Object Management Group Standards Development Organization Membership

About the OMG SDO

Our Mission

To generate technology standards that provide quantifiable real-world value to all vertical industries. That is why we are dedicated to bringing together our international membership community of end-users, researchers, and vendors in academia, government, and industry to develop and revise our standards as technologies change over time.

Our Vision

To provide a neutral forum where best practices from a wide range of fields can be discussed and standards can be generated that drive the adoption and innovation of cutting-edge technology spanning industries worldwide. Our Standards Process is fair, robust, transparent, and well-documented. Our one organization-one vote policy ensures that every member organization, despite size, has an effective voice in our voting process.

Benefits of Standards Development

As an OMG SDO member, you'll unlock more than just standards development pipelines and networks - you'll tap into the vast ecosystem of the OMG. Our collaborative efforts reach across diverse sectors to tackle global industry challenges, offering exclusive access to other consortia through joint-task forces and cross-participation program benefits!

Our strong industry partnerships allow us to source what our members need to get standards moving, which can typically be a lengthy process outside our membership. With long lasting liaisons partnerships built on industry trust we help guide our members from standard inception, development, and publication.

Our Most Popular Standards

BPM+ Business Process Management Plus

CORBA® Common Object Request Broker Architecture™

DDS™ Data-Distribution Service for Real-Time Systems™

FIGI® Financial Instrument Global Identifier®

Why Join?

Accelerate Your Digital Transformation Strategies

Embrace a transformative journey where your organization leads the charge in the digital landscape. As an OMG member, you gain exclusive access to resources and insights that empower you to drive your digital transformation agenda forward with confidence and foresight.

Define Technological Trends

Be at the forefront of technological evolution. Joining OMG positions your organization as a trendsetter, providing you with a platform to actively participate in shaping the future of technology. Stay ahead of the curve by influencing the development of standards that define the industry's technological trajectory.

Market Growth and Customer Attraction

Customers gravitate towards visionary companies. By anticipating and driving market needs through standards-based upgrades, you position your products and services as cutting-edge and future-proof. This not only attracts customers but also extends the lifespan of their IT investments, establishing your organization as a reliable and innovative industry player.

Inclusive Community of Experts

In our community, every voice matters. Regardless of the size of your organization, become part of a vibrant network of field experts where everyone enjoys an equal say. Our time-tested and open standards development process ensures that diverse perspectives contribute to the creation of robust, relevant, and universally accepted standards.

Our Areas of Focus

The OMG SDO maintains and owns the standards for the benefit of industry, thanks in large part, to the passion of individual SDO members and the organizations that sponsor them.

Our time-tested process has been successfully used to create and update technical specifications across virtually every industry domain to produce architecture, interoperability and modeling standards that make businesses more efficient and responsive in the marketplace at reduced cost.

Quarterly Technical Meetings

OMG Technical Meetings provide a neutral forum for analysts, architects, consultants, developers, engineers, executives, experts, vendors, and end-users alike to influence, develop, and submit standards that enable technological interoperability across industries.

Contribute to ongoing initiatives, inspire new ones, and network with industry experts!

We hold regional and sometimes international quarterly technical meetings each year during:

- Q1 March
- Q2 June
- Q3 September
- Q4 December
