- Author’s variation of "Santayana's Aphorism on Repetitive Consequences”

## **Preface**

Leaving out the historical details, this book boasts of the fact that all the essays included herein are written in such a manner that they do not exceed 2000 words. This book is intended for those students who are taking up Immunology course for the first time in their undergraduate program. Thus, an appropriate title would have been ‘Basic Immunology’. However, as this book excludes, as stated earlier, the historical details and a comprehensive list of CD antigens (which is constantly changing), I feel prudent in choosing the title ‘Essays in Science – Immunology’. The essays are written, to the best of my knowledge, in simple and lucid style and may appear at many places as if I am conversing with the reader. Consequently, I will be elated if this book is also found to be useful for general reading by non students. In all, draft of ‘Essays in Science – Immunology’ took me almost seven years to complete.

<b>Contents</b>	<b>Page No.</b>
<b>Preface</b> .....	I
<b>Essay I. Introduction to Immunology</b> .....	1
1.1. The Immune System.....	2
1.2. Components of Innate & Acquired Immunity.....	3
1.3. Comparison of Innate and Acquired Immunities .....	5
1.4. Disorders of the Immune System .....	5
1.5. Immunology as an Applied Science.....	6
1.6. Transplantation Immunology .....	6
1.7. Evolution of Immunity .....	6
1.8. Immunity in Plants .....	7
1.9. Concluding Remarks .....	7
<b>Essay II. Elements of Immunity – I: Innate Immunity</b> .....	9
2.1. Fate of an Antigen .....	10
2.2. The Innate Immunity .....	11
2.2.1. Fever.....	12
2.2.2. Inflammation.....	12
2.2.3. Pathogen-Killing .....	14
2.2.4. Respiratory Burst .....	14
2.2.5. Endocytosis .....	15
2.2.6. Phagocytosis.....	16
2.2.7. Cellular Defences .....	16
2.2.8. Humoral Factors: Biologically Active Substances & Pattern Recognition Receptors .....	17
2.3. Concluding Remarks .....	18
<b>Essay III. Elements of Immunity – II. Acquired Immunity</b> .....	19
3.1. Development of Different Cell Types from Stem Cells.....	20
3.2. Lymphoid Organs.....	21
3.3. Interrelation between Innate and Acquired Immunity.....	23
3.4. Concluding Remarks .....	24

<b>Essay IV. Antigens</b> .....	27
4.1. Additional Requirements of Immunogenicity .....	29
4.2. Immunization Routes .....	29
4.3. Antigenicity and Antigen-binding Sites .....	30
4.4. Classes of Antigens .....	31
4.5. Practical Aspects .....	32
4.6. Concluding Remarks .....	33
<b>Essay V. Antibodies</b> .....	37
5.1. Isolation and Characterization of Antibodies .....	38
5.2. Structure of Immunoglobulins .....	38
5.3. Immunoglobulin Domains.....	41
5.4. Immunoglobulin Hinge Region.....	41
5.5. Immunoglobulin Variable Region.....	41
5.6. Immunoglobulin Variants .....	42
5.7. Kinetics of the Antibody Response after Immunization .....	45
5.8. The Immunoglobulin Superfamily .....	46
5.9. Concluding Remarks .....	46
<b>Essay VI. Practical Applications of</b>	
<b>Immunology I: Antigen – Antibody Interactions</b> .....	47
6.1. Agglutination Reactions .....	49
6.2. Precipitation Reactions.....	50
6.3. Immunoassays .....	52
6.4. Immunofluorescence .....	52
6.5. Fluorescence Activated Cell-Sorting (FACS).....	52
6.6. Additional Applications .....	53
6.7. Animal Models.....	53
6.8. Concluding Remarks .....	54
<b>Essay VII. Antigen Recognition I</b> .....	55
7.1. B-cell Receptor (BCR) (Figure 7.1).....	57
7.2. T-cell Receptor (TCR) (Figure 7.2) .....	59
7.3. Concluding Remarks .....	61

<b>Essay VIII. Antigen Recognition II - Major</b>	
<b>Histocompatibility Complex (MHC)</b> .....	63
8.1. Major Histocompatibility Complex (MHC).....	64
8.1.1. Structure of MHC Class I Molecules .....	65
8.1.2. Structure of MHC Class II Molecules.....	66
8.1.3. MHC Class III Molecules .....	67
8.2. Functions of MHC.....	67
8.3. Additional Pathways .....	68
8.4. Concluding Remarks .....	69
<b>Essay IX. Antigen Recognition III – Complement Cascade</b> .....	71
9.1. The Classical Pathway .....	73
9.2. Lectin Pathway.....	74
9.3. The Alternate Pathway .....	75
9.4. The Membrane Attack Pathway.....	75
9.5. Inadequate Regulation of Complement Activation .....	75
9.6. Concluding Remarks .....	76
<b>Essay X. Immune Dysfunction I - Adverse Consequences of</b>	
<b>a Hyper Immune Response: Hypersensitivity</b> .....	77
10.1. Type I Reaction: IgE Mediated – ATOPY .....	78
10.2. Type II Hypersensitivity Reactions: Cytotoxic	
Reactions: Antibody-Dependent Cell-Mediated Cytotoxic (ADCC)	
Reactions .....	80
10.3. Type III Hypersensitivity: Immune Complex Reactions.....	81
10.4. Type IV Hypersensitivity: Delayed Type Hypersensitivity (DTH)	
or T-cell Mediated Hypersensitivity.....	81
10.5. Concluding Remarks .....	82
<b>Essay XI. Immune Dysfunction II. Immunodeficiency</b>	
<b>Disorders and Diseases</b> .....	85
11.1. Immunodeficiency Syndromes.....	86
11.2. Concluding Remarks .....	91

<b>Essay XII. Immune Dysfunction III. Tolerance, Autoimmune Disease and Neoplasia of the Lymphoid Tissue</b> .....	93
12.1. Autoimmunity .....	95
12.2. Neoplasms of the Lymphoid System.....	97
12.3. Concluding Remarks .....	97
<b>Essay XIII. Practical Applications II. Vaccinology</b> .....	101
13.1. Concepts .....	102
13.2. Vaccines .....	102
13.3. Concluding Remarks .....	103
<b>Essay XIV. Immunity to Different Types of Pathogens</b> .....	105
14.1. Immunity to Pathogens.....	107
14.2. Viruses.....	107
14.3. Bacteria .....	107
14.4. Parasites (Protozoans & Helminth Worm Infestations) .....	108
14.5. Fungi .....	108
14.6. Mechanism of Immune Evasion by Pathogens .....	108
14.7. Concluding Remarks .....	110
<b>Essay XV. Tumor Immunology</b> .....	111
15.1. Tumor Antigens.....	113
15.1.2. Immune Responses to Tumor Antigens .....	115
15.1.3. Immune Responses against Tumors.....	115
15.2. Immunologic Factors Favouring Tumor Growth .....	116
15.3. Concluding Remarks: Immuno-Therapy.....	117
<b>Essay XVI. Transplantation Immunology</b> .....	119
16.1. Host Response to Transplantation.....	122
16.2. Special Graft Situations.....	123
16.3. Concluding Remarks – Procedures for Enhancing Graft Survival.....	123
<b>Essay XVII. Immunoregulation</b> .....	125
17.1. Definitions.....	126
17.2. Overview .....	126

Contents

**Abbreviations, List of Figures Tables and Boxes** .....129  
List of Abbreviations Used .....129  
List of Figures .....132  
List of Tables.....135  
List of Boxes .....136  
**REFERENCES** .....137  
Appendix 1 - Clonal Selection Theory .....139  
Appendix 2 - Generation of Antibody Diversity .....139  
**Acknowledgements**.....141
