Ad Hoc & Sensor Wireless Networks

Co-editors-in-chief: Jaime Lloret Mauri and Richard Yu

AHSWN provides an opportunity for researchers from computer science, engineering and mathematical backgrounds to disseminate and exchange knowledge in the rapidly emerging field of ad hoc and sensor wireless networks.

American Poetry Review

Editor-in-chief: Elizabeth Scanlon

APR is dedicated to reaching a worldwide audience with a diverse array of the best contemporary poetry and literary prose. APR also aims to expand the audience interested in poetry and literature, and to provide authors, especially poets, with a far-reaching forum.

Display and Imaging

Editor-in-chief: Andrea Campeso

D&I covers studies into the fundamental theoretical understanding of the origins and mechanisms of light emission and absorption; electroluminescence, electroabsorption, photoluminescence, fluorescence, stimulated emission and other electrical or optical phenomena.

High Temperatures - High Pressures

Co-editors-in-chief: Ivan Egry and Jean François Sacadura

HTHP publishes original research papers related to thermophysical properties of matter, including thermal and transport properties. Papers dealing with the gaseous, liquid or solid phase are equally welcome.

International Journal of Laser Science: Fundamental Theory and Analytical Methods

Editor-in-chief: Jonathan Lawrence

IJLS covers the scientific aspects, fundamental theory and mathematical and analytical analysis methods surrounding lasers, laser beams and laser beam interactions and applications.

International Journal of Peening Science & Technology

Editor-in-chief: Pratik Shukla

IJPST provides a global and multidisciplinary forum for the exchange of the science, technology, developments and applications surrounding the wide variety of peening techniques available.

International Journal of Transport Phenomena

Editor-in-chief: Van P. Carey

IJTP provides a high-quality forum for a wide range of papers dealing with original research results pertaining to the transfer processes of mass, momentum and energy, particularly when two or all three processes are occurring simultaneously.
