austria	Germany	1400	Austria and Germany
	Italy	200	Austria-France-Italy-Slovenia-Switzerland
	Czech Rep.	600	Austria and Czech Rep.
	Slovenia	650	Austria and Slovenia
