Optimal protection against cyber attacks

Breach Fighter combines the high-level antivirus protection that the Antivirus engine provides with the protection of the patented IPS engine and Stormshield Endpoint Security's technology. Specially designed to counter the most sophisticated threats, this technology has already proven its worth against targeted attacks and ransomware.

Multi-layer protection

- Several protections to raise the security level
- If an infected file is detected, the Stormshield community will be automatically protected

Trusted cloud service

- Deployed in trusted European datacenters
- Complies with the General Data Protection Regulation (GDPR)

Ease of integration

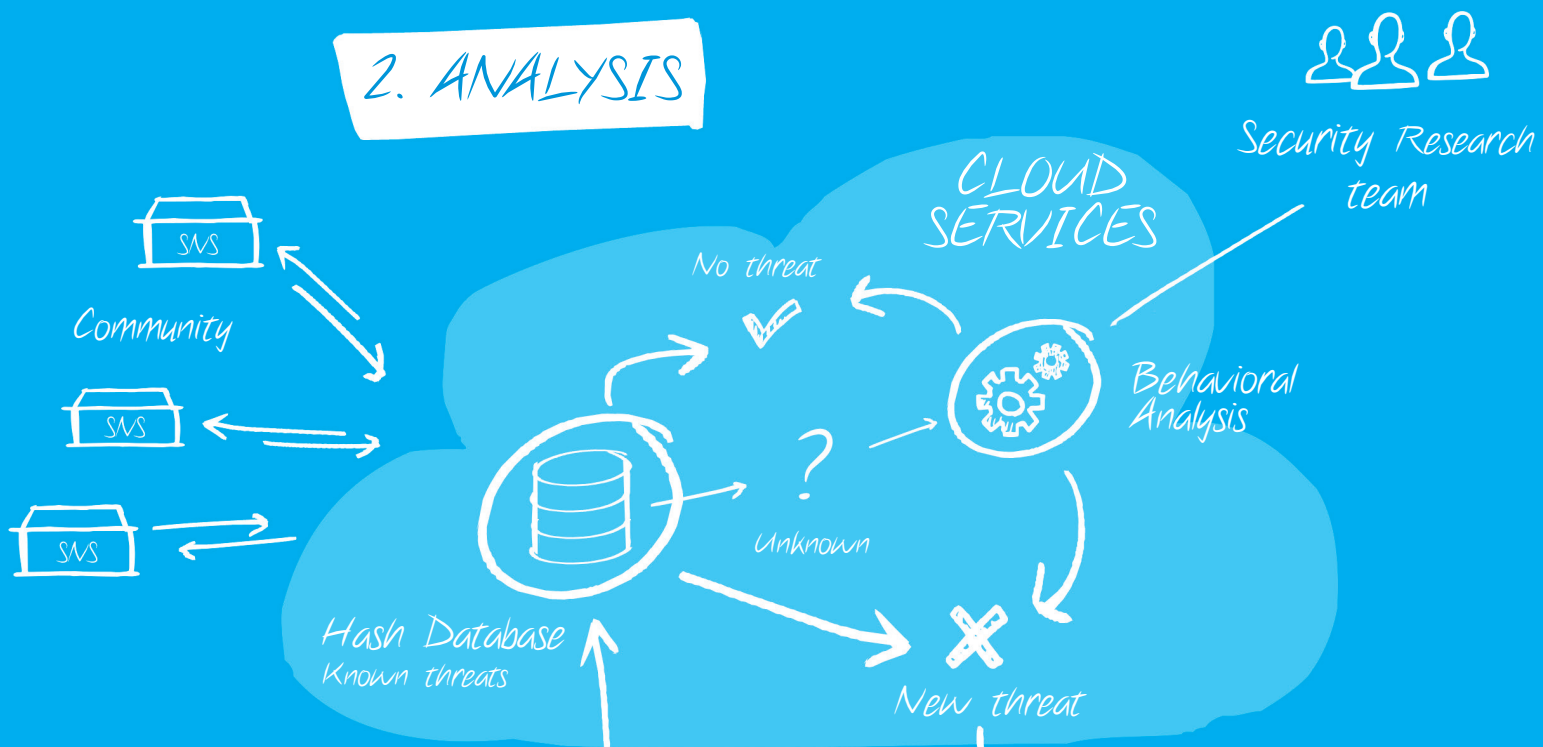

- Enabled in a single click on a Stormshield appliance
- No impact infrastructure
