# Pro AV Innovations

NDI®

NETGEAR's commitment to the Pro AV industry has grown exponentially thanks to the many partners who work with us to certify operability and ensure complete compatibility.

Our strategic collaboration with NewTek/NDI (part of the VIZRT Group) has resulted in instant configuration of NDI® on our popular M4250 AV Line of switches through a unique NDI configuration profile.

What is NDI?

NDI (Network Device Interface) is a new open standard for live production IP workflows over Ethernet networks.

NETGEAR M4250 AV Line Switch

NETGEAR M4250 AV Line Switch

M4250-10G2F-PoE+ (GSM4212P)

What is the best switch for NDI?

NETGEAR's M4250 series switches are perfect for NDI with a dedicated profile for NDI 4 and one for NDI 5 with Q-SYS, Dante or AES67 audio.

How do I configure the M4250 switch?

1 Choose the NDI profile

2 Choose the ports

That's it.

All the settings are handled for you, automatically, greatly reducing setup time.
