

Make IAM the center of your security strategy!

Transform your cybersecurity with a trusted unified identity platform

Why One Identity

- **Lower TCO:**
one vendor for support and integrated solutions
- **Streamline support:**
single point of contact
- **Accelerate time to value:**
start anywhere with any use case

Quick facts

- 80 of the Fortune 100 as customers
- 11,000+ enterprise customers
- 500+ million identities actively managed
- 1,300+ partners worldwide
- 50 enterprise- and consumer-grade products
- 20+ years serving some of the largest and most demanding organizations around the globe

Our Perspective

With the proliferation of human and machine identities, the race to the cloud and the rise of remote working, protecting identity has never been more important. The main impediment to securing identities is the fragmented way in which most organizations manage user-access rights.

One Identity provides modern identity solutions essential in an era marked by the proliferation of human and machine identities, rapid migration to the cloud and the rise of remote work. One Identity protects and unifies the four core elements of identity security: Identity Governance and Administration (IGA), Access Management (AM), Privileged Access Management (PAM) and Active Directory Management (AD Mgmt).

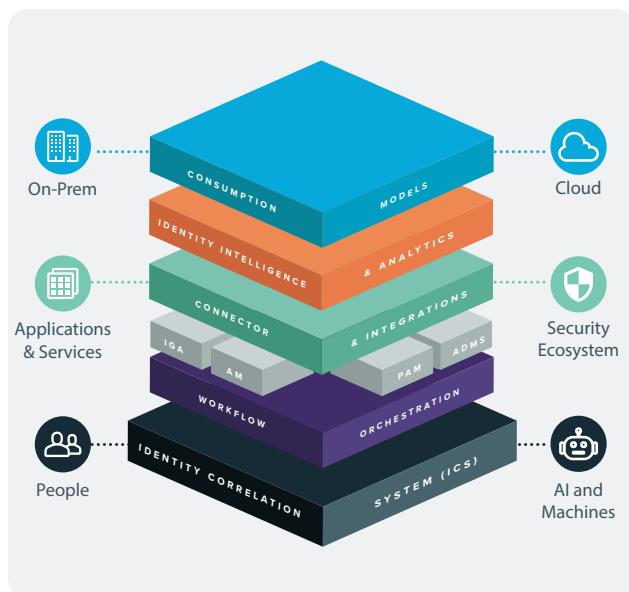

Moving from a fragmented state to a unified approach to identity security delivers numerous operational benefits, such as correlating all identities, removing friction between formerly distinct technologies, and facilitating automation and orchestration.

Our Unified Identity Platform provides a critical level of added protection. With 360-degree visibility, adaptive security controls, and the ability to apply analytics across all identities in the enterprise, organizations can verify everything before granting access to their most-critical assets. This level of response and control allows cybersecurity executives to shrink windows of exposure, move closer to achieving Zero Trust and improve their overall security posture.

Unified Identity Security Platform

We don't simply help customers solve all their identity security problems with fragmented point solutions. Our vision is to integrate these technologies into a single, cloud-first platform – what we call our Unified Identity Security Platform.

The foundation of our platform is in an identity-correlation system that delivers a consistent view across users, machine identities and accounts, which moves your organization from a fragmented to a unified state. Workflow orchestration eliminates manual and error-prone activities; connectors deliver flexibility by bringing disparate applications and security ecosystems under a single point of control. Powering all of this is identity intelligence and analytics to help cybersecurity professionals get a clear view of their risk profile and take corrective actions as needed.

Industry Recognition

- 2024 KuppingerCole Leadership Compass for Identity Governance and Administration
- 2024 KuppingerCole Passwordless Authentication for Consumers Leadership Compass
- 2024 5 Star rating in CRN Partner Program Guide
- Leader 2024 KuppingerCole Identity Fabrics report
- 2023 Safeguard EMA Radar report for Privileged Access Management
- 2023 One Identity Safeguard named a PeerSpot Rising Star
- Leader in KuppingerCole 2023 Leadership Compass for Access Management
- Leader in KuppingerCole 2022 Leadership Compass for Identity Governance and Administration
- Leader in KuppingerCole 2022 Leadership Compass for Access Management
- Leader in the 2022 Gartner® Magic Quadrant™ for Privileged Access Management
- One Identity's Unified Identity Platform 'highly commended' in the 2022 SC Awards

About One Identity

One Identity delivers comprehensive cloud and on-premises identity security solutions that help customers strengthen their overall cybersecurity posture and protect the people, applications and data essential to their business. Our Unified Identity Platform brings together best-in-class identity governance and administration (IGA), access management (AM), privileged access management (PAM) and Active Directory management (AD Mgmt) capabilities. This holistic approach enables organizations to increase the visibility, control and protection over all their identities. Proven and trusted on a global scale, One Identity manages more than 500 million identities for more than 11,000 organizations worldwide. For more information, visit www.oneidentity.com.
