P802.1AXbk

Submitter Email: tony@jeffree.co.uk

Type of Project: Amendment to IEEE Standard 802.1AX-2008

PAR Request Date: 18-Dec-2009

PAR Approval Date:

PAR Expiration Date:

Status: Unapproved PAR, PAR for an Amendment to an existing IEEE Standard 802.1AX-2008

1.1 Project Number: P802.1AXbk

1.2 Type of Document: Standard

1.3 Life Cycle: Full Use

2.1 Title: Standard for Local and metropolitan area networks--Link Aggregation--Amendment: Protocol addressing

3.1 Working Group: Higher Layer LAN Protocols Working Group (C/LM/WG802.1)

Contact Information for Working Group Chair

Name: Anthony Jeffree

Email Address: tony@jeffree.co.uk

Phone: +44-161-973-4278

Contact Information for Working Group Vice-Chair

Name: Paul Congdon

Email Address: paul.congdon@hp.com

Phone: 916-785-5753

3.2 Sponsoring Society and Committee: IEEE Computer Society/Local and Metropolitan Area Networks (C/LM)

Contact Information for Sponsor Chair

Name: Paul Nikolich

Email Address: p.nikolich@ieee.org

Phone: 857.205.0050

Contact Information for Standards Representative

None

4.1 Type of Ballot: Individual

4.2 Expected Date of submission of draft to the IEEE-SA for Initial Sponsor Ballot: 07/2011

4.3 Projected Completion Date for Submittal to RevCom: 12/2011

5.1 Approximate number of people expected to be actively involved in the development of this project: 25

5.2 Scope: This standard specifies changes to the addressing used by the link aggregation control and marker protocols.

5.3 Is the completion of this standard dependent upon the completion of another standard: No

5.4 Purpose: The purpose of this amendment is to change the constraints on the addresses used by the protocols defined in the 802.1AX standard in order to allow an aggregated link to span one or more Two-Port Media Access Control (MAC) Relays.

5.5 Need for the Project: IEEE Std 802.1aj defines a Two-Port MAC Relay (TPMR), which blocks

the addresses currently used by the 802.1AX protocols. As it is desirable to allow aggregated links to be extended using TPMRs, changes to the protocol addressing are required.

5.6 Stakeholders for the Standard: Developers, distributors, and users of networking equipment and services, including networking integrated circuit (IC) developers and switch vendors.

Intellectual Property

6.1.a. Is the Sponsor aware of any copyright permissions needed for this project?: No

6.1.b. Is the Sponsor aware of possible registration activity related to this project?: No

7.1 Are there other standards or projects with a similar scope?: No

7.2 International Activities

a. Adoption

Is there potential for this standard (in part or in whole) to be adopted by another national, regional or international organization?: No

b. Joint Development

Is it the intent to develop this document jointly with another organization?: No

c. Harmonization

Are you aware of another organization that may be interested in portions of this document in their standardization development efforts?: No

8.1 Additional Explanatory Notes (Item Number and Explanation):
